Pervy Outfits

Oops, there was a gremlin in the works last issue which turned the button symbols for this cheat back to letters. So here it is again:

Highlight the Big Air option on the main menu and press \downarrow , R1, \uparrow , R1, \downarrow , R2, \uparrow , R2, \uparrow , \uparrow , R1, \downarrow , \downarrow , R2. Cindy will now wear a skimpy leather outfit (!) while Irin dons a school uniform (apart from in Competition mode). You can alter the outfits by pressing X and moving \leftarrow or \rightarrow .

Critical Depth

Well blow me down! Some of the tips we gave to get the bosses in this murky torpedo festival were for the yank version! Here is the lowdown on how to get the bosses on the English version.

Mr Phatt

When you reach Mr Phatt during a Missions game, finish him off with a combo that does more than 48 points

of damage and you'll be able to select him on the character screen.

Abaddon

Put the game on the difficulty setting 'Captain' and when you complete it in Missions mode you'll be given Abaddon on the character select screen.

Agent 326

To get agent 326 on your list of characters, you have to complete the game with a final score of over one million points – good luck, you'll need it!

Overseer

Complete the game with all the starting characters.

Dead Or Alive (Import)

Bouncing mammaries aside, *Dead Or Alive* has more to offer than a large bust, it's stacked to the brim with cool cheat options, here are a few to get you started.

EXCLUSIVE Deathtrap Dungeon

Level Select

On the main menu (with the three skulls) press:

L1, R1, \triangle , \triangle , \square , \circ , R1, L1

Now go to Load Game and all the levels will be available.

Control Posing Camera

When you are posing after a victory, you can change the camera angle by pressing a direction on the D-pad, and you can zoom in/out by pressing L1/R1.

Alternative Costumes

Reset the options to their default settings and finish the game on Tournament mode.

Unlock Raidou

Get all the costumes for all the characters then choose costume 14 for a female character or costume 5 for a male character and complete the game under the default settings.

Unlock Ayane

To play as Ayane you have to complete the game with Raidou on the default settings.

Grand Theft Auto

Extra Vehicles

Thanks to the reader who sent in maps showing the locations of the tanks and superbike. Unfortunately we lost the letter that came with them!

Extra Options

After playing the game for three hours, five new options will appear under the extra Config menu. Five more will appear every three hours until the timer reaches 15 hours.

Voice Option

Enable the Command List option, then complete all the moves on Training mode to activate the voice option.

Die Hard Trilogy

Extra Vehicles

Many thanks, and a gold joypad, go to Danny Northcott for sending in the locations of some nifty vehicles to drive on Die Hard 3.

First you need to input this cheat. Pause the game and hold R2, then press: \Rightarrow , \uparrow , \downarrow , \square . Your coordinates are the left and middle numbers at the bottom of the screen. Use them to locate the following:

- Level 1: Police Car- 18, 112
- Level 3: Hot Dog Van- 15, 10
- Level 5: Ferrari- 44, 58
- Level 7: Porsche- 18, 65
- Level 8: Hot Dog Van- 15, 10

- Level 9: Police Car- 36, 110
- Level 9: School Bus- 26, 100
- Level 11: Ferrari- 22, 45
- Level 12: Pram- 45, 122
- Level 13: Truck (start off in it)

Final Fantasy VII

Andy Zwadlo from the fax bureau scanned in this top tip for all you prospective Chocobo breeders out there.

Save Time When Chocobo Breeding

Before you breed Chocobos, save your game. This enables you to quit and reload if you don't get the ones that you want. Also, when you have caught four Chocobos, save the game before you take them to Chocobo Billy. That way if he says they are of poor quality, you can simply reload and get them reassessed which saves you the bother of having to go looking for four more Chocobos.

High Scoring Heroes!

We're planning a proper high scores section in PowerStation, so we need your top scores for all well-known PlayStation games. However, as certain people have a tendency to exaggerate their gaming prowess, photographic or video evidence (no memory cards please) will be required for your score to be accepted. All the entries, no matter what the scores, will be entered into a prize draw. Send your scores to: **High-Scoring Heroes, PowerStation, Paragon House, Bournemouth BH1 2JS.**

Welcome to the correspondence section of PowerStation – the bit where you lot can interact with us lot to talk about all kinds of games-related nonsense and much more besides. Don't forget, we can help you with absolutely anything you'd care to chuck at us, whether it be release dates, what to buy, how to build a boat. You can have the full undivided attention of editor Phil by emailing us at **powerstn@paragon.co.uk** or writing to us at the address listed above. We look forward to hearing your comments.

LET'S ALL LINK UP

Dear Sir/Madam

The PlayStation is a great little console. So why are not all games linkable? No wonder

not many people are interested in link-ups, when most of the games are racers. Imagine Resident Evil or Tomb Raider II linked up, and choices of joining forces with a friend, walking around together, watching each other's back, or Death Match trying to stay alive. Also why can't we have multiple link-ups with three or four PlayStation joining up? Sony always like to say how many consoles have been sold. Well what about the thousands that are

sold second-hand? Why were these customers not happy?

I did a quick survey on who would like to link up. In about 30 to 40 minutes I collected no less than 45 names of people who were interested in link-ups and multiple console link-ups.

I am not a child. I'm 32 years old with my own successful business as a personal trainer. Playing the games gives me a chance to slow down and rest my body. Also I can pop it under my arm and go to a friend's and link up. I hope You'll take on board not just my thoughts, but the thoughts of other customers and not just throw this in the bin.

Joe Di Leo, Dursley, Gloucestershire

It's a nice idea, linking up several machines to play multiplayer games. Realistically though, it's only likely to

be viable over a network or the Internet – rather than several people meeting up with loads of PlayStations and TVs for a group session. Two-player link-ups are still rare enough events, as most people can't be bothered. This could be, as you say,

G-Police vehicles, although it hasn't worked on mine so he must be hearing things. Mark Priestman, Hull

Thanks for that info, Mark. Sorry you missed issue #18, but the G-Police passcodes you wanted are all in our

"Bring back Mark Wynne"

Philip Bunting, Lisburn

I'd recognise that handwriting anywhere, Mark.

because of the lack of non-racing linkable games, but you can't expect software producers to spend months developing a link-up option for a game if the majority of players aren't going to use it. Indeed, most of the linkable games you mentioned in your letter – such as Red Alert, Doom, and Duke Nukem – probably only had link-up modes because they were PC conversions. Network gaming is really taking off on the PC at the moment, but Sony have no imminent plans to do something similar involving the PlayStation. I'll pass your letter and petition onto them, though.

POLICE INFORMER

Dear PowerStation

I am writing to tell you about the unknown effects of some of the cheat passwords you printed in your G-Police guide.

1. BENIHILL – civilian cars and transport travel at immense speed across the screen.

2. SUPACAM – this cheat is somewhat of an ego boost. While in combat with enemy aircraft you get to see their final moments before they are destroyed. In order to do this you must target them, then attack until their shield levels reach 0%, stop firing and watch them crash to the ground (close up and personal).

3. WOOWOO – as for this cheat, my friend says that it gives you a siren on the

Databurst section.

DON'T TRASH IT

Dear PowerStation

I am sick and tired of people writing in complaining that the Trashman page is rubbish and should not be printed. Well that's crap. Every month I enjoy reading Trashman. And anyway, what's one page? The rest of the mag is brilliant, so quit your moaning and leave space for decent letters to be printed.

Nathan Stanton, Devon

It's nice to know that someone likes the Rubbish Tip!

her room naked. Or, if he doesn't do this, he'll pump her full of those drinks he is always carrying around so that he can get her drunk and do what so many of those writing in for naked Lara cheats would want to.

In issue #19 you defended the creepy, perverted little butler when you said in one of your letter replies that he was a loyal servant. But if he's so loyal, where was he in the final of *Tomb Raider II* when those thugs broke into Lara's mansion wielding baseball bats? Probably still stuck in the freezer after Jack C from Putney locked him in there.

Kirby, Leeds

I'm sure being at the beck and call of such a beautiful woman has its disadvantages... but I wouldn't mind having a go!

MISSING RESIDENT

To the scumbags at PowerStation

In issue #18, you gits wrote at the back that you would print the complete solution to *Resident Evil 2* in next month's issue. I had already bought the US version of the game, knowing that you nob-heads would print the goddamn thing, but when I bought issue #19 I blew my nuts trying to find the thing – you lying bums hadn't printed it!

Thanks for nothing.

The Devil's Son

Most of your letter was sadly unprintable, 'son'. Anyway, I wish we'd never printed that bleedin' next month page, but we honestly thought we would be doing the RE2 guide in the following issue. A legal dispute meant that our guide (which is also being produced for a separate book) was put on hold. Since then, the game's official UK release date has slipped so much that we decided to delay publication of the guide. I know it's been annoying for those who have the import version, but the guide is currently being written and the first part is in this very issue – part two (with exclusive maps) next month. Our sincere apologies go to all those who've had to wait.

DODGY CONNECTION

Dear PowerStation

I have a PlayStation, TV, and stereo (all Sony). My PlayStation is connected to my TV, but how do I connect my PlayStation to my stereo? This is the back of my PlayStation:

Q&A

Don't be ashamed
Tell us your problems

Broken Sword II

...from Brian Doherty, Dundalk

I have been playing *Broken Sword II* for almost two months now and I finally got so peed off at not being able to get past Needle Rock that I bought your magazine. Anyway, when I got to the top of the mountain and used the theodolite, it said in the guide that when you leave the screen, the action will switch back to Nico. This does not happen and I am left in the middle of the forest. Did I do something wrong or did you leave out something?

You've gone the wrong way, Brian! Once you've established where the treasure is, you should then leave Needle Rock via the right, not the left.

Broken Sword II

...from Mrs Janet Newton

I had *Broken Sword II* for Christmas and became stuck on the stockade section. I was going to write to you, but struggled on, trying various things, when issue #18 came through the post.

The thing is, I had tried all the things you quoted and I still cannot get the hornets to chase Bert the stuntman. I have asked questions in various orders, asked all questions, asked different people in different orders, plus giving the pancake with syrup and throwing the buns, but as yet nothing has happened.

You still must have missed something in this section, otherwise the hornets would come out and chase the stuntman. Follow our guide to the letter, asking all the questions etc it says, and you should have no problems. Well it worked for us!

Exhumed

...from Jim Donoghue, Co Tipperary

Could you please help me with a spot of trouble in *Exhumed*? I am using your guide and am in Karnak after collecting the Sobek Mask. In the water near the camel there are meant to be tunnels, but where actually are they? I have spent three nights looking for them and cannot locate them.

Any assistance would be appreciated. By the way, Ireland has the highest amount of PlayStations per population – 17%

of households have one. I don't know what it means except Irish TV is pretty poor!

The tunnels aren't hidden or anything – just follow the water round. Are you sure you're at the right camel? It should be the one where you exited on your previous visit to Karnak.

Resident Evil

...from Melvin Adams, Luton

I enjoyed your guide to *Resident Evil* (issue #18), but can you possibly help me with a couple of problems I'm having?

1. Your guide says to "look at pool table", which I did. Perhaps I'm thick but I did and don't understand.

2. I managed by luck to get into the drug storehouse (guardhouse 1F) and I know the V-Jolt formula is relevant to what's in there but "Chris can't handle chemicals". What do I do?

3. I've also noticed a room with a door panel (mansion 2D) which requires a code to enter. This map shows the room as 'rough passage'. How do I get into this passage and the surrounding rooms. I'm pulling my hair out because of this. Please can you help me?

1. The pool table's a red herring – you don't have to bother with it.

2. You have to get Rebecca to prepare the V-Jolt for you. This depends on which order you've done things previously in the game, but is not essential to complete it.

3. That room's just a short cut. You can only enter it when playing as Jill. Barry will give you the code on a piece of paper after you've defeated the snake in the lesson room.

Grand Theft Auto

...from Chris Armstrong, Norwich

I bought issue #19 of your magazine, mainly for the *Grand Theft Auto* solution. For a while now, I have been wondering about a number of vehicles that I have seen in reviews etc, but have never found in the game. According to your magazine, on Liberty City there are trains, fire engines, and helicopters. Or are there? Somehow I have the impression that these vehicles aren't in the PlayStation version of the game. Maybe this is due to memory restrictions. Are these vehicles only in the PC version?

*You're not the only reader to write in about the elusive vehicles in *Grand Theft Auto*. To answer this burning question, we spoke to the programmers at DMA. They said that the fire engines and trains*

were omitted from the PlayStation version. The helicopter, apparently, was drawn by one of their graphic artists and mistakenly put in the manual – even though it's not in the game. However, the tanks are in there – see this month's CNN section for where to find them.

Tomb Raider II

...from Mr Blackbeard, Jolly Roger, The High Seas

Sorry, but I missed your issue #17 *Tomb Raider II* guide and need serious help on just one level, 40 Fathoms. I have the Japanese version of the game. I asked other magazines for help, but it wasn't good enough. They said in the fourth chamber in the sunken ship there's a switch to open a hatch for Lara to swim through, but the thing is I can't find this damn switch! I've checked all the rooms in the ship I can, swimming through, avoiding sharks, and there's not a switch in sight. Is there a possibility the Japanese version's level could be a little different from the other versions or do I need glasses?

Why the bleep did you buy the Japanese version anyway? Core Design have told us that the underwater switch is present on all versions of the game. So the only conclusion we can come to is that you have bought a pirated copy of the game, copied from an early preproduction gold disc. In this case it's unfinished, bugged, and there will be areas which can't be completed!

This should serve as a stern warning to anyone thinking of buying pirated software: not only does it harm the games industry, but you'll probably end up with a duff version of the game.

Nightmare Creatures

...from Steven Welsh, Skelmersdale

Your issue #18 *Nightmare Creatures* guide was brilliant, but for one part of it. In Level 2 there's a bit towards the end of the level where you say, "...cross the rickety bridge. Flick the first switch you find and batter your way through the grate and quickly run past the blue monster to head for the secret area opposite."

I have done this before the entrance collapses, but neither Nadia or Ignatius will enter the tunnel opposite. They just run against an invisible wall, then the wood collapses. Is there anything else that we need to know to get into the secret area?

No, you can't do it! For some strange reason, this secret area was taken out of the final version of the game – after our guide was written.

WINNER TAKES ALL Nightmare Creatures (#18)

We asked you to design your own horror film, and you came up with some excellent ideas. Best of the lot was 'The Devil With The Horn', a rip-roaring tale of lust and murder featuring a Jekyll & Hyde female character, maverick policeman, and dim aristocrat. Author Lee Ciasullo of Stourbridge wins a trip for two to the London Dungeon, plus a copy of *Nightmare Creatures* and T-shirt. Nine runners-up also get a game and T-shirt:

C Thacker, Norfolk
Richard Smith, Whitstable, Kent
Paul Preidkalns, Corby, Northants
Marc Hodgson, Plymouth
Paul Lowe, Barrow-in-Furness
Callie Maguinness, Seaford, East Sussex
Helen Little, Cornwall
Craig Horne, Dundee
Chris Davidson, Cheltenham

Broken Sword II (#18)

The absolutely correct answer was that there was only one Mayan Stone in the game. However, we made a slip of the tongue in our guide with a reference to two other stones, so we decided to accept 'one' or 'three' as correct answers. Six lucky winners get a copy of *Broken Sword II*:

William Muir, Livingston, Scotland
Andrew Kearsley, Hyde, Cheshire
Jamie Akrill, Hull
Mr J Richmond, Lancaster
Dave Heddley, Failsworth, Manchester
Kieran Teasdale, Cockermouth, Cumbria

Actua Soccer 2 (#18)

The answer, of course, was (b) Chris Waddle, Stuart Pearce and Gareth Southgate. Five top penalty-takers receive *Actua Soccer 2* and T-shirt:

Dean Potterton, Cleethorpes
Mike Smith, Billericay
Paul Ryan, Margate
Matthew Cawley, Grimsby
Nicholas Ellis, London

FIFA '98 (#18)

As all football fans knew, the answer was (c) France & Brazil. Ten lucky strikers win FIFA '98, EA Sports baseball jacket, T-shirt, plus a mystery item:

Marlon J Higgins, London
Mark Noble, Dundee
Simon Gumley, Leicester
Winston Harris, London
Jack White, Newcastle
John Sherratt, Macclesfield
Lee Storr, Lincoln
Steve Dodge, Weymouth
Mark Dixon, Bristol
Mr Anonymous, Gidea Park, Romford

Datel Champions (#18)

Damon Hill will be driving for the Jordan team this season, as most of you knew. Five tyre-screaming winners receive Datel's *Combat Champion* and *Racing Champion* special cheat memory cards:

Ian Pursall, Wolverhampton
Haylee Emmett, Leeds
Ben Kemish, Jersey
Paul Parker, Doncaster
Colin Richards, Halesowen, W Midlands

I use a Scart lead to my TV, so what cables will I need? Where do I put them? How much will they be?
Me, Maidstone

Ah, you have one of the newer PlayStations with no separate AV sockets. You'll be pleased to know that you can buy a special Scart cable with extra audio leads (to plug into your stereo) from Gameplay for £10.99 (tel: 0113 234 0444).

ALTERNATIVE WEEDKILLER

On *Resident Evil*, in the guardhouse there is a way to get Barry to kill Plant 42 for you if you're Jill. To do this you should not go and create the V-Jolt but go straight to Plant 42. Make sure you have the knife with you and start slashing Plant 42 where it can't hit you. When it goes up to the ceiling it will come back down, then let it come and pick you up. Barry should then come in with the flame-thrower and burn Plant 42 till it dies.

Toby Langley, Leatherhead

Cheers for that tip, Toby. Does anyone else know any more alternative tactics for *Resident Evil*?

MASTER MUDDLE

Dear PowerStation

I am writing to you about the Datel Action Replay codes which you print in your cool mag. When I select 'New Game', then the Master code appears, I entered the *Resident Evil 2* demo disc name, but what the hell is the actual Master code? I have entered every cheat for the game and checked the codes a billion times and they still don't work. Please tell me the Master code (if any) or is my Action Replay card broken?

Paddy McMullan, Co Antrim

No, you're Action Replay isn't broken (or whatever you said it might be!) - it's just that our codes were wrong.

Sadly we haven't managed to get hold of corrected ones yet. As for the Master code, most games don't need one, but occasionally the Master code is needed to unlock the game to enable the use of other codes.

ANY EXCUSE

Dear PowerStation

It has come to our attention that in the past few issues you have been looking for an excuse to print pictures of sexy birds with big nawks. Well, look no further, for we have decided to do you and everyone else a favour:

Dear PowerStation, please could you print any pictures you like of sexy women with big nawks, be they the fleshy organic type, or the 'too good to be true' computer-generated ones? Or better still, you could have a 'page 3' type page where you could print pictures of said ladies and some vital stats and what they have to do with PlayStation games, if anything. Or even better still, you print a small picture in the bottom corner of each page, all at different stages of undress... [Snip! We get the picture!]

Lovejoy & Ned

Springfield

Oh go on then, seeing as you asked...

DUKE CHEATEM

Dear PowerStation

In your guide to *Duke Nukem* nearly all of your screenshots showed Duke's energy at 100. You must have used a God Mode cheat, so what is it?

John Walsh Fowler,
Wexford, Ireland

No, we're just so brilliant we didn't lose a scrap of energy! Okay, we had a God Mode on the preproduction version on the game we used, but it was taken out of the finished game - or so they tell us.

LITTLE BIG SECRETS

Dear PowerStation

I have recently purchased the excellent (but easy, thanks to your guide) *Little Big Adventure* and have noticed a few extra secrets.

When the inventor gives you the protopack, head back to Peg Leg Street (Principal Island) and you can then use it to cross the water behind Beatrice's house to get to the islet and the clover leaf box there.

When you go back to Citadel Island to get the fake ID card, go back to the tavern and you'll find a red Grobo clone outside. Kill him and get the key he drops and go in. Inside there is a green Grobo clone and a scientist. Kill the Grobo, grab the key, and kill the scientist.

Then enter the wine cellar through the golden door. Inside is a box for clover leaves and some other goodies. On Proxima Island there is a house near the shop with a Grobo in: talk to him and he'll give you a special chip. Then go back to the teleportation centre. In the first room there is a blue door - go through and there are tons of meca-penguins. You can also put some clear water in the water tower and the yellow-shirted Rabbibunny librarian will give you some clover leaves.
Stephen Myles, Leeds

Many thanks for those tips, Stephen. I always wondered how you got across to that islet.

SPOT THE TRASHMAN

If you see Trashman dossing around anywhere, don't feed him or give him any coppers. Instead take a photo and send it in to: **Spot The Trashman, Rubbish Tip, PowerStation, Paragon House, St Peter's Road, Bournemouth BH1 2JS.** If we print your picture, you'll win a 'top prize' - whatever bobbins we can dig out of the office cupboard.

Thanks to **Kevin Sharpe of Horsham** for sending in this piccie of 'Trashman' having a fag.

Nah, he's far too smart! But have a **Victory Boxing T-shirt** on us, anyway.

Keep sending any rubbish tips you find. Of course, any chump cheats sent to CNN will also get trashed on this page.

The Top Ten of Tips-related Nonsense

New Entry

Going Down

Going Up

Rock Steady

There's nothing more frustrating than seeing a cheat for a game you urgently require help on, only to find out the darn thing doesn't work. To expose the hoaxers, **Bobbin's Girl** returns for another session - Trashman is still missing and was last spotted inspecting an Iraqi weapons factory. So here they are: the top ten bobbins tips sent in to us or discovered on the Net.

1		Go to Lara's Home and lure the butler into the kitchen freezer, then lock him inside. Now complete the assault course in a record time and return to the freezer to see the butler is frozen solid. Exit to the main menu and you can now play the game as the butler. (I forget which joker sent this one in, but that's probably just as well or I'd have his 'sweetbreads' served up for dinner - Bobbin's Girl)	
2		At the Options screen press ●, L1, ■, R2, ↑, ⇐, ●, ↓, L2, ⇐. If done correctly, the God Mode option will appear. (Oh God, this isn't the only dodgy Duke cheat we've seen lately. Sadly, it makes Duke about as invincible as a slug crossing a motorway. If I really had a proper God Mode, I'd strike down the satanic scum who made up such tommy-rot cheats; or make them listen to Cliff Richard 24 hours a day - Bobbin's Girl)	
3		Complete Arcade and Championship on Pro level, coming first in each. Now use same car on first Arcade track (Corsica) in Time Trial and set a lap record under 1 minute. The barrier on the left after the start should disappear - drive down the lane to obtain the Celica. (That hoaxer Gary Shields is about as popular as Saddam Hussain. Maybe it's about the UN were sent in? - Bobbin's Girl)	
4		On the last level of the game, Home Sweet Home, go downstairs and out of the house. Go through the open front gates to find a motorbike which Lara can get her leg over and ride. Rev her up and head back into the garden to run over the gangsters. (If only I could remember which plonker called in to suggest this risible cheat, I'd ring more than their bleedin' number! - Bobbin's Girl)	
5		On the episode select screen press L2, ↑, ■, ↑, ■, ⇐, ●, ●, R1, ⇐. If you were quick enough, Duke will say "Come get some!" and after you pick your difficulty a list of levels will appear. (If I ever find the Guyver chap who came up with this absolute load of twaddle, I'll be saying "Come get some!" There possibly is a level select in the game, but this certainly isn't the code to obtain it - Bobbin's Girl)	
6		At any time during the game press L1, L2, X, ●, X, L2, R2 and Lara will disappear, allowing her to wander round without being attacked. (Despite numerous attempts to get this cheat to work, Lara was still all too visible - although most blokes seem to prefer her this way. Thanks for completely wasting our time, Nic Brown of Laughifen. Now do us a favour and disappear! - Bobbin's Girl)	
7		Go to the car selection screen and press L1, R2, ○, ○, □, △, △. You'll then be able to drive a bus around those rally tracks. (There you are, just about to cross the finish line and win the race, when the bell rings and you have to stop to let some little old lady off. But of course, you don't because this cheat is complete and utter bobbins. I'll get you, Butler; or rather, Stephen Griffin of Dundee - Bobbin's Girl)	
8		Enter 'SUCKMYROCKETS' as your name and you'll start the game with infinite rockets and ammo. (Er, excuse me, that's too many letters to fit! Some Irish geezer sent in this and another chump cheat. He even had the cheek to ask for a copy of the game. It turns out that the cheats do work... but only on the PC version! See that grey console in front of you, mate? That's a PlayStation, that is - Bobbin's Girl)	
9		On the character select screen, highlight Mamma and continuously tap ● to the rhythm of The Spice Girls' hit Mamma (geddit?). Mamma should then disappear, to be replaced by those cute babes! (We just can't seem to shift the Fab Five out of our rubbish chart. God knows what bizarre bobbins cheats we'll get when the Spiceworld game's released - Bobbin's Girl)	
10		When Chris is walking on the start-up screen, hold Select and R1 and tap in ▲ x3, ■ x3, X x3, ● x3. Then when you go to choose Chris or Jill it will change to Barry and Wesker. (Bobbin's It Will! It's Resident Evil hallucination syndrome again, this time from Aberavon's Kevin Ayres. Anyway, who'd want to be Barry now he's in strife for shrinking Pat's washing? - Bobbin's Girl)

Our monthly update for all the latest and greatest Action Replay codes...

The Datel Action Replay is an essential add-on device for the serious PlayStation gamer. This month we present a bumperload of Resident Evil 2 codes. Note that these codes are for the US import version of the game – we will print codes for the official game as soon as we have them.

Resident Evil 2 (Import Version)

Notes:

- This game does not use a master code, so leave that area blank.
- Do not equip any weapons to the secondary characters in this game. This will cause the game to lock up and may cause loss of Game Save information.
- Codes for Leon are specifically for Leon and not to be used with Ada. Codes for Claire are specifically designed for Claire and not for use with Sherry.
- If these items show up within the secondary character's menu, do not equip them. The game will not lock up if they are in the menu, but will if they are equipped.

AREA ONE

**Level 1:
Out Of Toon**
Goals: 3
Collectables

1st: 30 Carrots

2nd: 40 Cans

3rd: 50 Detonators

Above: After tilting it up, run across the girder to jump to the ledge for a life fly.

Goal 1: Jump To The Teetering Rock

From the start, head up the left ledge, past the moving cliff. Watch out for falling hazards as you gather more collectables, then jump onto the floating girder. Tilt it so the far end is high, then quickly jump from the latter to the far ledge. Tail-whip the smiley face for more collectables, then the TV for a purple life fly.

Drop down and grab all the collectables there while you're at it: swipe the bee and stop sign. Jump onto the stool for a green health fly, then jump onto the ledge to swipe the red mushroom and planted carrots for more collectables. Search bushes etc for more.

Head back to the waterfall (below girder) and jump up the rainbows to ascend, swiping the fish for more collectables. Head along the left ledge from the top to find a snowy section. Drop down to it and slide across the ice. Run onto the snowy cliff when it extends, then jump from the end onto the green platform to claim the **Hidden Silver Remote**.

Return to the top of the waterfall and head right to find a rabbit hole. Jump into it for a quick costume change – what's

Above: Jump from the moving ice ledge to grab the Hidden Silver Remote.

Right: Drop into the hole and you'll emerge in the next area wearing a rabbit costume.

up, doc? Turn around in the new area and enter the log to find another purple life fly. Exit the log and head forwards past the traps and hunter (swipe him for more collectables). Jump up the log ramp in the water and grab the green health fly on the rock at the top. Head right onto the ledge behind the tree to find a bee (swipe it) and purple life fly.

Return to the rock and continue upwards, jumping up the tree stumps. Drop through the second rabbit hole to emerge by another waterfall. Swipe the checkpoint TV on the right ledge and jump up the ledges. After waiting for the wind to die down, head over the rock bridge. For an extra life here, jump onto the lift which arrives and ride it up to a wooden platform with a smiley face and purple life fly.

Go back down and grab the green health fly past the flowers, then cross the second bridge to reach a road. For extra collectables here, you can tail-swipe the grating, climb the ceiling of the tunnel,

and swipe the stop sign beyond. If you grabbed plenty of collectables earlier, you should get the **Reward Silver Remote**.

Proceed past the rail track and jump up the rocks. Run past the moving cliffs, then onto the rocks there. Now wait for both cliffs to come out again and quickly jump onto them and up to the next rock. Jump from here onto the teetering rock. Angle the far end upwards, then quickly jump from there onto the ledge with the Red Remote and exit.

Goal 2: Hunt The Two Hunters

Head over to the waterfall (past the floating girder) and jump up the rainbows to the top. Head right and jump into the rabbit hole. Proceed past the traps and jump to tail-swipe the first hunter. Three hits will finish him off. Proceed up the log ramp and tree stumps and repeat your

tail-swiping tactics to defeat the second hunter. Now go back down the ramp to grab the newly appeared Red Remote by the TV.

**Goal 3: Whack Five Purple Mushrooms**

From the start, turn around to find the first mushroom. Tail-swipe it for some carrots. Now proceed forwards past the stop sign: the second mushroom can be found behind the rock on the right.

Return to the start and head up the left ledge, past the moving cliff and falling hazards. Jump on the floating girder (as on Goal 1) and tilt the far end up to jump to the far ledge where the third mushroom awaits (plus smiley face and purple life fly).

Drop down and jump up the rainbows to ascend the waterfall. On the left you'll find the fourth purple mushroom. Drop down to the next level and go past the lift, round to the final mushroom, found opposite the waterfall. Return to the lift area to find the Red Remote and exit.

**Level 2:
Smellraiser**
Goals: 3
Collectables

1st: 30 Skulls

2nd: 40 Tombstones

3rd: 50 Masks

Goal 1: Survive The Haunted Mansion

Head forward, then up the right stairs, grabbing skulls: jump over to the ledge behind the suit of armour for more. Drop back down and go up the left stairs for more skulls. At the top, head up the main staircase and jump over the gap to enter the doors.

In the library, swipe the bouncing pumpkin for more skulls, then jump onto the table. Ride it up to the ledge with a

ring of skulls. Turn right and jump via the next floating table to the ledge with a blood cooler. Smash the latter for more collectables, then swipe the fire fly. Use the latter and jump down, collecting the skulls en route. Collect more skulls as you climb up the far wall. Run past the face which comes from the wall and collect the tombstones before entering the doorway.

Tail-swipe the Frankenstein monster three times to dismember him, then repeatedly swipe his torso for more tombstones. Jump up the platform, then left to a ledge. Drop to the floor to grab more tombstones by the two axes. Jump back up to the ledge, then left to the alcove. Jump right and follow the walkway to find a green health fly.

Return to the ledge and climb the far wall, then jump via the chandelier (before it drops). Crouch by the crack (with red eyes) in the left wall to release more tombstones. Jump via the next chandelier, past the wall face to swipe the pumpkin for tombstones. Don't exit yet – head right to swipe the blood cooler. Push the far end of the bookcase to find a secret room with tombstones (you don't need to flick the switch for this Goal). Exit back to the walkway and go through the doorway.

Head downstairs to swipe the checkpoint. Jump onto the bookcases just to the left and grab tombstones. Crouch by the crack in the wall between them for yet more. Proceed round to the next pair of bookcases for more tombstones. Grab the green health fly just after them, and swipe the blood cooler.

Run past the TV (Goal 2 exit) and staircase, then step into the light to grab the life fly – the ghost can't get at you in the protective light. Once it's gone, head up the stairs, grabbing the masks. At the top, run away from the skull until it stops breathing fire, then swipe it. Grab all the masks, then jump to the ledge with the door. Don't exit yet – jump left to grab

more masks on the bookcase. Drop down and head back upstairs to jump over to the door and exit.

In the next room, turn around to swipe the blood cooler. Head downstairs to the watery room. Collect the masks in the corners and above the floating tables (tail-bounce up). Jump up to the ledge with the health fly, then via the middle ledge to the door to exit.

Time your tun past the axes and head left to collect a health fly. Turn around to swipe the pumpkin and collect the masks – you should now get the **Reward Silver Remote**. Jump up the bookcases to find another fire-breathing skull. Swipe him when you get the chance, then run past the wall face and jump via the chandelier to the next ledge. Swipe the demonic Chucky doll, then run from his headless body to smash his skull.

Cross over to the ghost and step into the light. Turn right and wait until the ghost's out of sight to jump via the appearing table to the other side. Head through the door straight ahead. Before grabbing the Red Remote to exit, go upstairs to reach the upper platform with blood cooler and life fly.

Goal 2: Smash Five Blood Coolers

Follow the same route as for Goal 1 to find all the blood coolers:

1. On the ledge accessed via floating table jump, after the first table ride.
2. In the very next room, by the pushable bookcase.
3. Just after the second pair of bookcases (far-left corner) in the 'Step Into The Light' room.
4. Behind you at the top of the stairs above the watery room.
5. On the upper ledge opposite the Goal 1 exit TV.

Once you've smashed them all, return to the 'Step Into The Light' room and grab the Red Remote to exit there.

Goal 3: Ride The Haunted Elevator

Follow the route for Goal 1 to reach the pushable bookcase. Go behind it to find a lever and flick it to activate an elevator later on. Now proceed toward the end of the level to the two exit doors after the second ghost. This time, take the left double doors to enter the elevator. Ride it down to the bottom, then go through the doors.

Before grabbing the Red Remote, however, head left through the arch and drop to the ledge for a life fly. Drop down to the bottom and follow the river through the arch to find the **Hidden Silver Remote**. Now return through the arch and jump back up the platforms to reach the Red Remote.

Boss: Gilligex Isle

Required: 3 Red Remotes

Stay in the middle and wait for the first of the three Tiki Brothers to hurl a trio of fireballs. You can swipe the blue one back, but you'll have to wait till it's the one in the middle of the trio to destroy the first brother. Once he's gone, jump over the right firewall which appears, then the left one (or vice versa).

Repeat the blue fireball swiping process for the second brother, jumping more firewalls. The third brother is a little trickier as he doesn't stay in the middle: just avoiding his fireballs and jumping the firewalls until you can knock a blue fireball back at him in the centre. You'll be rewarded with a **Gold Remote** and the gates to Area 2 opening in the Media Dimension.

Left: The fifth and final blood cooler is found on the high ledge opposite the Goal 1 exit.

Above: You can push this pushable bookcase. Go behind it to find a lever and flick it to activate an elevator later on. Now proceed toward the end of the level to the two exit doors after the second ghost. This time, take the left double doors to enter the elevator. Ride it down to the bottom, then go through the doors.

Above: Follow the water through the opening to find the Hidden Silver Remote.

Above: Avoiding the yellow fireballs, swipe the blue ones back at the Tiki Brothers.

Above: Once you defeat the third Tiki Brother, you're awarded the Gold Remote.

Below: After defeating the first Tiki Brother, you'll have to keep jumping over the firewalls.

AREA TWO

After defeating the Area 1 boss, the grey gates open to Area 2.

**Level 1:
Frankensfield**
Goals: 3

Collectables

1st: 30 Skulls
2nd: 40 Tombstones
3rd: 50 Masks

Goal 1: Run The Axe Gauntlet

Avoid the steaming pink pit and swipe the pumpkin. Go through the door and avoid the hole in the ring of skulls. Exit through the green-lit door. Turn right and jump on the ledge, then jump via the appearing table to the next ledge. Grab the health fly, then swipe away the corner to find a secret fire fly. Now jump back the way you came, to the doorway, and head up the ramps. Gobble the fire fly and swipe the Frankenstein monster at the top.

To the right is a pumpkin and a secret goodies tunnel behind it, if you want the collectables. Head over to the steaming pool and jump over it via the appearing table. Drop down to swipe another Frankenstein monster and grab the health fly. Jump up the other side, but watch out for the skulls thrown by the ghost: stay

Below: After grabbing the health, you can swipe the corner to reveal a fire fly.

left as you ascend the ramp. Swipe the swine, then head right to jump to a sticky wall. Crawl round it to the end, then drop onto the platform for a life fly. Jump off the open end of the platform to return to the top of the first ramp.

Head up the next ramp and run past the axe. Destroy the Chucky doll, as before. You can find more collectables by dropping into the alcove to the side of the first floor dip (but it's best to go for the Reward Silver Remote during Goal 2).

Jump up to the right ledge and swipe the pumpkin on the metal floor. Drop down from the end and head right up the

ramp, avoiding the skulls thrown by the ghost on the platform. Swipe him from behind, then jump over the pit. It's time to run the gauntlet along the path past the three axes – just time your moves. Head through the door and up the path to reach the Red Remote.

Goal 2: Head Down The Ramp

Note: To get enough collectables for the Reward Silver Remote, you'll have to backtrack and head along other Goal routes. However, it's easier to kill yourself towards the end of Goal 2 and repeat the main route (ignoring detours), getting the extra collectables from killing baddies.

In the first room, jump to the sticky girder above the steaming pit to collect the skulls. Drop back down and swipe the pumpkin, then exit. Grab the skulls around the hole, then go through the red-lit door.

Defeat the Frankenstein monster for skulls, then jump over to the large platform to swipe the pumpkin. Look around to spot the red diamond-shaped recess in the wall. Jump into it to find a secret tunnel containing the Hidden Silver Remote.

Jump back out to the large platform, then jump via the appearing table and two chandeliers to the other side. Swipe the pumpkin, then crawl up the sticky wall to

collect more skulls, including five at the top. Turn around and head back down, then turn left at the junction. Follow the path all the way round to find a fire fly.

Head back along the sticky path to the junction and take the opposite path. At the end, drop to the ground and head through the wall opening. Run past the two axes and onto another sticky wall. Drop off just before the opening to collect more goodies, then go past the axes again and back round. This time drop into the opening.

Drop into the room to swipe the Frankenstein monster and pumpkin. Grab the health fly, then jump into the low opening in the wall to find another health fly. Drop down and go back through the earlier opening, past the axes, to the sticky wall. Return to the place where you killed the monster and pumpkin. This time go through the doors.

Jump over and swipe the pumpkin, then head down the long ramp. At the bottom, swipe the Chucky doll and grab the goodies. Turn around and jump over the railing to go behind the ramp. Jump onto the clock-face platform to hear a bell ring. Go back over the railing and past the axes, then up the ramp to the clock. Drop

off the side and go underneath the clock to find a secret circular room with Frankenstein experiment, lots of collectables, and a life fly. Exit and head back to the clock-face platform. Jump across the platforms in the steaming pit to go through the door.

Kill the Frankenstein monster in the blood-soaked room, then jump onto the first sliding platform at the top of the slope. Jump to the next, then to the third, stationary platform. Jump into the alcove to get the health fly. Return to the first sliding platform and jump around the others, collecting the goodies, to the final landing. Head through the door to find a life fly. Return to the blood-soaked room, drop down, and exit.

Head over the steaming pit and back up the ramp to the clock. Jump to the right platform, then up the others to reach the high platform with the pumpkin. Swipe it, then jump to the next platform, and up to the door. Go through and dodge the skulls thrown by the ghost. Swipe him, then grab that Red Remote.

Goal 3: Stick Across The Ceiling Maze

Follow the main route for Goal 1 (ignoring detours) until you reach the high ledge with the metal pentagram floor. Instead of walking onto the latter, head right up the ramp towards the steaming pits. Jump via

the appearing table to the next platform, then jump over to kill the pumpkin on the green platform. Jump via the next appearing table and two chandeliers to the other side and kill the Frankenstein monster there. Jump down to the L-shaped wooden ledge. Walk round to the end, then jump to the other side via another appearing table.

Now jump onto the sticky wall and crawl up it. Continue round the path, avoiding the spiky baddies: at the junctions, head right, left, straight on, straight on, straight on, left, right. You should now reach the end in an alcove by an opening door: drop off and go through it.

In the next room, run up the ramp and do a karate jump to get over the gap – switching the camera to manual makes it easier. Swipe the pumpkin on the other side, then go through the door.

Follow the path round to the left and swipe the pumpkin at the junction. If you want some collectables, you can jump through the left window for a secret tunnel. Otherwise head right and swipe the Chucky doll, then go through the door. Head up the ramp, past the spiky baddies, to reach the Red Remote.

Above: Follow our route to reach the end of the sticky wall, then drop by the opening door.

Above: Jumping this gap is tricky. Line it up with the manual camera, then do one of your karate kick leaps.

Left: For Goal 3, run up the slope opposite the metal floor and pumpkin, then jump right via the disappearing table.

Level 2: Mao Tse Tongue

Goals: 2

Collectables

- 1st: 30 Takeaway Cartons
2nd: 40 Yin Yangs
3rd: 50 Masks

Above: At the start, jump up and swipe the neon sign to open a panel behind the large red pillar, containing a life fly.

Goal 1: Defeat The Deadly Dragon

Head right to the green neon sign and jump up to swipe it. Now go behind the large red pillar in the middle to find a life fly in the opened panel. Smash through the window of Crazy Quang's Clothing shop and swipe the ninja inside. Grab the takeaway cartons, then head through the opened doors. Defeat the brown shuriken-throwing ninja in

the next room and collect the cartons. Proceed round to the right to find a giant rotating fan. Drop down to the floor and collect the cartons above the yin yang springboard (which gives you a mighty boosted jump). Jump on it again to get onto the rotor. Jump off onto the ledge with the gong. Hit the latter to make some steps appear in the room. Swipe the wooden door behind the gong to find some secret cartons.

Leap back to the rotor, then off onto the ledge with the steps. Jump up to the third step, then get to the left side. Run right across the step to angle a jump onto the lowest part of the roof – tricky. Head round the roof and smash the first wooden door to find the **Hidden Silver Remote**. Continue round the roof, smashing two more doors to collect cartons. Drop back to the steps and jump up them, then smash through the window at the top. Swipe the samurai's head twice, then go through the opened doors. Head round the roof and kill the black ninja who guards the vase. Swipe the latter for more cartons. Follow the path round to kill another ninja and break a second vase. Grab the yin yangs from the latter, then go through the opened doors.

Hit the gong in the next room to open the doors. Go through and swipe the fire-breathing head when it's safe, then climb up the sticky wall behind it. Swipe the door at the top for a health fly. Jump to the platform with the cannon. Push the latter to aim at each gong in turn, swiping it to fire. Then shoot the door between them. Now climb up the newly appeared steps below it, to enter.

Grab the health fly in the next room, then kill the ninja and break the vase for more yin yangs. Smash the window and drop onto the orange roof. Head left and hit the checkpoint.

Go round the corner and jump onto the golden sticky wall. Crawl over to the right and drop onto the green roof. Smash the Used Junk shop window and enter. Kill the black ninja who attacks, then head through the doorway.

Kill the two scorpions outside by swiping them onto their backs, then hitting them three more times for the yin yangs. Defeat the samurai, as before, then jump up the steps, killing two more scorpions.

Above: Whee! These rope slides are great fun. You get to use several in this section.

When it's safe, jump up and swipe the fire-breathing head.

Use the yin yang springboard to jump to the next platform, then jump onto the rope slide. Swipe the fire-breathing head at the other end and grab the health fly. Use the yin yang springboard to jump to the next platform for another rope slide. Kill the two black ninjas at the end and collect the goodies. Jump up the platforms to the high rope slide, then tail-bounce up to it to ride down to the doorway.

In the next room, kill another black ninja for masks. Smash through the window and drop onto the red roof. Kill the black ninja round the corner, then ride the rope slide. Kill another ninja and break his vase, then head through the opened doors.

Now you need to defeat four brown ninjas, then three black ones. Collect all the goodies, then jump up the new triangular step to reach the sticky wall. Crawl the end, then underneath to emerge on a wooden ledge by the fire-breathing dragon. Push the cannon round just ahead of his path, then fire. It takes a few hits to kill the dragon and open the doors. Before exiting, grab the health fly and masks behind the other doors (which you've probably blown up).

In the next room, break the vases on either side of the statue to claim your **Reward Silver Remote**. Then jump up behind the statue to grab the Red Remote.

Above: Climb round and under on the sticky wall to reach the wooden ledge by the dragon.

Above: To defeat the dragon, keep moving the cannon around to aim just ahead of it.

Goal 2: Traverse The Rocking Pillars

After the collecting the hidden life fly, as before, smash through the Quang's Medical Supply shop window. Defeat the black ninja inside, then go through the doors. Drop down and defeat two more black ninjas. Jump onto the gold sticky wall and climb up onto the wooden ledge. Wait for the first axe to swing past, then run past them both. Run over the

collapsing red sections and kill the brown ninja at the end. Do a running jump onto the gold sticky diamond to be flipped into the next room.

Drop down and jump up the opposite platforms to hit the gong. Jump up the newly appeared green pillars, then swipe the fire-breathing head. Use either of the yin yang springboards to jump to the upper central ledge. Collect the health fly, then jump past the blade over the collapsing bridge. Hit the gong to open

the doors. Go through the passage and into the next doorway.

In the large room you have to kill five black ninjas to reveal two more yin yang springboards. Use either to leap to the upper walkway. Swipe the fire-breathing head in the middle, then hit the two gongs at either end. Jump onto the newly appeared sticky diamond to be transported to the next room.

Head to the far end of the floor under the rocking pillars and use either

springboard to jump to the sticky wall above. Crawl round and drop onto the green ledge. Now leap diagonally across the rocking pillars, rotating the camera behind you for each jump, to reach the Red Remote at the far end.

Level 3: www.dotcom.com

Goals: 2

Collectables

- 1st: 30 Batteries
- 2nd: 40 Transistors
- 3rd: 50 Atoms

Goal 1: Scale The Bionic Launch Tower

Note: There aren't enough collectables on either standard Goal route to get the **Reward Silver Remote**. The best tactic is to kill yourself towards the end of Goal 2 and repeat from the checkpoint.

Collect all the batteries on the floor first, then kill the capacitors for more. Jump onto the sticky yellow tiles for yet more goodies and drop off onto the ledge with the health fly. Drop down and jump up the ledges on the opposite side to reach the one with the green charger. Swipe the capacitor, then step into the charger to get a radioactive glow. This enables you

to activate the green bridges and use the green springboards. Quickly jump to the green cube to activate the first bridge. Cross it, then jump to the next green cube for another bridge. Use the springboard at the far end to reach the ledge above with a health fly.

Drop to the floor and use the charger there, then quickly jump up to the ledge with the green springboard which propels you to the ledge above. Follow it round and use another springboard to the reach

the higher ledge. Walk round to the right and kill the capacitor for its batteries, but don't enter the blue warp yet. Walk back round and jump to the charger on the ribbon. Jump left and use the springboard to leap up to the alcove with another health fly.

Drop down to the floor to collect the new transistors which should have appeared on the sticky walls – if they haven't, look around for any batteries you may have missed. Recharge your green glow and jump back up the two springboards to reach the high ledge again. Now enter the blue warp.

Swipe the capacitor in the tunnel, then follow the energy pulses along the walkway (to avoid them hitting you). Jump to the green lift, then wait for the energy pulse to go past on the right walkway before jumping over there. Head right to find a life fly.

Return down the walkway, jumping the energy pulses and the gap (if you fall, you'll be returned to the start of the tunnel), collecting more transistors. Continue round to the two platforms, then along the next walkway, jumping the pulses. Swipe the two capacitors at the end and collect all the goodies before exiting through the warp.

Grab more transistors, then charge up and use the springboard in the corner. Collect the transistors and health fly, then hit the next springboard to reach the high ledge and another transistor. Swipe the robot for some more goodies (you should hit Tier 3). Jump via the platforms on the right to reach another health fly. Return to charge up, then use the next two springboards to leap up the ledges.

Kill the robot, then jump over to the charger on the right, and back again to use the next springboard, then the next one. Walk round and swipe the robot, then look around to see the **Hidden**

Silver Remote. Reach it by jumping via the platforms on the right wall.

Now drop back down two levels to recharge. Quickly hit the three springboards in turn to reach the top. Grab the goodies, then look up to see a walker robot patrolling by the exit. Jump up and swipe him to bits, then grab the goodies and that Red Remote.

Goal 2: Cross The Data Bus Bridges

You can follow the start of Goal 1 to grab all the collectables and health flies in the starting room, before embarking on the following route.

From the floor, jump up the platforms to the charger on the ledge and use it. Jump over to the start of the first bridge, but instead of activating it, jump up to and use the nearby springboard. Quickly get the health fly and cross the next green bridge. Go over the ribbon to the alcove to enter the warp.

Swipe the capacitor, then proceed into the tunnel. As before, follow the energy pulse along the walkway and jump via the platforms to the next solid ledge. Wait for the pulse again, then proceed along the next section. Swipe the capacitor at the other end and exit through the warp.

Swipe the checkpoint, then kill another capacitor. Drop down to collect the goodies on the floor, then climb back up the sticky wall. Charge up and cross the three green bridges, jumping the gaps between the ends. Smack the robot and capacitor, then head through the warp.

Kill the two capacitors, then drop to the floor to collect more goodies. Charge up and jump back up via the two springboards. Walk round to the start of the ledge and jump to the rotating platform. Tail-swipe when the platform is exactly at the side while heading towards the far ledge – so that it's flung off in that direction. Jump off there and swipe the three capacitors to exit through the warp.

Jump up to the high charger platform to swipe the walker. Charge up and run back across the room to the green lift in the corner. Ride it up and cross the green bridge, then jump via the next lift to cross a second bridge. Jump into the charger and tail-bounce to the next green bridge. Jump from it to the green lift which floats across to the ledge with the Red Remote.

Above: To reach the exit, you have to move quickly across the green bridges, then jump to this floating platform.

Boss: Mooshoo Pork

Required: 9 Red Remotes

This boss may look a real swine, but he's a piece of pork pie to defeat, when you know how. At the start, just run away from him, around the electrified platforms, jumping the green slime pit on the near side. Don't get too far ahead or he'll turn round and go back the other way. Jump up and tail-swipe the large lever on the far side to fry him, then stand on one of the two side gratings: a safe area to avoid the shock waves he unleashes. Now approach the boss to lure him into chasing you again.

Repeat the process to flick the lever another two times. At this point, the swine removes the safety grates to reveal more slime pits, so you'll just have to time your jump over one of the shock waves. Lure the boss into chasing you once more, jumping over the slime pits to flick the lever and fry him one last time to shatter him and collect the Gold Remote.

Above: Jump up by the lever and tail-swipe to pull it and frazzle the boss.

Above: By standing on either of the gratings, you can avoid the blue shock waves when Mooshoo pulls the lever.

AREA THREE

After defeating the Area 2 boss, go through the red gates and ride the floating platform to Area 3.

Above: From the start, jump up these metal platforms to collect your first goodies at the top.

Level 1: The Umpire Strikes Out

Goals: 2

Collectables

1st: 30 Rockets
2nd: 40 Phasers
3rd: 50 Spacesuits

Goal 1: Ride The Rocket

Gex dons his Stormtrooper suit for a bit of sci-fi action, but his progress on this level is complicated by a limited supply of air, indicated by the depleting bar on the right of the screen. Gex needs to regularly fill up at air stations or swipe air tanks to survive.

Jump up the metal platforms on the left (not the spinning ones below). Kill the scuttling spider, then grab the health fly. Swipe the air crate and collect the bubble. If you want collectables, swipe the crates and radar tower. Now do a running jump from the edge towards the green dot in the distance, to land on an invisible walkway. Go to the end to grab the health fly, air, and collectables. Then return and jump back to the main platform.

Drop back down and return to the starting station for more air, then drop down to the metal plating on the right side, by more crates. Follow

the rusting metal path and drop onto the rocky platform. Grab the air tanks, then head up the metal ramp to the metal platform. Wait until the three round floating platforms pass under the purple forcefield, then jump across them to reach the stationary ones on the other side. Jump up these to reach the large rock with an air station. Fill 'er up, then swipe that manta ray three times to kill it.

Grab all the collectables, then jump onto the platform with the pylon. Destroy it, then jump onto the flying saucer to take a ride down, but jump off at the end before it self-destructs! Grab the goodies and use the air station. Jump to the next platform to splat the spider and collect a health fly. Jump over to the next for the Hidden Silver Remote. Watch out for the

R2-D2-style robots to either side: run straight ahead and jump into the warp.

Back at the start, refill your air and return all the way to the large rock platform by where you found the flying saucer. This time go up the metal slope to the platform. Wait for the first floating

platform to pass under forcefield and into range before jumping onto it. Jump over the others and onto the left metal platform to collect a health fly and more air. From the far end, jump back onto a floating platform when near, and jump left up the rest to reach the rock and air station. Jump across the two round platforms to find the rocket.

Collect more air, then jump via the metal platform onto the top of the rocket. Step on the paw print and it'll fly you into a Death Star-style trench before crash-

landing. Turn round to find an air station. Fill up and continue in that direction. Kill or avoid the manta ray, spider, and R2-D2. Jump over to the platform loaded with crates, including air.

Turn around and head back to the air station. After refilling, continue onwards and zigzag through the laser fire from the spaceship. Jump into the hole at the end. Visit the air station, then swipe the alien's head to kill him. Kill R2-D2 - avoiding his explosion. You can now grab that Red Remote.

Goal 2: Enter The Battle Dome

Jump up the metal platforms, as in Goal 1, to grab the goodies and health fly. If you want, jump onto the invisible walkway to collect yet more.

Return to the start for air, then drop down and swipe the three crates. Head up the metal ramp and drop onto the large rock platform and kill the alien by swiping his head. Smash the radar tower

and grab all the rockets, then phasers. Jump via the floating platform, back to the start of the ramp. Grab some air from the starting station, then head up the ramp and time your jumps across those spinning platforms.

Jump down the stationary platforms and ramp. Go to all the holes (including one under the ramp) and swipe the worms that appear, for phasers. Grab the air tank, then jump via the round platform to the radio tower to the left of the ramp to destroy it. Return and take the pink lift down for some more air and phasers. Take the other lift back up and get that health fly.

Jump back to the large rock and proceed past the asteroids to the air station. Proceed to the next series of floating platforms and jump across them to another air station. Before climbing up the energy tower, jump over to the rotating platforms: wait till each one is nearly flat before jumping to it. Grab the air and health fly from the rock platform at the end. Drop onto the large rock below the rotating platforms for more phasers

and air. Ride the round lift back up to the floating round platform, then to the energy tower rock.

Refill your air, then jump onto the energy tower and climb up its sticky surface. Follow the energy ring up the purple part and collect the phasers from the metal section. Go up the next purple bit to the metal section for more phasers, then spacesuits. Proceed to the top and jump to the walkway. Kill the spider, then grab the air crates.

Now venture over to the curved path and collect the spacesuits, jumping over the energy beams. Jump onto the safe platform at the end. Instead of trying to

jump over the large gap to the next safe platform, it's easier do a running jump right to the next curved bit. Head left to grab all the collectables, then proceed right to the safe platform by another energy tower. Do a running jump over to its rock. Before jumping onto the tower, swipe the crates for spacesuits and much-needed air.

Climb up the tower, as before, collecting all the spacesuits. At the top, jump to the walkway. Swipe the crate and the Dr Uranus and Buy Now signs for more spacesuits. Visit the air station, then jump over to the platform to kill the alien.

Above: Jump onto the first rotating platform before it flattens out, then immediately run up and jump to the next, to run up it and jump to the stationary platform on the right. Swipe the crates for spacesuits and air, then jump to the opposite platform via the rotating one for more. Jump down to the next platform and hit the checkpoint.

Jump down to the large rock, collecting the spacesuits en route. Grab some air and jump down to the next rock to swipe more air and spacesuits. Take the pink lift down to another curved section. Swipe the crates for air and spacesuits. Visit the air station, then jump over to the first of a

series of platforms: jump left and right up them, swiping the air and spacesuits crates on each – to get the **Reward Silver Remote**.

Visit the air station at the top, then jump via two spinning platforms to another curved section – with faster energy beams to jump over. Drop off the other end to the rock. Grab the air and climb up the energy tower. Jump to the walkway at the top to kill the spider and smash the signs for more spacesuits.

Visit the air station, then get ready to jump across some rotating platforms. Wait for all four to rotate in unison and the first to stop, then jump quickly across them all. Visit the air station, then kill the alien and R2-D2. You can now reach the Red Remote to exit.

Below: Wait till all four platforms rotate, then jump onto the first as it stops.

Level 2: Fine Tooning

Goals: 2

Collectables

- 1st: 30 Carrots
- 2nd: 40 Cans
- 3rd: 50 Detonators

Goal 1: Climb The Tree

Follow the bottom path, collecting all the carrots – search the tree and swipe the two fish in the water. Head up the grass

Below: The ABC blocks can be moved by swiping the strength machines near them.

ramp and swipe the test-your-strength machine twice to move the ABC block. Then jump on the latter to collect more carrots (and another in the tree). There are more in the branches of the next tree – as indicated by the shadows on the ground. Watch out for falling objects past the finger sign as you grab the health fly. Continue round for more carrots.

Return to the area by the strength machine and jump to the ledge with the red mushroom. Swipe it for more carrots, then run and jump through the hedge arch, tail-swiping the dominoes. Kill the

bee for his carrots, then cans. After the yellow sign, watch out for the bowling balls coming down the steps. Jump up on the left and weave past the balls as you ascend the steps. When you reach the tree stump with left-arrow sign, head left for extra cans and a health fly. Then continue up the steps.

At the top, swipe the bee and grab the cans. Head forwards and drop to the floor by the block tower. Swipe the scorpion, then quickly hit all three strength machines to form a temporary stairway to the sticky wall and another can. Crawl round it back to the ledge, then jump to the first floating green platform, then to the next two when close enough. Wait for the block to disappear before jumping to the fourth platform. The next set of platforms disappear when they reach your corner, so jump along them quickly to reach the rock ledge.

Collect the cans and hit the checkpoint, then the scorpion for more cans. Jump up to the ledge to the right of the checkpoint for a couple more. Next jump up the two moving blocks to grab cans on the left ledge. The next bit's tricky: stand next to the Hard Hat Area sign, then run forward just as the block is about to disappear, to jump over the gap.

Swipe the strength machine, then drop into the water to kill the two fish. Jump up via the wooden platform to the right ledge for more cans, then the higher ledge on the left for yet more and a life fly. Return to the water and climb up the sticky wall on the far left. Now time your jumps over the three appearing blocks.

Before hitting the two strength machines, head over the purple block onto the right ledge for more cans and, past some falling objects, a health fly. Return to the strength machines and swipe them each repeatedly to get the blocks in position so that you can jump up to the girder. Run along the latter to collect your last can.

Run to the right, then left to jump to the next girder. Jump back to the top of the previous girder for the first detonator. Tilt the girder, as before, to jump left to the top of the second (for another detonator), then right to the inside of the third. Repeat this process to reach the middle of the fourth girder, then jump to the grass platform for more detonators. Jump back to the top of the last girder for another.

Above: After going through the comedy door, you emerge at the other end in a duck suit. This game is quackers!

Jump over to the mainland and grab the detonators from the water, killing the fish for more. Jump out to grab the health fly, then return to the area by the twisting blocks. Leap over them and run right past the flowers to swipe the strength machine. Time your jumps up the four moving blocks to grab the detonators on the left ledge.

Run through the door to emerge at the other end as a duck! Naturally, it's now duck season, so swipe the hunter and search the bushes for more detonators. Grab more from the water, killing the fish, and the **Reward Silver Remote** should be yours.

Jump up via the tree stump and kill the bee. Jump up past the traps to find a

Drop back down to the log and run past the traps to the water-filled stump. Jump right via the tree branches to the next stump, then up to the next branch for the Red Remote.

Goal 2: Storm The Castle

Follow the main route for Goal 1 until you reach the mainland after the girders. Go through the water to grab the health fly, then head right and swipe the strength machine by the boat sign. Now drop into the nearby hexagonal hole to be transported to the earlier one, to see the

boat freed from its purple case. Jump onto it and swipe the rudder to take a ride to the castle. Jump from the mast platform onto the left platform and swipe the strength machine to lower the drawbridge.

Before entering, head round the left ledge to find the Hidden Silver Remote at the back of the castle. Grab it, then go through the translucent crack in the wall to enter the courtyard. Gobble a fire fly, then swipe the rocket fuse to light it. Quickly tail-bounce up to stick onto the rocket to take a ride straight to the Red Remote.

Above: To stay atop this log, you need to run against the direction it's rolling.

rolling log. Jump onto it from the stump and run against its rolling to stay on top. Jump off on the far right to get the health fly, then jump to the mainland. Kill/avoid the hunter, then run through the hollow log. If you want some health, jump up onto the log, via the rock to reach the ledge with barrels. Kill the bee, then tail whip three of the left barrels, two of the middle ones, and one of the right, to form a stairway to the health fly.

Level 3: Pangaea 90210

Goals: 2

Collectables

1st: 30 Drumsticks
2nd: 40 Buffalo Skulls
3rd: 50 Dinos

Goal 1: Assault The Lava Island

Swipe the palm tree for some drumsticks, then jump over the lava flow. Swipe the bones on the left to reach the drumstick and health fly by the toilets. Head up the hill and swipe the egg creature. Jump to the left rock ledges to grab the drumsticks. Then jump over the lava and swipe the fireball-spitting flower. Proceed forwards to kill the mosquito – jump and swipe as it attacks.

Jump over the lava and jump onto the bouncy lily pad to grab the drumsticks above. Then go round the right ledge and jump the gap to get the others. Go and kill the egg and swipe the palm tree for goodies. Time your jumps across the platforms floating in the lava. Jump up and swipe the swooping pterodactyl. Now jump over the two sinking/rising platforms to get the health fly.

Jump via the high platform or lily pad to the ledge with the egg and swipe it. Ignore the platforms by the lava waterfall and jump over the lava to swipe the palms for more goodies. Swipe the pink dinosaur who charges down the hill, then jump up the platform on the left to get the fire fly.

Drop back down and run up the hill, dropping off the end to collect the goodies below. Jump back up the platforms to kill the fire-spitting plant. Jump onto the sticky grey path on the left to crawl up to the next ledge. Jump over the ramps, collecting more goodies, then swipe the pterodactyl on the other side. Swipe the palm tree on the right, then jump onto the nearby platform in the lava. Jump up the rest of the rock steps there to reach the Red Remote.

Goal 2: Climb The Volcano

Follow the Goal 1 route, collecting all the goodies and fire fly, until you reach the area near the exit. Kill the pterodactyl and

swipe the tree, then time your run past the flame on the left. Jump the gap and kill the pink dinosaur which charges down the slope. Head up there and jump over the two sinking/rising platforms. Now gobble the fire fly and use your firewall to run a ring round the triceratops to frazzle it.

Once it's dead, jump onto the left ledge and get the health fly from the end. Jump over to the ledge with the falling boulders and follow them down to land on the ledge with the **Hidden Silver Remote**. Now drop off the near side of the ledge to slide down back near the lily pad.

Follow the route again to reach the lava-fall. This time jump up the platforms by it, leaping to the left ledge at the top. Grab the skulls and smash the egg. Swipe the tree and collect the skulls, then dinos. Grab the fire fly, then climb up the sticky grey path by the tree and head right at the fork. Crawl past the lava-dripping holes, collecting the dinos.

Drop off onto the ledge and swat the mosquito, then jump past the flame. Swipe the pink dinosaur, then jump to the platform by the sticky wall. Crawl down either side of the latter to find a ledge with a life fly and more dinos. Crawl back up to the platform, then back over to the ledge. Continue round, swiping the fire-spitting plant. Jump across the platforms, swiping the pterodactyl en route.

Swipe the fire plant, then run up the hill, past the falling boulders. Smash the egg, then jump up the left platforms. Time your jumps across the four sinking/rising platforms, then swipe the fire plant. Smash through the bones and run past the falling boulders for a health fly. Jump up to the left ledges for dinos, avoiding more boulders. Continue round the next ledge for more – you should now get the **Reward Silver Remote**, but if not there are more goodies ahead. Run past the triceratops, collecting the dinos. Continue up and round, past more boulders, until you reach some flames and bones protecting the exit. Time your run past the flames and smash the bones to get the Red Remote.

Above: The quickest way to kill the triceratops is to run a firewall ring round it.

Above: You can jump up these ledges by the lava-fall to reach a high ledge on the left.

Resident Evil

Sorry to have kept you import owners waiting, but now the official release of Resident Evil 2 is nigh, we can finally unleash our epic walkthrough guide.

This month we get warmed up with Claire's first scenario and a whole load of secrets. Don't miss next issue's mapped conclusion!

CLaire redefined: mission 1

The girl from out of town would never have believed that a family visit would end in such mayhem, but that is the fate that befell her upon arriving in the rapidly decaying Raccoon City. Claire arrives on her trusty motorbike to pay a surprise visit to her brother, Chris, but she encounters a rather dismal welcoming reception, as you are about to find out.

SECTION 1: RACCOON STREETS

The Street

Claire begins in the war-torn streets of Raccoon City, where she encounters six zombie residents. However tempting it may be to open fire, you must resist and instead run past the zombie hordes and head straight for the back alley. Quick zigzagging will leave the zombies trailing, but be careful as you near the alley because there'll be another two zombies waiting just around the corner. Like before, it is best to avoid these and enter the gun shop.

Resident Evil 2

Kendo Gun Shop

Once inside the shop, you'll meet the first human survivor (but not for long). After a brief chat you'll be left free to roam the shop, searching for items. There are two cases of handgun ammo to collect: grab the box behind the counter that's facing you as you first enter the shop, then walk around to the other counter to grab the second. Once this box has been collected, the window will cave in under the might of the congregating zombie masses. Unfortunately the shop owner gets chewed to bits here, so get behind the first counter again and pick them off as they focus their attentions onto you. They take some killing – but you'll know when they are all totalled when the music changes from the dramatic score to a more light-hearted affair. When all is safe, grab the Bow Gun from the dead shopkeeper and leave via the back door.

The Gate Passage

When you exit the shop, you'll emerge into a dingy back alley. Dash around the corner and you'll encounter a closed basketball court with a selection of zombies frantically bashing on the gate. Run past and grab the handgun ammo from the back of the crashed van. Then the gate enclosing the zombies will be thrust open and they'll start spilling out into the alley. Pick them off with your handgun and then run onto, and across, the basketball court. An extra zombie inhabits this area, but he is easy to avoid.

Dumpster Alley

Once out of the door behind the basketball court, climb the metal staircase and dash along the walkway. Just below the next set of steps that lead downwards is a stash of ammo to the right: grab this and hop onto the dumpster. There is another group of zombies over the other side, so the aim is to get past unscathed whilst conserving ammo. The most effective way to do this is to shoot a couple of rounds into the female zombie in front of you, then when she drops to the ground, hop down and zigzag past the remaining group. Now exit via the back door and enter the streets once again. When you emerge, you'll hear a munching sound: this is a pack of ravenous zombies feasting on a poor unfortunate civilian. There's no need to hang around here – run straight past and climb aboard the bus to get away.

Raccoon City Bus #33

Once onto the crashed bus, grab the ammo on the left as you get on and then immediately move forward to gain a longer perspective. It is now that you'll notice a female zombie crawling along the ground in front of you. Unfortunately you can't avoid her so you'll just have to end her nightmare and empty a couple of rounds into her head. Straight afterwards you'll have to take out another standing zombie bloke before you can get off the bus.

Upon exiting the stationary bus, you'll once again take to the streets. This is a

particularly claustrophobic area because it is filled with zombies. There's no point in killing them all because there are far too many. Use the zigzag evasive tactics you should have mastered by now and dash past the lot of them. Your exit is a door at the back.

Police Station Courtyard

This is a very easy section to get through. There are two routes to take: you can either enter the park and avoid the two slow zombies, or you can walk to the end and take the underground walkway over to the other side. Either way, getting to the main police station doors shouldn't be a problem.

SECTION 2 RACCOON CITY PD

Rankings

After beating each scenario your performance will be rated by a grade from A to F. This is determined by both the time taken and the number of saves used. For a top ranking, try not to save more than ten times in each scenario. Your ranking is also affected by the use of the special infinite ammo weapons (see 'Cheats') – you won't get an A grade if using one.

Main Hall 1F

You are now inside the main bulk of the game. Inside the police station is where the main action takes place. Your first task is to walk forwards and enter the second door on the left (you won't be able to enter any other doors at this point). This is where you'll come across the second survivor – a young cop who is already stuck in undead limbo land, waiting for the inevitable grip of the evil to take control of his body. After a chat he'll give you the Blue Card Key and boot you out of the room. Take this key card to the main computer terminal in the entrance hall and use it to open the other two doors. There is a typewriter and ribbon next to the computer, so save if you want before moving on. Once all the doors have been unlocked, proceed to the first door on the left as you walk into the main police building.

Above: You're too late to save this cop from becoming a zombie, but he'll give you the Blue Card Key.

Left: Use the Blue Card Key at the main computer terminal to open the other two doors.

guide

continued

Waiting Room

You can now catch your breath as you encounter the calm before the storm. On your left as you enter this room is a trunk – to store any unwanted items. Our advice is to ditch the combat knife and ink ribbon. Also, in the far corner of the waiting room is a desk. Use your lock-pick to open this and grab the first-aid spray from inside. Once again, store this in the trunk. Finally, before you leave this room, walk over to the couch and pick up the note: this is the first of several snippets of information you'll obtain during the game, so file it for future reference.

West Wing Hallway

Brace yourself for the first spine-chilling moment of *Resident Evil 2*! Walk forwards to the decapitated guard and search him for handgun ammo, then equip the bow gun and proceed to the pool of dripping blood. When you crouch to examine it, the action will flick to an FMV sequence that introduces the first true terror of the game

Above: Don't get licked by the Licker! Use your bow gun to kill the tongued terror.

– the Licker! This thing will drop down from the ceiling and immediately start lashing you with its pronged tongue. Aim your gun low and fire off a few bolts. Thankfully the creature won't take many hits with the bow gun. Once this creature has been killed, walk forwards and pick up the green herb. Use it if you took any hits, or keep it and store it later in a trunk – hell, you're bound to need it later on!

Below: Once you've defeated the Licker, grab the green herb.

Briefing Room

Although you can't actually do anything here yet, we'll get the explanation out of the way. The objective is to find a lighter and bring it to this room. Once you do, walk out into the back room and use the lighter on the fireplace. When the flames are lit, a hole will appear in the painting hanging above. From this hole will drop a Red Jewel – two of which are needed for a future puzzle. There is also a note to pick up in this room, but precious little else.

West Stairwell

This is a tricky bit! When you leave the West Wing Hallway and emerge into this section, several zombies will be waiting either side of you. Take out the female on the right first, then move back into the space she occupied to get a clear shot at the incoming bloke zombies. When all have been vanquished, walk around the corner underneath the stairs and pick up the two green herbs before entering the Dark Room. Pick up the ink ribbon on the desk and then save the game if you wish. Now store the ribbon and the herbs in the trunk and acquire the ammo from one of the drawers. To the back of this save room is the Dark Room: it is here that you can take and develop any camera film you find along the way – but the pictures aren't particularly interesting.

Note: In the corner of the safe room is a special locker that cannot be opened without a Special Key – see the 'Secrets' section of this guide to find out how to get into it and, more importantly, what's inside it!

When you have done all there is to do in this room, leave via the door and climb up the wooden staircase.

Statue Hallway 2F

This is where you'll encounter the first puzzle of the game. The idea is to move the two conspicuous statues to their correct locations. When you begin, they are situated next to the main statue in the centre facing outwards. They must be pushed to the opposite metal plates on the ground. So the first statue you come to must be moved over to the far plate, and the far statue must be pushed over to the near plate. If you get stuck, there is a clue on the main statue, but this puzzle

shouldn't keep you distracted for very long. Once both statues have been positioned in the correct places, the main statue will drop the Red Jewel, enabling you to pick it up and add it to your inventory (it is probably best to store this in a trunk until later). When the jewel is in your care, leave the hallway via the back door.

STARS Office

Upon entering this next hallway, the only door to enter at this point is the office occupied by the STARS team, and what a lot of booty there is in here! First of all, go to the cupboard by the right of the door as you enter. Inside you'll find a Grenade Launcher – which will come in very handy!

Next up, walk over to the set of desks in the centre of the room: one will be Chris's desk, so pick up his diary that's on the top. This contains vital information as to his whereabouts. Under the diary is the Unicorn Medal: pick this up and keep it with you as you'll need it fairly soon. Before you leave the office, go to the poster at the far end and search for the ammo that is concealed behind it. Now, just as you go to leave, the fax machine will buzz into action and something will come through: pick it up and read before leaving.

Resident Evil 2

Main Hall 1F (continued)

Once you have the Unicorn Medal, track back along the way you just came and aim for the main hall. Please note that the zombie activity surrounding the police station has just notched up a gear on the frenzy scale, and this is evident when you track back through the passageway that leads off to the briefing room. Stay away from the boarded-up windows because zombies' hands will break through and try to grab you. Either run straight past or shoot them. Once back in the main hall, go to the fountain and use the Unicorn Medal. A short cut-scene will show the statue moving and a key drop out of the jug. Pick this up and you now have the Spade Key.

From this point you can either go and explore through the other door that was electronically unlocked by the computer, or progress beyond the STARS office. We found it to be quicker on the overall completion of the game to do the latter, so that is what we will advise here.

File Room

This is an area that was previously denied to you, but with the Spade Key you can now enter. This room is located off the hallway where you encountered the first Licker. Inside are rows of files and a couple of useful items. Walk behind the large shelf and push the small set of steps straight along to the end. Now climb up and pick up the Crank that is on top of the cupboard ahead. Also, near to this cupboard is a note hidden away that will provide future clues. Finally, before you leave the room, search the cupboard close to the entrance for another ink ribbon.

2F Lounge

Use the Spade Key to go through the door at the end of the passage after the STARS office and Claire's story will really begin to develop. The scene will flick to a small girl being pursued by a zombie. You'll meet her properly later, but for now kill the zombie and go through the door at the end. Inside the 2F Lounge, you'll meet Leon again for the first time. He'll natter a

the upper level. Ignore the door that leads off for now and proceed around to the other side. As you near the end, the floor will give way and you'll fall back down to the hidden area in the main library area. Walk forward and push the switch: this moves the first book shelf out of the way, thus allowing you back out. Now walk over to the first two book shelves nearest the door you entered and push the

bit before handing you a radio to keep in contact with. Now go straight on to the end of the narrow corridor and search the small janitor's locker for some ammo. Track back and go around the corner and you'll come to a small desk next to a door. Use your lock-pick on the desk to gain some Acid Rounds for your Grenade Launcher. Now go through the door.

The Library

The library is where Claire will have to solve her second puzzle. Climb the stairs to the side as you enter, then walk around

buttons on each – choosing to move them right each time. This will reveal the Serpent Stone under the painting in the hidden area you have just come from. So go and fetch it before you leave. There is also a red herb to pick up next to the other door in the main library area. Leave the library via this other door.

cheats

Alternate Uniforms:
Start the first scenario on the 'Normal' difficulty setting. Head for the police station, but without picking up any items. If you do this, the two zombies in the park outside the station will vanish, and a new one will appear below the steps outside. Does he look familiar? He should do because the new zombie is none other than Brad Vickers, the STARS pilot who airlifted Chris and Kill to safety at the end of the first game. Brad has now been transformed into a super-zombie who takes 20 hits to kill – so enter the station to grab some more ammo. Return and kill 'Brad', then search his body to find the Special Key. Take it to the save room next to the Dark Room and use it to open the locker containing alternate uniforms. There's a cowgirl one for Claire, featuring a rapid-firing six-shooter; and two for Leon, one of which enables him to shoot one-handed.

Infinite Ammo Weapons
Each infinite ammo weapon will appear in the next game after the first chest is opened, and is accessed by completing scenarios within time limits in the following order:
Rocket Launcher: Complete either Claire or Leon's first scenario in under 2.5 hours with an A or B ranking.
Gatling Gun: Complete either character's second scenario in under 2.5 hours with an A or B ranking.

Rebecca Chamber Picture
If you search the desk on the left side of the STARS office, you'll be told, "It's trashed, someone must have searched it." However, you can search it repeatedly (about 50 times) until a roll of film is found. Now take this to the Dark Room to see a picture of Rebecca in a basketball uniform – hey, what did you expect?

Main Hall 2F

Upon your exit from the library, you'll find yourself in this, the upper tier of the main entrance hall. There are four zombies to kill here, so be on your guard. Walk around to the far side, but on the way take time out to activate the emergency staircase situated halfway round – this will provide you with quick and easy access to the main entrance hall.

Save Room

The door you use to exit the main hall tier will lead you through to this room. Inside, you can store items such as the Crank and Serpent Stone for future use in the trunk, save your game if you need to, and pick up a few other items. Most important is the Lighter: grab this from the seat. There is also another ink ribbon on the desk, and the Receptionist's Diary.

2F Hallway

When you leave the save room, you'll enter into this corridor with smouldering zombies and helicopter wreckage. The flames make it too hazardous to approach

now, so without doing anything (not even killing the zombies because they'll disappear in a minute), turn right and go through the other door into the Crow Passage.

Crow Passage

This is a very eerie section of the game, as there is deadly silence, broken only by the sinister squawks of the hostile birds that populate this passage. Walk straight down to the end and unlock the door (this will provide you with another quick short cut). Now run around the corner, past the dead body, and make for the door at the far end. At this point, a pack of birds will smash through the window to attack: you can stay and kill them if you want, but it is much easier to just run for it.

Outside Area

You'll now be on the roof of the police station – you can't miss it, there's a burning chopper in the corner! Ignore this for now and head for the steps that lead downwards. There's a pack of zombies at the bottom, so dodge these and go through the next door that leads to the shed. Inside are several useful items including an ink ribbon, another Bow Gun and, most importantly, the Valve Handle.

Take these and head back the way you came. DON'T open the other door at the end because: (a) you won't be able to go through it anyway, and (b) it will lead two new zombies into the room. Dodge the outside zombies once again and the go back up the steps. Now use the Valve Handle in the passageway next to the burning helicopter on the roof. This will cause a surge of water to fall from the tank above, extinguishing the chopper flames. Before you re-enter Crow Passage, search the chopper for ammo.

Note: At this point, it is a good idea to use the emergency ladder in the Main Hall 2F to go back down to the Briefing Room. Now that you have the lighter, you should use it on the fireplace to obtain the second Red Jewel. Once you have both, go back to the hallway where the chopper wreckage is and enter the door that was previously denied to you by the flames.

Storage Room

With both Red Jewels to hand, use them at either side of the main statue to gain one half of the blue Jaguar Stone. Also, to the left of the main statue is the Diamond Key, so be sure to pick this up before leaving.

The Weapons Room 1

When you've got the Diamond Key, track back through this side of the police station and head down the stairs after the statue puzzle, to the Dark Room area. Now go around the corner and enter the door at the far end – this is the Weapons Room. It's quite a confined space and there are a lot of zombies to kill as you go in, so get a powerful weapon equipped – something like the Bow Gun would be good – and let rip as soon as they go for you. There are more around the corner so be prepared. Once the six zombies have been maimed, you can get round to some searching. Around the corner will be a quiver of bolts for your Bow Gun and a film (this should be taken to the Dark Room for development, if you can be bothered). Now go back around the corner and use your lock-pick on the cabinets just beyond the other door. Inside are the Plastic Explosives – a vital item. Once you're done, leave via the second door.

West Office

Remember that nice police officer that you met first upon arriving at the station? Well this is the office he occupied. All is quiet at the moment... too quiet!

Go straight ahead into the small office and there he'll be. After turning into a zombie before your very eyes, he'll need killing. Inside the same office is the Detonator needed in conjunction with the Plastic Explosive later on, so be sure to

grab it. Search the rest of the main office for a green herb, a note to Leon, and some ammo in the locker where the cop was originally situated. Now unlock the main door and go back out into the main hall.

Above: Get armed up for the zombies in the East Wing.

The East Wing

From the main hall, go through the second door that was electronically unlocked by the computer and get ready for action. There are a lot of zombies inside, so arm yourself with something substantial. If you get hurt, there are a couple of green herbs to heal you further on in the corridor. Go through the blue doors when all of the zombies are dead.

East Office

There are more zombies to kill in here, but your pistol will be adequate to cope with them. Proceed to the small office at the far end and stand in front of the safe in the corner. Enter the code '2-2-3-6' to unlock it – inside will be some acid rounds for your Grenade Launcher and a map of the floor. Go back out and search the small desk near the blue door for an

ink ribbon. Now go out the open door at the back of the office and search the dead cop for some ammo. Go back out of the blue doors, then head right and around the corner to the next door.

East Wing Corridor

There are more zombies to kill in here, so get your pistol at the ready. Proceed down the narrow corridor and use the Diamond Key to enter the door straight ahead.

The Interrogation Room

Grab the Cord from the table and walk to the shelves in the corner. On one of the shelves will be the Eagle Stone – grab it and get a heavy weapon ready. When you

turn around, a Licker will smash through the two-way mirror and attack, so blow it away as quickly as possible. Now go into the next room along and grab the ammo. When back in the East Wing Corridor, you may wish to pick up the red herb. You won't be able to enter the green doors yet, so leave the area at once.

Chief Of Police's Office

You now need to go back to the 2F Hallway where the burning helicopter poking through the wall was. The best route is to track back the way you came and cut through the West Office. Go through the open door at the back and step over the dead cop before exiting through the door on the right. Go up the steps and through the door at the top.

You'll now be back in Crow Passage, so dash straight forward and go through the door at the end.

Note: Make sure that you have both the Detonator and the Plastic Explosive handy. There two need combining via the inventory. This can be done sooner to conserve item space if you prefer. If you haven't got them with you, go to the save room that leads off of the hallway and fetch them.

Right, once you've got the bomb sorted, use it next to the helicopter wreckage poking through the wall and you'll automatically dash around the corner to avoid the explosion (please note that you may have to move around a bit to find the exact spot needed to use the bomb, so don't give up!). Now go through the new hole in the wall and run straight down the corridor into the room at the end. This is the office of Irons, the police chief. Walk over the corpse on the desk and Irons will introduce himself and explain why he looks dodgy sat next to a female dead body. When the chief has finished talking, go through the other door.

Resident Evil 2

SECTION 3: THE BASEMENT

Taxidermy Room

You'll now find yourself in another corridor with a huge stuffed tiger. There's nothing to do here so follow the passage around and go through the next door. This is the chief's taxidermy room (very sinister), and upon entering, you'll be alerted by some strange noises. Go into the next room that is in darkness and turn on the switch next to the door. The lights will now go on and you'll finally meet the little girl who you saved earlier – Sherry Birkin. Once you've gained her trust, go back to the Chief's Office. Irons will have now departed, but not before leaving the Heart Key and his diary on his desk. So go and get them before exiting the office completely.

Northeast Hallway

With the Heart Key now safely in possession, go back through Crow Passage and straight out of the door that leads to the outside steps. Go down and through the door to be back in the West Office area. Step over the dead cop and go straight down to the door at the end – the Heart Key will now get you through it. There is a green herb to pick up by the door, but other than that there is very little else in this area at present. If you have the Cord handy, use it on the circuit box on the wall at the end next to the shattered windows. This will cause metal shutters to close over the windows, thus preventing any zombies from entering. Now go down the stone staircase into the basement area.

Basement Hallway

This area is populated by savage dogs, so walk (don't run) forward until the first pooch traipses up to you for a sniff. Arm yourself with your Bow Gun and take Rover out at close range. Now things get trickier. Walk forwards until you get to a crossroads in the corridor – there'll be a dog on either side to kill, so plan your attack accordingly.

Outside Area

When the dogs are dead, take a left and walk upwards (away from the screen as opposed to towards it) and go through the double doors around the next corner.

There are more dogs to defeat in here, and they'll jump down when you walk around the next corner. However, rather than stopping to kill them, it is far safer to run straight forwards and pop down the open manhole.

The Lower Sanctums

Once down the manhole, a save room will be just ahead on the left: it is important to go in, even if you don't save, otherwise you won't meet Sherry on the way out.

Once you leave the room you'll meet Sherry again, and take temporary control as she progresses ahead without you.

Sherry's Mission 1

Armed with only a first-aid spray, Sherry must now battle on ahead to try and find a new way out. When she squeezes through the hole in the wall, go up on the elevator and get ready for some serious dodging. At the top, there are two vicious dogs to outrun. The idea is to leave the room with the elevator and turn right and run to the next door. Inside is a puzzle to solve.

When in this new room, walk past the control deck and climb down the large steps. At the bottom is a series of three crates: you must arrange them in a straight line against the far wall, so with a bit of push and shove here and there this shouldn't prove too difficult. When this is done, go back up and hit the switch on the control deck to fill the crates pit with water. You'll now have a handy crates bridge to get across to the set of shelves on the other side of the room. Here you'll find the Club Key, so grab it and get out of the room.

Above: Rearrange the crates in a line by the far wall.

You can either be a coward and get back down that lift now, or you can assist Claire further and get her some extra Grenade rounds. These can be found by turning right when you leave the water room and heading straight down to the door in the far corner. When you're got everything, head back to the elevator and go back to give Claire her items. Unfortunately you won't be able to join Claire again right now, but Sherry will lob the items through the hole and Claire can carry on alone for the time being.

Above: Go back up and hit the switch to flood the crates pit to create a floating bridge.

The Power Room

Proceed back to the Basement Hallway (where you met the original dogs) and go through the first set of double doors you come to on the left (this passageway is now populated with Lickers, so beware). This is the Power Room. Inside is a green herb and a basement map, but the main goal in here is to restore power to the Weapons Room down the corridor. Walk up to the generator in the corner and take a closer look. You now have to flick the appropriate switches to restore power without overloading the system, and for this you have to keep the arrow below 100. It is much easier than it sounds, simply choose: On, On, Off, Off, On.

secrets

Secret Missions

The 4th Survivor
Complete Claire or Leon's second scenario in under 3 hours with an A ranking. If you do, a screen with Hunk is followed by the option to create a Hunk save file. Save and you will be able to load Hunk's game from either disc. You then get to play as him, and must reach the second floor of the police station from the sewer with just battles and no puzzles.

Tofu

No, this is not a joke – you really can play as a piece of tofu! When you do, you must reach the second floor of the police station from the sewer, armed only with a knife! It's a hard slog to get this extra character, though. First, you have to complete either character's first and second scenarios in under 3 hours. Now play the game again with the other character and also complete their first and second scenarios in under 3 hours. You then have to play the game a third time, completing either character's first and second missions in under 3 hours.

Note: The game must be saved less than 12 times during each of the six scenarios played and Unlimited Weapons must not be used. You must start from the newly created Leon or Claire save file each time through. In addition, the Hunk save file (see 'The 4th Survivor') must exist on your memory card BEFORE playing the game through for the third time.

Below: Beat the Licker in the Press Room, then use your Lighter on furnace and torches.

The Morgue

Leave the Power Room and proceed past the passage that leads back upstairs, and through the double doors on the right. This is the spooky morgue. Ignore all the bodies for now and walk over to the corner to acquire the Red Key Card. This is where things get really hairy! The bodies will now come alive and start approaching you, so arm yourself heavily and let rip.

The Weapons Room 2

Leave the morgue and proceed along to the next door on the right. Use the Red Key Card on the swipe lock next to the door and then go inside. There's more ammo inside for both your pistol and Bow Gun. Also, in the locker at the far end is a Sidepack and Machine Gun. The Sidepack allows you to carry two more items in your inventory, so it is best to take this now because of all those grenade rounds. However, you now have the choice of whether or not you'll take the Machine Gun now, or leave it for Leon in the Second Scenario – we say leave it! Now leave the room and go back upstairs.

Watchman's Room

Now that you have the Club Key, you'll be able to enter the room to the right at the top of the stairs – beware, this passage is now populated by dogs! Once inside the room, grab the Acid rounds and check out the Watchman's diary.

The Press Room

Leave the Northeast Hallway and proceed back through the West Office. Go through the blue doors at the end and turn right – the idea is to head back to the area where the Interrogation room is and go through the green doors at the end to enter the Press Room (make sure you are

carrying the Lighter at this point!).

When you enter the room, there is a single Licker inside, so it is best to arm yourself with some Acid rounds beforehand. Walk over behind the press desk at the back of the room and use your Lighter on the furnace in the corner. Now you must activate the three torches on the wall in the following order: Queen, King Jack – or rather 12, 13, 11. Once this has been done, the Gold Cog will drop out of the picture at the other end of the room. Go and pick it up, and grab the Camera Film from the desk nearby while you're at it. Now leave.

Note: At this point, make sure that you have both the Gold Cog and the Crank.

The Clock Tower

Proceed back upstairs to the Library (use the emergency ladder in the main hall – watch out, there'll be a Licker here now!) and go up the steps. Go out through the door on this higher level and back out into a second main hall tier. Walk along and go through the next door, and into the Clock Tower Area. Use the Crank on the

socket on the right to lower a hidden staircase. Go up and then insert the Gold Cog into the gap amongst the clockwork mechanics. Now press the button and a secret compartment in the wall will open, which contains the second half of the Jaguar Stone. Now leave this room, collect the other stones, combine the two pieces of the Jaguar Stone, and take them all to the Chief's Office.

Chief Of Police's Office (continued)

Upon arriving in Irons's office once more, you'll meet Sherry again. Place the stones into the plaque on the wall and a secret passage will open. Leave Sherry there for now and proceed ahead. Grab the note on the floor and go down on the elevator.

Lower Taxidermy Room

This is where you'll meet Irons again. He'll talk for a while before coming over all strange. Watch in amusement/horror as a devilish weevil bursts out from within his stomach and splatters his treacherous innards across the room. Now pick up the Acid rounds and go down the ladder.

Boss #1

Remember that weevil that burst out of the Chief? Well it's back! Having dropped down a level, it will grow and mutate into a huge, vile hideous beast and start crawling towards you. It will stop every now and again to spew out more weevils. If you have either the Machine Gun or the Grenade Launcher, then this thing will be a pushover to kill: simply shoot it continuously as it crawls towards you, adjusting your aim every now and again to take out the weevils that scurry up to you. When it is dead, it will shrivel into a pulp and disappear. Dead easy.

When the boss has been defeated, track back and grab Sherry and continue back down to this area. Now walk around the corner to the ladder and climb up.

Sherry's Mission 2

Shortly after you progress, Sherry will fall down a water drain and you'll have to take control of her again. With Sherry, proceed down to the lower storage room. There won't be much to do in here other than avoid a foul puking zombie. Dash around the corner behind the shelves and escape through the vent in the wall.

You'll now find yourself in a large, dank tunnel: the idea is to run to the end and get out. However, this is complicated by the swarm of nasty insects that take a fancy to you. Individually, they don't prove much of a problem, but if more than four latch onto you it could be curtains. The best tactic is just to run for your life. Once out the other side, grab the Wolf Medal from the trash compactor and the action will switch back to Claire.

Control Room South

The path now is very linear. Head for the control room and pick up the two blue herbs on the way. This room contains ammo, a first-aid spray, and an opportunity to save. The ammo is concealed in a bag on the table, so look hard and pick up the note just beside it. Go through the locked door to the right of the elevator and you'll be able to visit the room that Sherry was just in. Inside here are some Grenade rounds and some bolts for your Bow Gun. Now go back up the ladder.

Before you leave the control room, make sure you are carrying the Valve Handle and some heavy-duty weaponry. Now leave.

Above: Annette Birkin confronts Claire in the Waste Pool area.

Waste Pool

This is as low as it gets! A manky sewer infested with huge spiders. These can prove a problem as they attack from above and can poison you in an instant. There are four to kill in this area so be on your guard.

When you first enter this area, go left and into the next alcove along: search the two dead bodies there for Flame rounds. Now proceed back up the passage, turn left, and go through the gate. After killing the next two spiders, walk along and turn left into the next alcove to exit.

If you were poisoned before, there is a pot of eternal blue herbs here – you can use them but not take them. Now walk around and use your Valve Handle on the socket on the wall to lower the bridge over the toxic waste. Once across, use your Valve Handle against on the other socket and pick up the herbs and Flame rounds. Leave through the next door.

Below: Claire uses the Valve Handle to lower the footbridge.

**Boss #2**

You'll now find yourself in a long passage. Proceed along and around the corner, pausing along the way to examine the yellow light on the left wall, which tells you that the oxygen canister is released in the case of an emergency (well there is about to be one!). Keep going along until you come to the trash compactor entrance at the end. You'll now see Sherry in the distance, but before you can make contact, a huge crocodile will leap out of the trash and attack you.

Run back down the passage and it will start chasing you. When you come to the oxygen tank, examine it again to make the canister fall to the floor and wait until the croc walks up to it. In a scene straight out of *Jaws*, the croc will grab the canister in its mouth, and continue the chase. Now this is the clever bit: fire off a shot at the croc and you'll hit the canister in its gob, blowing its head clean off!

Now go back to the trash compactor, use the panel on the wall to open the emergency door that has now been sealed, and rescue poor Sherry (note the weevil scurry off as you approach – yes, she is now infected!). Trudge through the trash and ascend the ladder on the

Higher Trash Compactor

Once in this area, walk over to the control area and search the corpse for the Eagle Medal, and check out the nearby note. Now walk over to the control box below the giant fan in the corner and open the secret passage back to the waste sewers. Once back in the waste pool area, use both the Eagle and the Wolf Medal on the control box next to the waterfall, and a doorway out of there will be revealed (if you take the secret route back here, some zombies will rise out of the water; whereas if you tracked back through the croc passage, this won't be a problem).

Tram Station

You'll now be in a rickety walkway. Proceed down to the door and enter the main Tram Station. Straight ahead is a storage shelf, and if you took out the crocodile using the hard method there'll be some handgun ammo and Flame rounds here (if you used the one-hit method then there'll be nothing!). Go to the right of the tram and press the button on the control panel before walking around the other side and boarding.

SECTION 3: THE LABORATORY**Disused Factory**

When you arrive at your new destination, take note of the flare cannon to the left. If you have your lighter handy, you'll be able to activate it. It doesn't really do much other than illuminate the tunnel and show the location of the hidden W Box Key on the ground nearby (if you don't have your lighter, simply search around the wall and you'll find it!). Now proceed through the next door.

This next set of walkways will be heavily

other side, but not before picking up the Wolf Medal.

Note: There is a harder method of killing the crocodile, and that is to constantly shoot it as it follows you up the passage, and then wait until the perspective changes for the last time (when you're right up against the door through which you entered the passage) before unloading the final, fatal shot.

populated by zombies, so get your pistol to hand and pick them off. If you turn left out of the first passage and then proceed round the corner, you'll find a corpse: search it for the Spark Shot, a new special weapon. Now proceed to the door in the far passage.

There's another batch of zombies to take out here. If you turn right out of the first passage, there will be a couple of green herbs to collect; otherwise turn left and climb the ladder.

You'll now be in a safe room. Grab all of the items including various Grenade rounds and a first-aid spray. Save if you want and then leave.

Elevator Platform

When you enter, turn left and search the barrels at the end for some ammo. Now walk over to the large vehicle and enter it. In here you'll find some Flame rounds and the Control Panel Key needed to operate the platform. Take this to the panel just outside the vehicle and prepare to go down.

Note: You may wish to save your game before you operate the vehicle, and stock up with some heavy-duty weaponry like your Grenade Launcher.

Boss #3

You'll have already met Annette Birkin by now (that's Sherry's mom!). Well prepare to meet her infected hubby, William. As the platform descends into the Lab area, William will make his presence known and you'll have to face him, or rather a terrible mutation of him.

Like the other bosses, straightforward blasting is needed, but watch out because he will swing his vast, clawed hand at you. Make sure you don't get cornered as it is very hard to break free – the best tactic is just to run around and shoot him whenever you're in space.

When he is nearly dead, the creature will briefly raise his arms and start moving slower. Wait until his arms are lowered before you fire that crucial last shot (otherwise it won't register and you'll have wasted another shot!). When he has taken a significant number of hits, he'll jump off the platform.

Once the boss has been dealt with, the lift will stop at the bottom and Claire will automatically take Sherry to the Security room.

Resident Evil 2

Security Room

After a spot of bonding with Sherry, you'll be able to pick up several useful items including Acid and Flame rounds plus an ink ribbon and green herb. Now leave the room, turn right, and proceed through the door at the end.

Cold Room

You will now be in the main lab complex. Walk to the centre of the shaft and go down the blue walkway on the left, through the door, and take another left. Just around the corner will be a door to the Cold room. Inside, pick up the Fuse Case from the shelf and take it to the machine opposite. Use it and a sequence will show the machine insert a Fuse into the Fuse Case. Take the Main Fuse and leave the room. Now return to the centre of the main shaft and use the Fuse on the machine in the middle – this will restore power to the rest of the lab.

Sleeping Quarters

Take the red walkway from the main shaft and go through the door. Take a right and go through the door at the very end into the sleeping quarters. Inside this room you'll find more Bow Gun bolts, two notes, and some eternal blue herbs. In this room is a computer that allows you to turn on the BOW gas – do this and then shoot a Flame round at the plant in the corner. When it shrivels, climb into the chute.

Inside this next room are two Lickers: if you have activated the gas, they can be killed easily using normal Grenade rounds. In this room you'll also find two cases of Grenade rounds and an ink ribbon. Collect these and exit through the main door.

West Stairway

Once you have left the sleeping quarters, proceed to the metal shutter at the end and open it via the red button on the wall. Watch out now because there'll be two plants on the other side. Use Flame rounds to kill them. If they spray you, return to the sleeping quarters and use the eternal blue herb. When they are frazzled, go through the next door and onto the metal stairway platform. There's another plant to kill here, but it is so slow to turn round that you can exit down the ladder before it notices you.

B4 Hallway

Go through the door at the bottom of the stairs and get ready to meet some seriously aggressive Lickers. These are far fiercer than

before, and take more killing. Continue down the passageway (ignore the computer and large door because you can't use them yet). Go through the door at the end into the main control room.

Control Room

Walk around the wall of monitors and grab the map from the terminal. You'll be able to save your game and store stuff in the chest if need be. Now exit through the door at the other side (if you picked up the W Box Key, take it with you).

Dr Birkin's Lab

Proceed down the narrow passage and take a left to go through the next door. You'll now be in William Birkin's Lab. Use the W Box Key on the lockers to the left as you enter, to find some Grenade rounds. Now go through the next door and kill the naked zombies. There'll be another pack of zombies to kill in the actual lab, so get armed. Once inside the main lab, grab the Lab Key Card from the table and go back out.

Network Administrator's Room

When you fully exit the lab, go straight ahead to the room with the sinister-looking eggs outside and use the Lab Key Card to get in. Inside you'll face a giant moth – don't worry though, because it looks worse than it is. Use any heavy weaponry to kill it off and then go to the computer in the corner. Use whatever weapons you wish to clear the weevils out of the way and then use the computer –

enter your name as 'GUEST' without a password and register your handprint (you'll find out why later!). Now leave and go back upstairs the way you came.

G-Capsule Room

Once upstairs, go back to the main shaft and take the blue walkway. Now instead of going to the cold room, take a right and go through the next door. Having registered your handprint, you'll be able to enter the first part of a two-way lock. By submitting your handprint on the terminal, you'll allow Leon to do the same in the 2nd mission and get inside.

VAM Room

You need to create a vaccine to cure Sherry, and this is the first stepping stone to getting it. Use the Lab Key Card to enter the room

between the cold room and the G-Capsule room and get ready for action. Inside will be a bunch of zombies that need killing. That done, hit the red switch on the wall straight ahead as you enter the room and pick up the Vaccine Case from the bed. Take this to the VAM machine terminal in the centre of the room and use it. Grab the MO Disk from the bed around the corner and collect the Base Vaccine from the machine on the wall nearby. Now leave.

Dr Birkin's Lab

With the Base Vaccine in hand, proceed back down to the lab. Be careful though, because naked zombies now litter the hallway. Once back in the lab, take the Base Vaccine to the blue vaccine machine near the rear of the lab and use it. The machine will now automatically prepare the Vaccine for you, so sit back and watch until the process is complete. Now leave the lab and proceed back to the B4 Hallway. Stop at the save point and save, making sure you have the Vaccine, the MO Disk, and the best weaponry you've got. Then use the MO Disk on the computer next to the large sealed door and go through.

Above: Use the VAM machine to mix the base vaccine which you should take down to the lab.

Above: In Dr Birkin's lab you can use the machine to create the blue vaccine.

Game Over?

Now you can sit back and watch the game over sequence. Don't get too excited though, it isn't the good game over – that only comes when you complete the second scenario. We'll have a full walkthrough for this and Leon's missions next month, plus exclusive maps, so don't miss it!

Final Boss

This is Claire's final confrontation in mission one, and they've saved the best till last! Once in the elevator room, walk straight down the middle and push the button on the wall next to the elevator at the end. Now the last boss will come crashing down from above. In the first form, this boss is slow to move and can be fought at distance. Use Flame rounds if you have them and it will fall after five shots have been unloaded. It's not over yet though – the beast will now transform into a hideous four-legged hound of hell and start jumping all over the place in a bid to catch you off-guard and pounce. Use the same tactics as before: keeping running (don't get cornered) and throw everything you've got at it. Eventually it will drop, leaving you free to enter the lift and get the hell out of there.

THESE HAVE MADE US WHAT LARGEST MAIL ORDER SUPP

BUYING FROM GAMEPLAY IS BUYING WITH CONFIDENCE!

As you look through this magazine you will undoubtedly notice adverts for other mail order companies. So what makes us different to any of them? Well, how about this.....

PRICE !!

You should find Gameplay to be the cheapest supplier of Playstation games in the country. However, we can't look everywhere at once, so if you do find a better price, please ring us and we will do our best to beat or at least match it. On top of this, we offer a **FREE** 1st Class delivery service and we don't charge for membership if you are buying by mail order so there are no "Hidden Charges". The price you see is the price you pay!

CHOICE !!

Just take a look at this advert! 4 pages crammed with games and equipment! We try to stock every game available and if it's not in stock when you ring we should be able to get it for you fast. Also, with plenty of 2nd hand games available as well as new there should always be something that you're looking for.

QUALITY !!

We only sell official UK products and all items are fully guaranteed whether new or 2nd hand. Any product that becomes faulty within its warranty period will be replaced hassle free, quickly and efficiently.

SERVICE !!

Delivery time is normally within 2 working days and our packaging has been specially designed to ensure that your products arrive in perfect condition (we do not use Jiffy Bags!). Also whatever your needs we can help you make the right choice.

Our salesmen are all enthusiasts and do not make commission, so they can give you completely impartial advice.

Remember, if you don't like it you don't have to keep it so we make sure we tell you the truth!

STEERING WHEELS

So you've got a Playstation. You've got a driving game. But are you getting that wheel-spinning, powersliding, rubber-burning engine-screaming driving sensation??? NO? A joystick may be a masterpiece of ergonomic design, but when it comes to fishtailing your mean machine through a hairpin at 160mph it just doesn't cut it. There's only one thing guaranteed to give you ultimate control of your vehicle and make the hair on the back of your neck stand up and that's a decent steering wheel. You'll master those tracks. You'll tame those cars. You'll leave the competition standing. You'll shatter those records. You will have **ULTIMATE CONTROL!**

Diablo

The forces of hell have laid claim to your world. All around you the lands are dying and brother is turned against brother in bloody battles. You and you alone have the chance to stem the tide of darkness by destroying Diablo in his lair.

WHERE DEVILS DARE

Only three humans have the courage to confront Diablo in his lair. You must choose one of these to take on your quest.

The Warrior

If you like your battles at close quarters and exceptionally bloody, choose the warrior. His powerful sword arm and his mighty strength can sweep the mightiest of hell's warriors before him. Take care to avoid being surrounded and cut down – even the strongest of warriors die when they are attacked from all sides.

The Rogue

This foxy lady is the best choice for the beginner as her skill with the bow allows her to transfix her opponents without them coming near enough to do her harm. She is also highly skilled in the magical arts and has enough mana to hold her own against the devilish adversaries you will face.

The Sorcerer

At the start of your quest, this spellcaster isn't much cop against the horrors of the underworld and is exceptionally prone to being cut down at close range. If you manage to keep him alive long enough, however, his power will increase substantially, enabling you to attack with devastating magic.

BATTLE TACTICS

To live long enough to give Mr Diablo a sound kicking, you will have to develop sound attacking and defensive tactics to deal with the many minions of evil that infest the monastery. To help you win your battles against the forces of darkness, we've come up with some devilishly sneaky strategies.

Door To Door

One of the best tactics to use if you are a warrior is to retreat to a doorway when you are attacked by hordes of foes. This will prevent them from surrounding you and each getting a strike at your unprotected flesh, enabling you to beat them down one at a time.

Sharp Shooting

Select a missile weapon when you catch sight of monsters on the other side of some bars, as you can shoot through them and take out the creatures behind without letting them near you.

Magic Moments

Some of the creatures you fight will be resistant to magic. They usually have about 75% resistance to the magic stated. This means that they will only suffer a quarter of the damage delivered by the relevant spells, so be wary of wasting your mana on these targets.

Tool Up

Check out your inventory when you pick something up to ensure that you are always using the best items available. Also, when you pick up a spell book, read it as soon as you can to clear space in your inventory.

Doors Of Perception

If your character starts to run out of health or mana potions or is generally being pummelled by the forces of darkness, get the poor dude to use a portal scroll and get them back to town, as this allows you to heal your wounds and replenish your weapons.

UNDEAD

Some of the first monsters you encounter as you begin your quest will be undead. These poor unfortunates have been resurrected by the foulest of

magics and prove a hardy obstacle to your adventurer.

WEAPONS

The weapons that you begin the game with are okay for dealing with the first few levels of the game but as you descend lower into the catacombs you will find the denizens of the underworld resistant to your strikes. Against the right adversaries your weapons can prove potent; against the wrong ones fatal.

Weapon	Durability	Requirement	Hands Needed	Damage
Axe	32	22 Strength	Two	4-12
Bastard Sword	60	50 Strength	One	6-15

MISSILE WEAPONS

The best way to deal with the minions of Diablo without getting hurt is to kill them from distance. Utilising a bow is a good way to clear areas of massed enemies, but you should switch to using a hand weapon if the enemy closes in.

Weapon	Durability	Requirement	Hands	Damage

ARMOUR

Even with the immense weapons at your disposal, the forces of darkness can sometimes get lucky and strike your hero. When this happens it is always handy to have something to take the blow rather than your naked flesh.

Head Protection

Head protection has two advantages: it is light, allowing it to be worn by low level or low strength characters, and you are able to use a two-handed weapon unimpeded.

Type	Durability	Strength Required
Cap	10	None
Crown	40	None
Full Helm	35	35
Great Helm	60	50
Helm	30	25
Skull Cap	15	None

Doors Of Battle

Shields are useful for fending off repeated attacks from hand weapons and projectiles. The downside to the immense protection they provide is that you cannot use a bow or other two-handed weapon while you are holding it.

Type	Durability	Strength Required
Buckler	10	None
Gothic Shield	80	60
Kite Shield	40	50
Large Shield	32	40
Small Shield	20	18

Body Armour

Even with both hands filled with death-dealing weapons, the body armour can still protect you. However, you need to be strong indeed to wear most of it successfully.

SPELL LIST

At the start of the game, the magic readily available to your heroes is very poor, but as you progress through the catacombs you will discover more potent spells concealed about the underworld. You'll also be able to buy some of the more obscure spells from the village.

Heal Other

Cost: 1,000gp
This spell allows you to restore the

hit points of a companion. Therefore you should only buy it if you are playing a two-player game or have money to burn.

Healing

Cost: 1,000gp
Restores your own hit points.

This is an essential spell to have if you are a wizard, as your low constitution will often leave you near death after an attack.

Holy Bolt

Cost: 1,000gp
The holy bolt only affects undead so

don't waste it on creatures that are still alive. The plus side to this weapon is that you cannot harm another player if you inadvertently strike them with it.

Firebolt

Cost: 1,000gp
This delivers a weak projectile

attack at a target creature. The bolt doesn't do much damage, but then again it doesn't cost much mana to use.

Charged Bolt

Cost: 3,000gp
When cast, this spell propels

three energy bolts in the direction the wizard is facing. These bolts then go in any direction they please, causing light damage. For maximum effect, use it when you are surrounded.

Inferno

Cost: 3,000gp
Short range and high damage, the

inferno burns a path through enemies straight in front of the caster. This is particularly useful if you are trapped in a corner by a large beastie.

Town Portal

Cost: 5,000gp
This spell creates a portal that takes

you back to town when you walk through it. Use it when you need to leave in a hurry or are running low on weapons and supplies. The portal remains in town until you walk back through it to return to the catacombs.

Flash

Cost: 5,000gp
No this spell doesn't let your character expose themselves to the creatures, but it does

send out a burst of power around you that damages all it touches. Wait until the creatures of the damned get close, then let it rip for a good body count.

Lightning

Cost: 5,000gp

This is basically an electrical version of the firebolt that you should use in its stead to destroy creatures that have a resistance to fire.

Phase

Cost: 8,000gp

If you get swamped by creatures, cast this spell to get clear of their massed attack. It makes them phase in and out of existence, allowing you to make your escape through their insubstantial forms.

Fireball

Cost: 8,000gp

This spell is more damaging and costly than the firebolt, but against the harder creatures it pays to have a few of them up your sleeve.

Fire Wall

Cost: 10,000gp

Yep, you guessed it, the firewall spell produces a wall of fire in front of the caster that causes massive damage to anything it touches. Use this spell to trap your opponents and burn them alive 'Colonel Sanders style.

Flame Wave

Cost: 10,000gp

This a deadly version of the Mexican wave that sends out a line of fire from the caster that immolates all non-fire-resistant targets caught in its path. No tapas bar required.

Golem

Cost: 10,000gp

This spell creates a golem for you to control instead of your character. You can move him by facing the way you want him to go and attack all that get in his way.

Telekinesis

Cost: 10,000gp

Cast this spell to do a 'Carrie' and move objects and creatures about with the power of your mind. You can use it to set off traps and move creatures away from you and into each other for maximum confusion.

Bone Spirit

Cost: 10,500gp

An ethereal apparition appears when this is cast and it runs towards a target creature causing massive damage - which is nice.

Stone Curse

Cost: 12,000gp

This turns the target creature to

Mana Shield

Cost: 13,000gp

When this spell has been cast, each time you are hit in combat your hit points will not be deducted. Instead, all the damage your enemy inflicts will be taken from your current mana score. When your mana is reduced to zero, the spell will be deactivated, so keep downing those mana potions!

Guardian

Cost: 14,000gp

A three-headed hydra will appear when this is cast and will defend the caster with its flaming attacks until it is destroyed. This is particularly useful when facing boss characters as it helps take the heat off you.

Elemental

Cost: 15,000gp

This spell summons a fiery elemental that runs at a target creature and engulfs them in flame for a short period of time.

Teleport

Cost: 15,000gp

When you cast the teleport spell, you can transport your character to the safety of another room or through impassable walls to hidden areas.

Chain Lightning

Cost: 20,000gp

Blasts surrounding enemy with loads of lightning bolts that wracks them with lethal energy. This spell is best saved for the boss characters due to its high cost.

Nova

Cost: Spell Book Only

This creates a circle of devastating power that blasts anything near the caster with its holy power. Use this spell when you are surrounded by a multitude of monsters to obliterate them utterly.

SHRINES

On your way through the catacombs you will discover many places of worship that have survived the ravages of demons. When you pray at a shrine, you get a cryptic message followed by a magical effect.

Handy Shrine

Message: "The hands of men may be guided by fate."
Effect: Adds two to your dexterity attribute.

Obliteration Shrine

Message: "Arcane magic brings destruction."
Effect: Casts a nova spell.

Mighty Shrine

Message: "Strength is bolstered by heavenly faith."
Effect: Adds two to your strength attribute.

Healing Shrine

Message: "Drink and be

refreshed."
Effect: Produces a full health or mana potion.

Message: "Magic is not always what it seems to be."
Effect: Randomly reduces the level of one spell and increases the level of all others.

Energy Shrine

Message: "Intensity at the cost of wisdom."
Effect: Mana is reduced and the strength of a holy bolt is increased by two.

Discovery Shrine

Message: "Mysteries are revealed in the light of reason."
Effect: All unidentified items are identified.

Cowards Shrine

Message: "Those who defend seldom attack."
Effect: Adds two to the armour class of all armour being worn, but the currently selected weapon loses one damage.

Cowboy Shrine

Message: "New strength is forged through destruction."
Effect: One item loses ten durability and all others gain ten.

Teleport Shrine

Message: "Wherever you go there you are."
Effect: Teleports you to random location.

Rush Shrine

Message: "A surge of blood interrupts your thoughts."
Effect: Your mana decreases by a quarter and your health increases by the same amount.

Madman Shrine

Message: "Some are weakened as others go strong."

Effect: Randomly increases and decreases all attributes.

Daylight Robbery Shrine

Message: "Your skills increase at a price."
Effect: Lose all gold.

Protection Shrine

Message: "While the spirit is vigilant the body survives."
Effect: Casts mana shield spell.

Magick Shrine

Message: "Salvation comes at the cost of wisdom."
Effect: Reduces mana to increase the level of a random spell.

Life Shrine

Message: "The essence of life flows from within."
Effect: Two points are added to character's vitality.

Ironmongers Shrine

Message: "Only time can diminish the power of steel."
Effect: Restores the durability of items to the full amount.

Thieving Bandits Shrine

Message: "When avarice fails patience gains reward."
Effect: Any items that you have left in the town will be robbed, but you gain 100 experience points for each one.

Mana For Life Shrine

Message: "Energy comes at the cost of wisdom."
Effect: Half mana is lost but half health is restored.

A To Z Shrine

Message: "The way is made clear when viewed from above."
Effect: The whole level map is revealed.

Jackpot Shrine

Message: "Riches abound when you least expect it."
Effect: Loads of gold appears in the shrine.

Recharge Shrine

Message: "The powers of mana renew."

Effect: Recharges the powers of any items you are carrying

Big Mistake Shrine

Message: "You hear a strange cry from the distance."
Effect: The hit points of the boss on this level are raised.

Back Stabber Shrine

Message: "Those who are last may yet be first."
Effect: The character that activated the shrine gets +1 a on one of their stats whilst the other player gets -1.

Cash Back Shrine

Message: "You hear a series of creaks and thumps."
Effect: All treasure chests on this level are refilled.

Blade Shrine

Message: "Justice is swift and sharp."
Effect: Increases damage by one point.

QUESTS

The quests are generated in groups and sub-groups. For group 1 you can attempt one of the two available quests; group 2, two of the three available quests; group 3, two of the three available quests; group 4, two of the three available quests; and for group 5, one of the two quests. The Chamber Of Bone, Archbishop Lazarus, and Diablo are all default quests in a single-player adventure.

In the two-player game, the only quests available are the Butcher, King Leoric, Archbishop Lazarus, and Diablo. In the case of Leoric and Lazarus, they appear on level 3 and 15 respectively, instead of separate sub-levels.

KING LEORIC'S CURSE (SKELETON KING'S LAIR)

Group: 1

Level: 3

Reward: Undead Crown

Have a word with the tavern owner, Ogden. He'll tell you about the history of King Leoric (which you can also read about in the history section in the start-up screen).

Hack your way down to level 3, search it thoroughly, and you will find a darkened tunnel with the words "To King Leoric's Tomb" written above it.

Ensure that you have as many mana and health potions as you can carry before you descend into the darkness, as there will be a multitude of skeletons with swords, axes and bows to greet you in this tomb of the undead.

Use bludgeoning weapons such as the mace or staff to crush the skeletons' bones. If you are a wizard you may also find that having the holy bolt spell selected will serve you well.

King Leoric has the power to resurrect any fallen skeletal warriors that he touches, so cut him down first so that you may deal with the rest of the skeletons in short order.

Once you have put the mighty king Leoric in his grave for the second (and hopefully last) time, finish off his minions and collect the undead crown from his shattered form.

POISON WATER

Group: 1

Level: 2

Reward: The Ring Of Truth

Head over to the well in the centre of the town. If the water is of yellow hue, the poisoned water quest is available for you to undertake.

Go over to Pepin the town healer and talk to him. He will fill you in on the details of the poisoned well. Enter the catacombs and battle your way down to level 2. When the level has been cleared, take a look around and you should be able to find some torches surrounding a crack in the wall. Enter the hole and slaughter the demons hiding within the caves there. Once all the demons have been put to the sword you will hear a trumpet fanfare that

indicates that the quest has been completed. Return to the town and talk to Pepin, who will bestow upon you the ring of truth.

Above: Enter the dark passage to save the villagers from a dehydrated death.

THE BUTCHER

Group: 2

Level: 2

Reward: The Butcher's Cleaver

At the entrance to the tunnel you will find the mortally wounded corpse of a townsman. Have a word with him before he croaks: he will tell you of the massacre in the catacombs. When you have heard enough, leave him there to die and descend into the monastery below. Rid levels 1, 2 and 3 of monsters and search them for items and gold. You may want to use a town portal to go and spend some of your gold on weapons at this point.

Once you are properly tooled up, open the door to the room on level 2 that is packed with mutilated corpses. The butcher will shout at you and attack with

Below: Don't open this door unless you're tough as anything or you'll be butchered!

his cleaver – he's very hard to kill this early on in the game, so be prepared to do a runner if he gives you a pasting. There are a couple of bandit tactics you can use on the butcher: the first is to cast a fire wall spell as soon as you open the door to the room, then close the door so the butcher cannot escape the flames. The other is to get the butcher to follow you to a room with bars instead of walls, lock yourself inside so that he can't attack, then shoot at him through the bars to finish him off.

OGDEN'S SIGN

Group: 2

Level: 4

Reward: The Harlequin Crest And A Random Magical Item

Have a banter with Ogden the tavern owner and he will tell you that some thieving gits have made off with his sign. Go down to the catacombs and get to level 4. You'll meet up with a horde of creatures and their leader Snotspill who was responsible for the theft of the sign. On talking to Snotspill he will inform you that some bigger demons came and mugged them for the sign and they are currently hiding it in the next two rooms. Enter the two rooms and cut down the two demons inside. Search the big chest in the room and you will discover the sign. Collect it, then return to the village using a town portal.

On receiving his sign Ogden will give you the harlequin quest as way of thanks. Return through the portal and talk to Snotspill. He and his horde will attack you, so be ready with your weapon. When he and his minions are dead, search their bodies to find a magic item.

GHARBAD THE WEAK

Group: 2

Level: 4

Reward: Two Magical Items

Go down to level 4 and talk to Gharbad the goatboy when you find him. Leave the area he's in, then return and talk to him again: this time he'll give you a magic item. Leave the area, then return again, Gharbad will then tell you he has almost finished making something cool for you. Leave, then return one final time and Gharbad will turn on you and attempt to beat you to death with his magic creation. Naturally you must return the favour with weapons of your own. From his corpse you can recover his weapon which is a magical club.

THE MAGIC ROCK

Group: 3

Level: 5

Reward: The Empyrean Band

Go over to Griswold the blacksmith and he will tell you the legend of the black rock. Descend the stairway in the catacombs and make your way to level 5.

You should find a rock on a table there. Collect the rock and return with it to Griswold, who will forge it into a most excellent magic ring for you to wear.

ARMOUR OF VALOUR

Group: 3

Level: 5

Reward: Arkaine's Valour

When you reach level 5 you will discover a large sealed room in the centre. Go through the two doors in the side of this chamber and slaughter the creatures within. Read the book of blood situated there and enter the next room to find the altar of blood. You will discover a bloodstone near the altar which you should place on the pedestal. A secret door will open, leading to a room nearby. There is another bloodstone in here which you should collect and place on the pedestal. Yet another secret room will reveal itself and you will be able to find the final bloodstone within. Place this with the others and you will be imprisoned in a large room, thick with demonic entities. Kill all the creatures and search the room to find the magical armour.

HALLS OF THE BLIND

Group: 3

Level: 7

Reward: The Optic Amulet

On level 7 you will find the book of the blind. When you read it, some doors will open up into what looks like a deserted section. Unfortunately it is not as empty as it looks: it is in fact filled with translucent

demons that will surround you. If you shoot an arrow or cast a spell into the room, you'll hear shouts of pain. Keep piling on the arrows and start hacking them as they attack. Ensure that your back is to the wall so that the bastiches can't get behind you. When these translucent terrors have been slain, you can search the area to find the amulet.

ZHAR THE MAD

Group: 4

Level: 8

Reward: Spell Book And A Magic Item.

Deep within the level 8 catacombs you'll chance upon a wizard engrossed in his studies. If you talk to him he will give you a spell to get you to clear off and stop bothering him. If you continue to harass him or rifle through his bookcase, the wizard will turn on you and attack with his fireballs. He also teleports repeatedly, making him a tricky adversary to track down and kill. When you have destroyed him you'll find a magic item on his rapidly cooling corpse.

THE BLACK MUSHROOM

Group: 4

Level: 9

Reward: Spectral Elixir

When you find the fungal tome on level 9, cast a portal to return to the town. Give the tome to Adria the witch and she will tell you to return to level 9 and find a mushroom patch. When you reach the latter, you will recover a big black mushroom. Take this back to Adria and

Above: Recover Ogden's sign to earn mountains of ale and his everlasting gratitude.

Above: The goats come in four different varieties but they all die just the same.

she'll tell you to go to Pepin, who tells you to get him a demon's brain. Go back to the caves and cut open the bloated demons there to get the brain. Return the brain to Pepin and he'll give you an elixir to give to Adria. When you try to do so, she'll tell you to keep it for yourself!

THE ANVIL OF FURY

Group: 4

Level: 10

Reward: Griswold's Edge

Go and have a conversation with Griswold and he will tell you about the mystical anvil that is hidden in the catacombs. Make your way, by sword or sorcery, to level 10 and retrieve the anvil. This is a hardy task as it is well guarded, so be sure to have enough healing concoctions at the ready to see you through. When you give Griswold the anvil, he rewards you by forging a mighty weapon to aid you in your quest.

WARLORD OF BLOOD

Group: 5

Level: 13

Reward: Various Weapons And Armour

The warlord is one tough dude. As fights go, you are in for a major ruck, so ensure you have plenty of healing and mana potions in your trusty backpack. When you get to level 13 start searching the level methodically and sweep it clean of monsters. If you find a book on this level, don't look at it – instead concentrate on killing everything on the level to boost your experience points up to the max.

When you are sufficiently confident of your ability, go back to the book and take a gander at it. The warlord will be released from its very pages, along with hordes of his elite blood knights. Slash through the blood knights to get to the warlord himself, then take him on with everything you have. It will take some time but the warlord will eventually succumb to the wounds you inflict: if using spells against him, try the golem or stone curse to bring him to his

knees. When this mighty warrior has been dealt with, the armouries of hell will be yours.

LACHDANAN

Group: 5

Level: 14

Reward: Veil Of Steel And A Magical Item

Lachdanan's history is detailed at the beginning of the game. When you meet him on level 14 he will give you more information on his plight. He'll also reveal that he has been cursed. You can release Lachdanan from his curse by finding the golden elixir hidden on level 15. When you give him the elixir he'll reward you with the veil of steel.

THE CHAMBER OF BONE

Group: N/A

Level: 6

Reward: Guardian Spell And Various Magical Items

If you find the mysterious tome on level 6, have a dekko at its pages and a secret staircase will open up in the wall. Wander up the stairs and you'll find a spooky bone chamber. Kill all the monsters in the surrounding rooms and flick the switches located there. You'll now be able to enter the central chamber and rob the treasure. As you are helping yourself to the gold, you'll notice the doorway opposite opening: this leads to the land of the dead, which is why there are skeletons pouring in through it. Smash aside the skeletons to reach the door and block it with your body: this will stop them surrounding you. You'll need a lot of healing potions in reserve to deal with this undead insurgence, but when you have destroyed a sufficient number of them they'll take the hint and flee back to their own world.

ARCHBISHOP LAZARUS

Group: N/A

Level: 15

Reward: Assorted Magical Artefacts

On level 15 you'll find a vile stand. On it is located the staff of Lazarus. Put the staff in your pack and cast a town portal spell to get you back to the village. Go and talk to Cain the elder, who'll tell you all about the history of the staff and Lazarus himself. Return through the portal and you will discover that a red portal has appeared next to a pentagram on the floor. Step into the to be taken to Lazarus's lair.

Above: Libraries can be the source of much information... and a gruesome death!

All about this level are teleport circles that will transport you around it, so watch your step. Witches are also abundant on this level, so make certain you have a long-range to deal with them from a distance. When you tread on the last teleport circle on this level, you'll be confronted by a horrific sight: Lazarus in demonic foreplay with his witches! Lazarus will attempt to engage you in conversation as you approach. He is trying to lead you into a trap so begin to walk backwards rapidly. When he stops talking, an ambush force of witches will appear. Lure the witches into the doorway and kill them one by one, then take on Lazarus himself. When this satanic priest has breathed his last, you can help yourself to the items on his corpse.

DIABLO

Group: N/A

Level: 16

Reward: Game Completed

After returning, bloodied and bruised, from your fight with Lazarus, you'll notice that the pentagram is now glowing with unholy vigour. Cast a town portal if you have one and buy a load of mana and health so that you have as much as possible, then return to the catacombs.

Step into the pentagram to get to the final confrontation with Mr Diablo himself. Start clearing out the monsters piecemeal and don't touch any of the levers scattered around until they are all dead. This level is infested with hell horrors and advocates. Every time you pull a lever, more will flood in, so be sure to deal with each and every one before you pull another lever.

When you have cleared out all four sections of this level and pulled the last lever, you will come face to face with Diablo himself. Lash him with holy bolts, hit him with arrows, beat him bloody with your sword, take him down any which way you can, but make sure you take him down. Have loads of fire resistances on standby as these are essential for your survival. When Diablo has been finally sent back to hell, you can rest your weary sword-arm and watch the end sequence, satisfied in your victory over the forces of darkness.

Below: Who the devil is this? Why it's Diablo himself. Take him down to win the game.

Need For Speed

High speeds, controlled aggression, and plenty of guts is the name of the game in EA's latest addition to the Need For Speed series. We've evaded the cops long enough to bring you the only guide you'll ever need to this superb racing game.

HOT PURSUIT

OBTAINING THE EXTRA TRACKS

Country Woods, Lost Canyons, Aquatica & The Summit

There are eight regular tracks in the game, plus one additional bonus track (Empire City). The first four tracks (Hometown,

Right: Once you've unlocked the extra tracks, you'll want to save them to a memory card.

Redrock Ridge, Atlantica, and Rocky Pass) are available to the player in any mode. However, to obtain the final four regular tracks – so that they're available for other modes – you must first enter a 'Tournament'. You will have probably noticed by now that all eight regular tracks appear in sequential order. You must remain in the top three league standings to get onto the next track. As you reach each new track, that course is then available for you to race on in other modes.

Empire City

To enable this bonus track for other modes, you must first enter the beginner Knockout mode. Yep, you guessed it, you must be the only car remaining to unlock this bonus track.

OBTAINING THE EXTRA CARS

Jaguar XJR-15

Win a Tournament in 'Beginner' mode, then the Jag will be available for use in other modes.

TOURNAMENT MODE

Beginner Tournament

For the first four tracks you have the choice of using either the 355 F1, Corvette, or Countach. The best all-round car for this job is the Ferrari 355 F1; it has a good top speed, handling, and braking. Plus, with the option of ABS braking, it provides you with a very fast and stable car to drive.

Once you make it past the first four tracks, you'll be given an additional three new cars to pick from: Nazca C2, 550 Maranello, and Diablo SV. Although it's easy enough to say, "Yeah, I want the fastest one" (which happens to be the Diablo), this is not always the best choice. The tracks are not all fast-paced, long straight race courses. Oh no, they'll be a mixture of tight turns and long corners. The best car to go for is the Ferrari 550 Maranello. A great top speed, with excellent handling and braking, once again makes the Ferrari the better choice. Particularly if you set the ABS to "On", and use the handbrake for those tight turns.

Expert Tournament

A simple choice to make really. Use the Jaguar XJR-15 (available after winning 'Beginner Tournament') to stand any chance of winning – and I do mean any!

It's A Knockout

The 'Knockout' tournament simply consists of eight cars competing in an

elimination process. Through each round, the last car to finish is eliminated from the contest. When there are only two cars left, you'll go head-to-head on the bonus track, Empire City. By winning this final round, you'll open up the Empire City track for other modes.

Smokey & The Bandit Ideal Car

Choosing the most lightning-fast car is not always the key to victory; neither is choosing a lightweight supercar. The best car for the job is something that's a little meaty in weight, and has a poky acceleration. The Countach is probably the best one for beginners. But if you fancy something a little different, take a look at the cars' statistics, and focus on the weight and acceleration.

Staying One Step Ahead Of The Law

Obviously it goes without saying that you must keep at least a car's length ahead of your pursuers. If they (and they usually do) get ahead of you, you must make the first move and try to ram them out of your way. Otherwise, if they strike you first, there's a good chance you'll lose control a little.

If you get surrounded by the boys in blue, apply the brakes a touch, then smack on the throttle and overtake on the side of the road – just don't slow down too much, otherwise you'll be arrested.

Utilise all the short cuts within the circuits – as the cops don't use them – to give you a little more breathing room.

No Ferrari?

You may have wondered why the Ferrari is not available in Hot Pursuit. Well, apparently the reason behind Ferrari pulling their cars out of the 'Hot Pursuit' mode is because they didn't want to associate their cars being chased by police – how bizarre!

The Opposition

Ice
The number-one contender. Although he's a fairly clean racer, the chances of beating him – particularly on Expert mode – will be very low, as he doesn't make many mistakes.

Bullit
A more aggressive driver than Ice, who takes any opportunity if passed to run you off the road.

Blazin
Although a persistent racer, especially if he's just behind you, he can be beaten on a regular basis if you're driving well.

Terror
The most aggressive character by far. Short of flinging himself into you, he'll do pretty much anything he can to stop you winning, passing, or finishing the race.

Swerve
Easily passed on the inside of corners, this opponent poses no threat – unless you're incredibly bad, that is.

Tad
A bit of a honker, Tad's purpose is simply to make up the numbers. No threat whatsoever!

Karkas
A laughable attempt at driving, this guy is the slowest racer. Not only that, he can be easily honked into making a mistake.

Simulation Car Settings

During *Need For Speed III* you'll have the option to change the settings of your car. Although there is no ideal setting to speak of, many of you will have personal preferences on how you like your car to respond. Below is a brief description of each setting:

Engine Tuning

By setting the engine tuning to 'high end', you'll be improving the top-end power of your car on fast tracks. When it comes to the slower, more twisting circuits you'll be better off setting it towards the 'low end'.

Brake Balance

Set the brake balance towards the front of the car and you'll create a more predictable braking system. If you balance the brakes towards the rear, this will generate slides in turns as a result of your wheels locking up.

Steering Speed

By setting the steering speed towards 'slow', you'll incite a much more stable, wider turn. Whereas if the setting is towards 'quick', you'll enable your car to negotiate much sharper turns – however, when doing so you will ultimately endanger your handling predictability.

Gear Ratios

Lowering the gear ratio will increase your car's top speed. This is ideal when competing on a fast circuit with long straights and flowing bends. However, if the circuit is twisty with little chance of reaching a top speed, then perhaps setting the gear ratio higher – thus an increase in acceleration – would be more beneficial.

Suspension Stiffness

In a bid to improve the cornering ability of your car, setting the stiffness of your suspension will result in a more stable performance. By setting the suspension stiffness towards 'soft', you'll allow the tail of your car to drift around the corners for a sharper turn-in, but with less exactitude.

Aerodynamics

When confronted with a nightmare of twists and turns, setting the aerodynamics towards a higher downforce will increase your car's ability to grip the surface at high speeds. By reducing the car's downforce – setting towards 'low' – you'll sacrifice a little grip for a higher top speed.

Tyres

When racing on a track with rain or snow, you can increase your car's grip by setting the tyres to rain. If the circuit and weather is dry, then select race tyres for a superior grip for your car. However, if the race comprises both rain/snow and dry weather, selecting 'stock' tyres will provide the best grip for mixed conditions.

THE TRACKS

Hometown

Length: 3.6 Miles
Difficulty: Beginner

This rural track offers high-speed action for any driver willing to push his car to the limit. The Diablo is a prime car for this track. The top speed of the Diablo can be fully explored whilst rip-roaring your way round this beginner's track.

1. Wide sweeping runways and slightly banked corners will really test your car's high-speed cornering abilities.

4. The toughest part of the course. This 90° bend requires a good deal of braking, and handbraking, to get round in one piece.

3. Keeping the throttle held down will do you no good here. No need to use the brake, just release the throttle and glide around the bends.

2. Just before the bridge you'll rocket through the air off this jump. Make sure you approach it straight, otherwise you'll be flung into the side of the road.

continued

Redrock Ridge

Length: 5.4 Miles

Difficulty: Beginner

Like the previous track, Redrock Ridge is primed for high-speed racing. So if it's speed you want, the Diablo is the one for you. It's keyed up and ready for action on this fast dusty canyon course with plenty of obstacles.

4. Release the throttle if necessary when charging around these sweeping bends.

3. You'll reach high speeds in this dusty section of the track. Watch out for the slight dips in the road's surface.

Below: No time to stop for gas on the fast Red Ridge track.

Short Cut

See that large gap in the rocks on the left? You could get a bus through that, never mind a supercar! So you may as well cut the corner to save a bit of time - not much, but it all counts.

2. Approach the corner wide, braking into the apex. Then throttle off the bend, keeping the accelerator firmly held down.

1. There's a small margin of error as these high cliffs and narrow sidelines require the very best of control.

Atlantica

Length: 4.9 Miles

Difficulty: Beginner

With a Monaco-style feel to it, this race course is any driver's heaven. With high speeds, spectacular bends, and tough chicanes, Atlantica will always provide the thrills and spills that we're used to.

3. As the road starts to split, you must make the choice of which path to take: high or low? Either's good for me!

1. These long bank turns will test any car's high-speed handling ability. Keep to the shoulder for the best line through.

4. These chicanes will test any driver's nerve. Release the throttle and glide through them.

Short Cut

Why go the long way round when there's a shorter alternative? You can cut a huge slice off this corner with this nifty short cut. As soon as you see that brown floor to the right, brake and take a sharp right to enter it. Now zoom down to the end of the passage, ready to take a sharp right again to rejoin the tarmac track.

2. These two long bends both top a radius of 180°. Watch your line and speed when negotiating them.

Need for Speed

ROCKY PASS

2. Find the perfect line – middle of track usually – and let loose the throttle. Top speeds are possible here.

1. The western route provides tough corners and sweeping bends. Use the brake/handbrake to slow into the bend if necessary.

Rocky Pass

Length: 5.5 Miles

Difficulty: Beginner

This snowbound track provides a challenging race for the best of drivers; it also happens to be one of the most enjoyable tracks. With its fast sweeping bends, and tricky corners, it has all the excitement of the fair, with a jump to boot!

4. These switchbacks are the ideal opportunity for you to creep up on the opposition. Just powerslide into the bends using the handbrake, and accelerate out.

3. You'll need to apply the brakes for these high-speed corners. Otherwise you'll become roadkill.

Country Woods

Length: 5.2 Miles

Difficulty: Expert

Based on the Hometown circuit, this race through country roads throws in a few tight bends and 180° turns for good measure. Powersliding also becomes a more important technique to implement, particularly towards the end of the course.

3. Powerslide is once again called into practice at these very tight bends. Accelerate out to stay ahead of the pack.

2. This set of 180° turns should be attacked at high speed. However, lay off the throttle whilst turning into them.

1. Watch your line carefully as you approach this high-speed jump; which sends you rocketing into a deep corner.

COUNTRY WOODS

Short Cut

Look carefully and you can spot a gap between the trees on the right. Head down there, turning right at the end.

Short Cut

You can cut a small bit off this hairpin by swerving right through the gap just before those trees.

Lost Canyons

Length: 6.3 Miles
Difficulty: Expert

A course where controlled steering is of the utmost importance, this race track shifts from ground level to the canyon floor in seconds. Be alert at all times, and watch out for those drastic dips.

3. Top speeds are possible throughout this multi-levelled roadway. Just keep that throttle slammed down.

Short Cut

Never mind admiring the historic scenery, why not take a nifty short cut through it? There's no need to follow that car round the corner here. See that ancient temple on the right? That's right, you can drive up the ramp into it between those pillars to cut a large slice off the corner, taking a straighter, faster line in the process. Head right at the end to rejoin the track in the lead.

2. The road tends to dip drastically throughout this area. And with consecutive jumps on a winding road, it should prove a good test of wits.

1. These snug chicanes and wide bank turns should be taken at high speed, although you may need to release the throttle to avoid shooting into the sides.

1. Quick turns and sudden elevation changes await you in this cliff-side racing section.

2. In a water section unique to Aquatica, this narrow and twisty road tends to dip without warning. Although the brake shouldn't be necessary, you'll need to lighten up on the throttle.

Short Cut

Well knock me down with a feather if that isn't a gap in the wall to the right. I say, Jeeves, why not swerve right and hammer it down the passage? Turn right at the end to rejoin the track in short order.

Aquatica

Length: 5.3 Miles
Difficulty: Expert

This coastline racing experience will require great skill and confident driving to accomplish good times. As well as being slightly longer than the beginner version, Atlantica, it's also much harder to keep to the racing line.

3. Hard corners on this coastal stretch could prove a little tricky. Once again, ease up on the acceleration in this section.

Need for Speed

1. Racing along the cliff-side poses sudden tight corners, steep switchbacks, and hard bends. The brake/handbrake will be called upon many a time.

The Summit

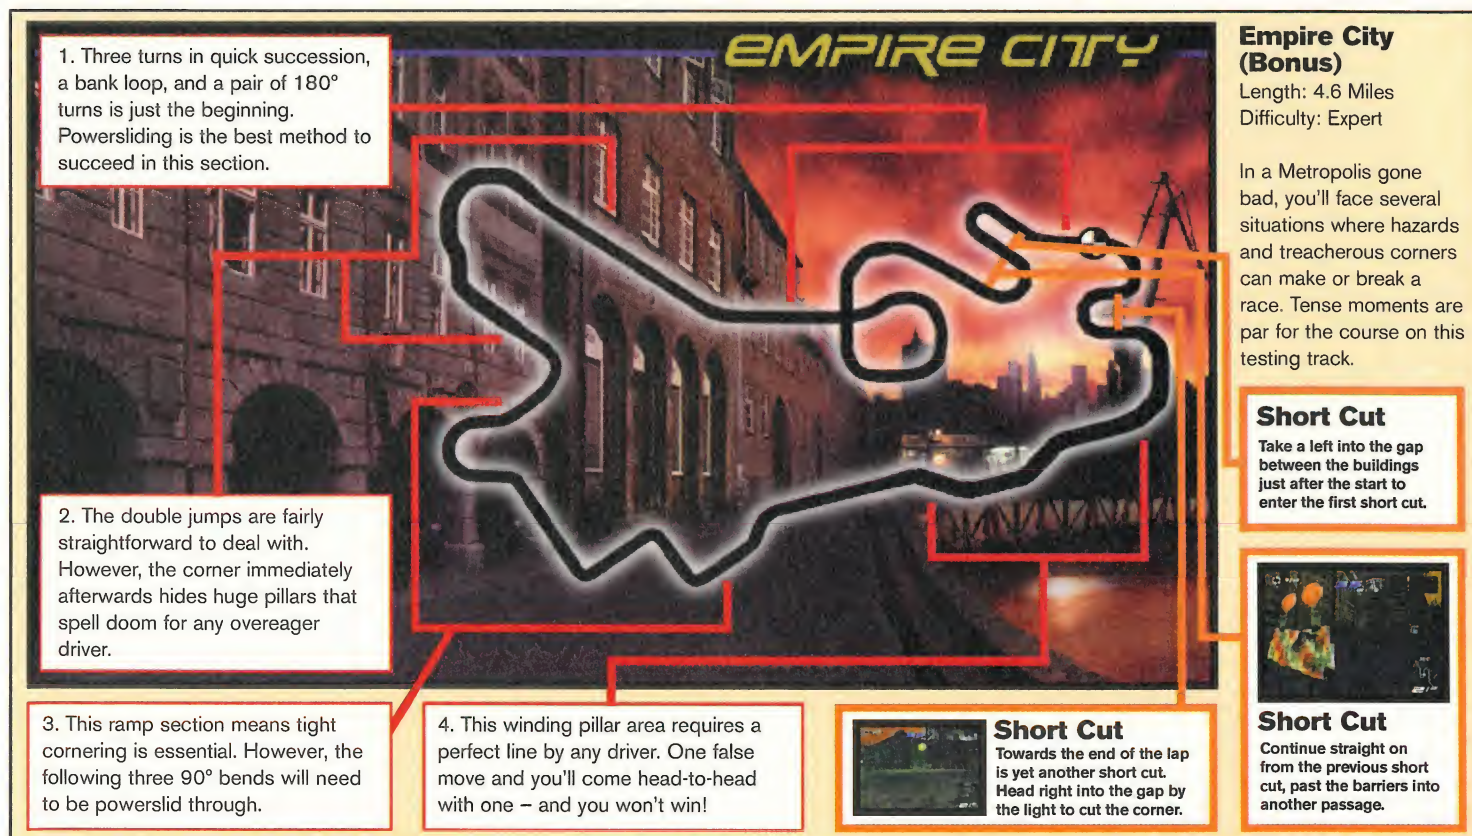

Length: 6.4 Miles

Difficulty: Expert

This snowbound track provides the toughest challenge of all the courses. Not only is a mastery of racing skills needed, concentration of the highest order is required. Even the slightest mistake can prove costly.

3. This rustic village hides some dangerously sharp high-speed turns and hidden jumps that can affect your line and send you crashing.

2. With snowy banks and twists aplenty, ease off the gas and powerslide around the corners.

1. Three turns in quick succession, a bank loop, and a pair of 180° turns is just the beginning. Powersliding is the best method to succeed in this section.

2. The double jumps are fairly straightforward to deal with. However, the corner immediately afterwards hides huge pillars that spell doom for any overeager driver.

3. This ramp section means tight cornering is essential. However, the following three 90° bends will need to be powerslid through.

4. This winding pillar area requires a perfect line by any driver. One false move and you'll come head-to-head with one – and you won't win!

Empire City (Bonus)

Length: 4.6 Miles

Difficulty: Expert

In a Metropolis gone bad, you'll face several situations where hazards and treacherous corners can make or break a race. Tense moments are par for the course on this testing track.

Short Cut

Take a left into the gap between the buildings just after the start to enter the first short cut.

Short Cut

Continue straight on from the previous short cut, past the barriers into another passage.

Short Cut

Towards the end of the lap is yet another short cut. Head right into the gap by the light to cut the corner.

Warhammer Dark Omen

WARHAMMER Dark Omen

Raise thy sword and take up the war-cry, Warhammer returns to the PlayStation, bringing with it fresh challenges for you and your stalwart warriors. It takes more than raw courage and swordplay to conquer the minions of Chaos. You will need sound tactics: and that, my friend, is what we bestow upon thee.

Check Your Ground

Terrain can play a big part in deciding who will be victorious in any battle. Ensure that you take note of terrain when planning your attack – if you don't make the terrain work for you, you will find it working for your opponent.

Elevated terrain such as hills can provide excellent points from which to defend. Any units attempting to engage you whilst you are above them suffer penalties when charging. They also move slower, allowing you to counter-charge them and receive the bonuses given for the higher ground. Likewise when you attack units entrenched on hills, you should first deplete their numbers with projectile attacks before trying to engage them.

Rough terrain slows down the rate of movement for most units. If you position archers behind rough ground it will give you chance to get them to safety if they come under attack.

Line of sight is also very important when you deploy troops at the start of the battle, as even the most expensive cannon can be rendered useless if you can't see the enemy. This works both ways so you should always consider the advantages of cover when you approach enemy missile units. Line of sight can also be used to launch surprise attacks against

the enemy. Stash hidden units behind trees or buildings, then wait for the enemy to pass so you can charge them in the rear. You will have to watch out for this tactic being used against you: the forces of darkness are adept at obfuscation and concealment so be wary of surprise attack when you advance across seemingly unprotected ground.

The Art Of War

To win battles you must first concern yourself with not being defeated. The easiest way to do this is to ensure your initial deployment positions are easily defensible. Keep your cavalry on the flanks so they can sweep in behind any troops foolish enough to charge your army in the centre. This also allows them greater freedom of movement and prevents them from getting stuck behind slower troops.

Missile-firing units should be placed on high ground so that they can rain projectiles upon advancing minions of evil. Always ensure missile units have a good field of fire when you deploy them, as with the correct positioning they can wipe out superior units with repeated hits.

Infantry should be the mainstay of your army. Always deploy them in the centre so that they can respond flexibly to enemy attacks. Infantry should also be used to guard missile units and wizards to protect them from being charged by the enemy.

The Right Tools For The Right Job

The key to victory is in choosing the right men for each mission. To make a good choice you must first consider the strengths and weaknesses of the troops you have available.

The Grudgebringer Cavalry

These are your elite corp. Give them the best armour and weapons you can to ensure their survival. You should be able to depend upon the Grudgebringers when all else fails, but beware of wasting their lives needlessly as they are costly to replace.

The Grudgebringer Infantry

This is the first infantry unit you will get in the game and the one with the most troops. Upgrade their armour as soon as you can afford to so they stay alive long enough to get more experience.

Cannon

Not very accurate and unable to fire over trees, the cannon only proves its worth in defensive situations where it can bombard the approaching enemy. You will need to place it well before the battle in order to use it effectively, so always check its line of sight.

The Countess's Guard

These are the Countess's bodyguards and as such are only used in a few missions. Being equipped with halberds, they are most effective against mounted opponents and charging infantry. They should not be used to attack archers due to their slow movement rate.

The Bright Wizard

The wizard is essential to your progress in the game as his burning attacks destroy undead such as zombies and mummies effectively. You should take care to protect him from hand-to-hand combat as his magic won't work against cold steel.

Imperial Greatswords

After your first visit to the Emperor you are given the Greatswords to aid in your quest. These men aren't as stoic or numerous as the Grudgebringer Infantry but they inflict far more damage with their two-handed swords.

Flagellants

Despite flogging themselves senseless in a crazed fashion, the flagellants are by far the best infantry unit you get. They are hardy

enough to resist the heaviest blows and are almost immune to fear. These guys don't even break until they are nearly wiped out!

Steam Tank

The steam tank is only available in a few missions but it pays dividends in combat. It is immune to infantry attack, but missile units can sometimes cripple it from a distance. Its manoeuvrability provides a constant barrage with which to harass the enemy.

Mortar

This is definitely the best artillery unit to have as it can fire over trees and other obstructions if you have a unit that can spot the target. The blast radius of its shell can make even near misses capable of blowing away half a regiment.

Ice Mage

His spells aren't up to the destructive potential of the bright wizard but he does have a range of destructive missile attacks. Only deploy this man if the bright wizard is dead, as he lacks the offensive capabilities of his predecessor.

Ragnar's Wolves

If you help Ragnar give the Trolls a good kicking he will lend you his cavalry. Ragnar's wolves can't take much punishment before they break, and are prone to fearing the undead. For this reason you should only use them for scouting and mopping up archers.

Dwarves

The dwarves turn up to aid your expedition to Bretonia and, to be frank, they should have stayed at home. They are good hand-to-hand fighters but do break quite regularly. They also move slowly, making them choice targets for artillery and archers.

Elven Archers

With their long range and accuracy, the archers are the best missile unit in the game. Their arrows can devastate approaching units quickly and their fast reload time allows them more shots than average. They are found in the Loren forest.

Pistoliers

'Fast-moving powerful weapons' perfectly describes the pistoliers. They can take rapid shots at opposing units and retreat fast if they are charged. The pistoliers are encountered just outside Moussillon in Bretonia.

Carlisson's Cavalry

The cavalry consists of mighty swordsmen mounted on swift steeds and as such are best used for flank and rear attacks. The cavalry is only put at your disposal for a few missions so make the most of it.

Helmgart Bowmen

Poorly armoured and bad shots, the Helmgart bowmen accompany you to relieve the garrison at Helmgart. Use them to shoot at approaching units but do not get them in an arrow trade-off with the undead archers as they will lose.

Imperial Cannon

Unless you foolishly chose this war engine over the mortar, the cannon is only used in the assault on blighted tower. It is more accurate and powerful than the Grudgebringer cannon but it also suffers from the same line-of-sight restrictions.

Ogres

The Ogres choose to follow you rather than Muntz if you assault the Orc camp in Kislev. They are deadly fighters that move fast to close down and destroy opposing troops. They also cause fear which can be useful for disrupting the enemy.

Bandits

Muntz bandits are only under your command when you attack the Orcish camp. Use them to scout the terrain and draw fire away from your own precious units - they are only with you for this one mission so what the hell, get them all killed!

Grail Knights

The Grail Knights are a gift from the king of Bretonia to help rid his lands of the undead. When you leave Bretonia they will depart, so make the most of their superior bravery and hardy swordsmanship whilst you can.

Glade Guards

These elves accompany you to the sacred glade and join in the resulting battle with the undead. Their spears make excellent weapons for unseating horsemen and their high movement allows them to get close to archers quickly, so deploy them accordingly.

Treeman

If you agree to help the Treeman by destroying the undead in Loren forest, he will join you in the task. Use him to spot the undead units and to strike down the Necromancer in charge of the undead. He is expendable after all.

Knights Of The Realm

If you don't go with the elves to Loren, you will meet up with the knights of the realm. They will join you if you help them defeat the Orcs that are on the rampage. The knights are mighty fighters but you are better off going to Loren to get the Elven archers.

Warhammer Dark Omen

MISSION GUIDE

Mission 1: Defend The Trading Post

This is a straight fight between you and some night goblins. All you have to do is prevent them from reaching the trading post in the northwest of the map. There is only one route to the trading post so it should prove no trouble.

Position your cavalry in the trees so they are out of sight, then place your infantry next to them and put your crossbowmen to the left of the infantry.

All you have to do now is wait for the goblins to come to you. Your crossbowmen will begin to shoot at the goblin infantry as they get close to thin out their numbers. As they attack your infantry, move the cavalry out of the trees and charge them from the rear. When they are dead, move your cavalry on top of the hill and kill the goblin archers there with a fast charge. Repeat this method to defeat the second set of goblins, then proceed into the trading post and collect the chest there before ending the battle.

Mission 2: Slaughter Margin

You get the chance to gang up on the Orcish scum now as you attack their fleeing army with your freshly reinforced troops. Heh heh.

Conceal the two cavalry units on the flanks and leave your remaining units in the central valley: they are the bait for your cunning trap.

The cannon and the archers will begin to cut down the Orcs as they come within range and, with luck, you should be able to break one or two units before they close. Try and use your cannon to pick off the small units of Orcs as these are easy to rout. When the Orcs get too close for comfort, unleash your cavalry from the top of the hills and send them into the valley to charge the Orcs from the rear. With the

bonuses from the charge as well as the advantage of the rear attack, you should be able to drive them beneath your hooves without much trouble.

Mission 3: Undead Attack

The undead have risen from the grave to terrorise the village ahead. You must halt their advance using cold steel and powerful magic.

You have to stop the undead from getting to the village so put some infantry as close to it as possible. Put your crossbowmen on the right flank and get them to move towards the left when the battle begins. Put your Grudgebringer cavalry on the left flank – they are going to be holding off the main assault as they have the highest break point – and put your wizard next to them.

When the battle begins, a unit of skeletal warriors will enter the map: target these with your cannon and get your crossbowmen to lay down suppressive fire if they start to get close. The zombie unit that is heading for your Grudgebringer cavalry is susceptible to fire, so keep hitting it with spells from the bright wizard and Grudgebringer fireballs to rout it in short order. When the first set of undead are eliminated, more will attack from the left flank: if these get into hand-to-hand combat with your cavalry, move the units in the town over to the left so that they may charge the undead from the sides. A final two units of undead will appear to replace the ones you have just destroyed: keep them pinned down with cannon fire and fireballs and you should finish them off before they reach you.

Mission 4: The Bandit Raiders

Bandits have been sent to snatch the countess. You must fight them off and carry her to safety. Your forces start off in a narrow valley with little room to move and with the majority of the bandits concealed in the trees waiting to leap out on you.

First of all, get your troops spread out and put your missile units together so that they can bombard any horse riders en masse and wipe them out fast. Put your cavalry and infantry in the centre to give yourself a strong defensive position.

After the ease of the first missions you

will be plunged into the deep end here as horsemen attack you from all sides whilst their archers lash you with projectiles.

First off get rid of the horsemen with your archers and charge them with your cavalry if they get close. You must protect your missile units at all costs as the fast-moving horsemen have a habit of riding them down.

With the horsemen slaughtered, you can turn your attention to the archers on the hill behind you. They will have remained in place, so you can either hit them with the cannon or charge them with the Grudgebringers. When they have been routed, use the wizard to kill the Necromancer, then pound the remaining archers with your cannon.

Above: Well 'ard brigands attack – you must protect the countess at all costs.

Above: Teleport your wizard behind the enemy archers to take them by surprise.

Shadows Over Bogenhafen

It appears that even after your delivery of countess Liebewitz to this staunch bastion, she is still not safe. A bounty has been put on her head by a Count Carstein who has threatened to destroy the town unless she is handed over. You have two options: you can stay and defend the town against the undead, or you can proceed to Helmgart and reinforce the tower there. Assuming you have the courage to choose the former, you must defend the town at all costs.

The undead come at you thick and fast, so deploy all the men you have. Place your units on each of the corners of the deployment area. Put your archers in the southwest and northwest corners. Keep the Grudgebringer

cavalry next to the wizard and use them both to attack any undead that get through. Leave the infantry with the cannon at the south end of the deployment area.

The initial assault will start in the north and will be made by two units of skeletal warriors. Your archers should be well placed to cut down the skeletons as they approach, and between them and your wizard you should eliminate one of the units before they reach you. Charge the remaining poorly equipped unit with your Grudgebringer cavalry and you should be able to destroy it. In the south you will come under attack from another unit of undead and some archers in the southwest. Pound the archers with your cannon and use your crossbowmen to cut down the undead warriors before sending in your infantry forces to mop them up.

Back at the north edge of the city, two units of zombies will have been created to renew the attack on the town. This time they will be accompanied by their undead creator. Use your wizard and archers

as before to destroy the zombies, before letting your cavalry loose amongst them. If things start to go badly, get some men to charge the Necromancer controlling the zombies, as they will lose power if he is destroyed.

Defend The Keep

For your eternal shame you have chosen to ignore the plight of a lady and taken this easy mission where you have to defend Helmgart keep from the legions of the damned.

Position your archers and artillery on top of the cliff to the west and ensure that they have a good line of sight into the valley below. Put your cavalry and infantry next to the pathway so that you can crush any undead units which break through the volley of missiles laid down by your troops.

As the attack begins, get your missile troops to target the undead archers so that they don't destroy your cannon crew. Two units of undead swordsmen will be trying to make their way through the valley towards the keep at this point, so get your wizard to lash them with fireballs and break up their attack. Carve up any surviving undead with your cavalry before riding down to the bottom of the valley with your infantry. Circle round the cliff and charge into the valley, take out the bowmen with a cavalry charge and keep your infantry on alert for a group of undead horsemen that will be riding in soon. Repel the combined undead assault and move a unit of archers and the wizard into the valley. These two units should be able to destroy any marauding undead that bypass the Grudgebringers.

Retake The Bastion

Having been delayed in Bogenhafen, you arrive too late to save the bastion from being overrun. You must hack your way through the undead and capture the bastion in the name of honour.

Deploy all of your units in a line as far away from the skeletal archers as you can get. This will prevent you from being showered by arrows.

Don't move any of your men to begin with – just wait until your cannon has destroyed the group of archers on the cliff top before you begin your advance. The bulk of the undead forces guarding the bastion will not appear until you approach the cliffs, so move all your non-missile units through the gully together, as this will prevent the remaining archers killing too many of them.

Two units of skeletons will appear to block the path to the bastion: ride them down and sweep them aside with your cavalry. Use your infantry units and the wizard to destroy the last unit of archers on the hill and get them to support the cavalry when they are victorious.

Undead horsemen will eerily appear from the north, backed up by a mighty Necromancer – don't let your wizard tangle with this fiend as he has far superior magic. Charge the Necromancer with the infantry and get the Grudgebringer cavalry to engage the undead riders: man for man your forces should be able to take care of their opponents unless they have been severely depleted.

Escort The Dwarves

Having chosen to assist your old Dwarven friend against the undead legions that prevent him from returning to Karak Hirn, you find your army on a small mountain trail when you are set upon by undead.

Position your cannon and your archers at the front of the deployment area along with your cavalry. Place the wizard and the remainder of your troops in a line behind the Grudgebringers and hold them in place.

When the battle begins, shell the skeletal archers at the end of the pass to break them. Eventually they will either retreat or rout, leaving you with nothing to shoot at. At this point you will have to use your cavalry to spring the trap the undead have laid ahead. Move them down the trail until you sight the undead ambush force, then get them back in cover. The undead should be well and truly on your cavalry's tail, so use your archers and cannon to cover their retreat. Turn your horses round and face the oncoming undead whilst moving your infantry and the dwarves into position alongside them. Move your wizard up to the right flank: he will be needed to take care of any Necromancers that appear. Cease fire with your missile units, then charge the undead as they get close – try and kill as many of those cursed Wights as possible before they join the melee, as they are deadly at hand-to-hand fighting. When the bulk of the undead has been destroyed, you will have to move down the trail to eliminate the few remaining corpses that block your escape.

Ambush From The Grave

As you begin the march to Sylvania after discovering that the countess has been abducted, you will be set upon by an ambush force of undead.

Put your cannon and your archers on the left flank so that they have a

panoramic view of the battlefield. Place your infantry in the centre of the deployment zone and leave your wizard next to them. Finally put your Grudgebringer cavalry on the right side of the deployment zone.

First off, begin by letting rip with the cannon. This will encourage the Wights at the far end of the battlefield to seek cover, putting them out of the battle for the moment. When this is done, ride your cavalry down the middle of the battlefield to draw out your adversaries from their hiding places, before pulling them back to the bulk of your forces. Blunt the undead advance with repeated missile attacks but be sure to charge them before they get too close to your missile units. Keep your wizard on the right side of the battlefield: from this position he can burn any zombie units or mummified warriors that sneak up on the left.

With the left side of the map covered, lay down suppressive fire with your cannon and crossbowmen to beat off any units that attack through the centre. When the first set of undead has been dealt with, you can move your wizard and archers down the centre so they have a greater field of fire. Whilst you are doing this, use the Grudgebringer cavalry to search for more undead for them to destroy. The combination of your wizard and your archers should diminish the few remaining units of undead enough so that you can vanquish them all with a few cavalry charges. When you have attained victory, search the north of the battlefield to recover a chest of gold. You will also find a banner lying around after the demise of its owner.

The Eyes In The Woods

As you proceed to Sylvania you will be reinforced at the first town you come to by a detachment of Imperial Greatswords and a unit of flagellants (perky blokes that like to whip themselves). On your way through the woods to Sylvania you encounter a goblin war band, naturally you must cut yourself a path through them!

Position your cannon to the north of the deployment zone and leave your archers to the south. Place the Grudgebringer cavalry and the wizard alongside the cannon to give it some protection. Position the flagellants on the west of the deployment zone, where they will be used

Warhammer Dark Omen

to absorb enemy attacks and break up charges. Place the remaining infantry unit near the archers in the south.

Goblins are quite cowardly, so by inflicting casualties with the cannon you can effectively break most of the units before they reach you. Be wary of attack from the south by Goblin bowmen: they may not have the skill of your crossbowmen but there are a great number of them. Use the infantry placed in the south to charge these scum as soon as they appear and you should rout them pretty quickly.

The greatest threat in this battle comes from the Goblin shaman and the two units of giant spiders he has brought into battle with him. Use your wizard to blast the spiders into submission before they close in on your troops and wreak havoc. Your wizard can go one-on-one with the shaman to kill the freak, as he lacks the power of your previous undead adversaries. As long as you manage to keep the giant creatures away from your troops, you should have no problem defeating the goblin band.

The Steam Tank

Further along the trail you encounter the remnants of an assault force. The survivors tell you that they are here to oust the Orcs from the fortification ahead, but they need protection whilst they repair their transport.

Deploy your cannon beside the steam tank and place your archers next to them: they will provide ample cover for this mighty war machine. Put your cavalry on the west flank, along with your infantry and your wizard. Place your remaining units on the east side to cover the missile units.

The first attack will come from the north. Weaken the goblins with your missile units before moving in the men on the west of the map to roll up the flank and finish them. Once the forces in the north have been slain, the Orcs will launch a surprise attack from the south in the form of some boar riders. Hit the riders with all your missile units and bring the flagellants into play as their high durability will hold the riders off long enough for your cavalry to ride back and engage them. When the boar riders are crow food, use the Grudgebringers and the cannon to drive off the remaining unit of archers in the south whilst you destroy the Orc shaman with your own wizard.

Assault On The Blighted Tower

En route to Sylvania you make an unscheduled stop to help out a band of Imperial engineers as they try to drive the Orcs out of the Blighted Tower.

Move all your units to the far south of the deployment zone and position your cannons in the far right corner. Stick your infantry units next to them and sit back and wait.

The enemy will advance towards your positions... straight into your cannon fire – ho, ho, ho. Attack whatever Orcs reach your forces with your cavalry and you should take care of them fast.

After the first wave has been broken, you will need to lure the remainder of the Orc horde down the valley towards your guns. To do this, select your cavalry and get them to charge in and entice the Orc reserves out of hiding. Retreat your horses back out of range quickly when they appear or the Orcish artillery will make sushi out of them. Once your cavalry are out of the line of fire, open up with your cannons and blast the Orcs. Use your infantry to encircle the survivors and wipe them out a man.

With their best fighters destroyed, all that remains is for you to wipe out the surviving missile units. This can prove tricky as you are likely to sustain heavy casualties before you get close. The easiest way to destroy the remaining Orcs is to rush them with all your troops. That way the artillery can only fire at a few regiments, allowing the rest of your men to get through unscathed.

The Vampire's Domain

As you approach castle Drachenhof you will be challenged by an army of undead freshly raised to prevent you laying siege to the castle. Trapped on a winding mountain trail with nought but a few ruined houses to shield you from a hail of arrows, you must put these abominations back in the grave.

Deploy the Grudgebringer cavalry near the cliffs and put your best artillery next to them. Place your wizard and any remaining missile units in the centre of the deployment zone, then position your infantry next to them.

Firstly, target that pesky vampire on the cliff with your artillery. If you are lucky you could take him right out of the battle with

a few pot-shots and severely hamper the remaining units. If the vampire pulls out of range, target the skeletal archers on the cliffs instead.

When you are satisfied that you have weakened the undead enough, ride your cavalry through the ruins towards the end of the map. This should cause more undead to rise from their graves and attack. Retreat your horsemen when you have spotted them and start unleashing cannonballs at the undead. When the undead get to the outskirts of the ruins, send your forces in to fight off their attack. If you keep the cavalry in reserve, you can use it to bolster any units that become hard pressed by the undead advance.

You can repeat this tactic to destroy the second wave of undead that lie in wait near the path, but for the third you will need to head up the mountain trail and kill them there. To do this successfully you will need to take all your infantry units into combat. Forget about using any missile troops to aid the final attack as you will only kill your own men.

Above: If you're lucky you can shoot the vampire lord with your cannon as the battle starts.

Above: Your ginger-haired wizard proves no match for the vampire lord. Use your cavalry.

Into The Heart Of Drachenhof

Carnstein has retreated, with his undead army, to the bowels of his castle with the jewel. You must put down this vampire once and for all and recover the jewel before it can be used by the forces of darkness. Place your wizard and your archers in the centre of the deployment

zone. They will act as artillery on this mission and weaken the approaching undead before you charge them. Put your infantry on the right flank next to each other. They will charge any undead that get too close to the centre units. Keep your Grudgebringer cavalry on the left flank so they can charge the undead from the side.

Two units of zombies will attack first. Use your wizard and the Grudgebringer sword to burn them up with fireballs before moving the flanking infantry in to finish them off. When the zombies have been reduced to ash, send your Grudgebringer cavalry down the centre of the map to discover the location of the main body of undead. Once you have located the undead archers, deploy your infantry units to dispatch them immediately as they could prove troublesome if you leave them unchecked. Use the cavalry to mow down any reinforcements that approach from the north and bring your wizard to the centre of the map to destroy Carnstein. If the wizard fails, a swift cavalry charge should take care of the long-toothed fool.

Bad Day At Blood River

After returning the jewel to the emperor, he dispatches you to Kislev to recover the hand of Nagash. During your travels you encounter an Ogre band who offer you the chance to shorten your journey by crossing the river at a ford – the catch is that you'll have to deal with the Orcs guarding it first.

Place your cavalry at the north east corner of the deployment area and put a movement flag for them on the other side of the river. Place one of your infantry units and the Ogres in the northwest corner and place the remaining infantry with your missile troops in the west. Leave your wizard in the centre so that you can use him to help out any unit that's getting a beating off the Orcs.

Charge the Orc archers as soon as the battle begins, as they have a low break point so they should flee before they can inflict much damage on you. Your Grudgebringer cavalry should get into position on the other side of the river within moments and spot the enemy arches hiding there. Charge them down and butcher them without mercy, then return to the centre of the map. Use the Ogres as shock troops to scare away the Orcs that attack from the north, and use an infantry unit to help mop up any Orcs that don't flee. Charge the archers on the west with your infantry massed there and

leave your artillery on the lookout for any boar riders. When your infantry has broken the enemy in the west, bring it back and defend the centre from a fresh assault by boar riders. With the combined might of your cavalry and wizard, the Orcs won't stand a chance.

Gold Not Glory

Having chosen to raid the Orc camp over your mission to save the empire, you must fight long and hard to get your hands on the booty. The camp is heavily defended by bolt throwers and archers and there are Orcs in great numbers patrolling the woods.

Move all your troops over to the deployment zone on the right next to the trees and place your cannon at the front alongside your wizard. Put your cavalry next to them and put another unit behind the wizard so they can move forward and attack any Orcs that charge him. Stack the rest of your units on the left of the deployment zone so that they are hidden by the trees.

Below: Use your fast-moving horsemen to isolate and destroy Orc war engines.

Shell the Orc archers with your artillery. This will give away your position to the Orcs in the camp. As the Orc horde approaches your position, cease firing with the mortar and peel off some fireballs with your wizard to get their attention. They will conveniently charge into the small gap in the woods where you can ambush them. Turn them back with your warriors and cold steel. There are a few giant spiders in amongst the Orcs, so keep your wizard on standby to give them the fireball treatment.

Once the main Orc force has been cut down, send a unit of men west to attack the archers there and send your cavalry to the centre of the map to destroy the bolt-thrower. Send another regiment of men north up the east side of the map. There are some boar riders lurking there and they should flush them out nicely. Once all your units have accomplished their tasks, send them over to the cave at the west to mutilate the shaman cowering there. Ensure that you recover all the chests before you quit the mission.

Battle For The Steppes

As your weary troops climb the mountains on your way to Kislev, they find themselves confronted by legions of undead. Suspecting treachery you ready your men to break through the undead lines and make their escape.

Don't bother deploying any archers or artillery as they will just get themselves killed. Instead choose fast-moving units and rock-hard infantry so that you can smash your way through the undead. Needless to say, you should put all your units to the west of the deployment zone and place blue movement flags for each of them at the north of the map.

The Grudgebringers will be first to encounter undead in the pass. They should overcome them with relative ease but watch out for that damned skull firer as it has the capability to wipe them all out with one shot. Engage your units with any undead as soon as you spot them as this prevents the skull chucker from firing without hitting its own men. Your units will cut the undead to pieces at close range, so just get them there and they will do the job. The Necromancer that accompanies these nightmares will bring them back to unlife unless you destroy him, so send any spare units you have to end his queer conjuring antics. Only brute force can win this one, so good luck!

Troll Country

Upon meeting your old friend Ragnar in the icy wastes, he offers you a deal. If you help him against the Trolls, he will finally join your army. If you choose to help him, you will have to clear out a nest of Trolls that have been spotted rampaging across the wasteland.

Choose infantry units and cavalry for this mission – artillery proves inaccurate against the fast-moving trolls, and wizards are more likely to die before they can bring their spells into play. Position all your men on the right flank and face two units left: these will protect your cavalry's back whilst they are clearing out Trolls. Put the two units of cavalry facing right: these will be used to slaughter the Trolls.

When battle commences, wait for the Trolls to surge forwards into range of the Grudgebringers' fireballs and give them a few before you charge. Use both your cavalry units to engage the Trolls, then move your slower infantry to surround and destroy the scum. When the first wave of Trolls is down, move your two cavalry units forward to search for more and repeat the tactic above to destroy them.

While you are busy killing Trolls to the front, keep an eye on the left side for any that sneak up on your rear guard. Pull a cavalry unit back to support them if you need to – it's better to let your search wait than to lose valuable men to a surprise attack.

Glacial Assault

As you approach the hand of Nagash, you find the way ahead blocked by the minions of the damned. Determined in your task, you charge your army into battle across the wasteland.

Place your artillery on either side of the deployment zone and ensure that they have a good field of fire – they won't get off many shots but they should kill a few of the undead. Deploy half your army next

Warhammer Dark Omen

to each artillery piece and put the Grudgebringers near the front: they will be used to draw out the bulk of the undead units.

When you have given the call to arms, speed the Grudgebringers towards the Screaming Skull catapult. On your way there, the main force of undead will break through the ice in order to make you one of their own. Pull the Grudgebringers back to the rest of your forces and get ready to repel the undead assault. Pile off shots from your artillery to cover your retreat, then cease fire as the undead get close to your units. Turn the skeleton scum back with your swords and crush them when they reach your battle lines. If your artillery is well placed, be sure to try and cap the Necromancer leading this merry band, as the battle is much easier to win when he is not reanimating the fallen skeleton warriors.

With the first wave defeated, you'll need to get rid of the skull thrower and the undead archers. Charge some troops down the left flank so that they can take care of the archers there, then move your Grudgebringers and the remainder of your infantry to engage the Skull thrower. The undead archers will be easy to cut down, so use a minimum of units to fight them. Instead concentrate on wiping out that war engine.

When the artillery is destroyed, more undead will emerge from the right flank and charge your men. By this time, however, the skeletal archers will be destroyed and you can sweep your army over to the right and eradicate this insignificant force.

The Hand Of Nagash

By the time you reach the glacier, the hand of Nagash will have been recovered from the ice. You must put this foul fiend back in the grave where it belongs. As well as being blessed with mighty magical

powers and lethal spells, the hand also has a large undead force at his disposal so you will have your work cut out for you in this mission.

Deploy your artillery on opposite flanks, as before, and leave a unit of men on the left flank to cover the artillery there. On the right side, place your Grudgebringers and the bulk of your army. If you have any units spare, leave them in the centre so they can support when needed.

Set the artillery on the left to fire at the undead horsemen at the far end of the map. They should destroy them without any trouble. Use the artillery on the right to pound the undead cavalry as they approach, before ceasing fire and letting the Grudgebringers loose amongst them. Use a unit of infantry to take care of the archers that approach and charge all your remaining infantry into the resulting melee. The cannon on the left will by now have come under attack from a group of Wights: charge them with your infantry there and use any uncommitted units to provide support.

When the first undead assault has been crushed, regroup your forces on the left and send your Grudgebringers out to lure any hidden undead into an ambush. When this is done you can at last take on the hand of Nagash. Use your infantry units to take on his undead bodyguard whilst your cavalry have a go at the hand itself. Use repeated fireballs and hammer the hero button like a maniac to take the hand down. Commit any infantry units that break through the undead lines to the assault on the hand – you will need all the help you can get to beat this horror.

The Valley Of The Dead

On your way to Bretonnia you encounter an undead scouting force equipped with many horsemen and powerful chariots. To get to Bretonnia you must drive these unholy adversaries before you and wipe them out to a man.

Position the Grudgebringers and a few units at the mouth of the left canyon. Place your artillery along with your wizard and remaining units in defensive positions next to the right canyon.

Send the Grudgebringers and the units on the left side towards the advancing undead. They need to destroy them quickly in order to ambush the second half of the undead that will be coming down the right canyon. Use your artillery to bombard the second undead vanguard as it approaches you from the right canyon and try to slow it down with repeated attacks.

As the undead close in, cease firing and move your infantry on the right into attacking positions so that they can hold the undead there. By this time your force on the left will have destroyed their undead opponents so you can bring them

Above: The wizard's flaming attacks burn the mummies before they can reach you.

down through the right canyon and charge the remaining skeletons in the rear. With their already diminished numbers, the fresh charge will be enough to break the undead, enabling you to obliterate their unclean forms.

Night In The Glade

As you head to your rendezvous with the Elves, you are surprised to find the undead attacking the sacred Elven obelisk. You must defeat this force to preserve the power off the Elven magic and safeguard the forest from this attack.

Deploy the Grail knights on the left flank along with a unit of infantry, and stack your main attack force on the right to draw the undead force towards you. The undead are equipped with a skull-thrower, so get all your forces moving towards them as soon as you can, to destroy it.

Start the Grail knights towards the undead archers on the right flank and move your main force of men straight towards the undead. The Grail knights will reach the archers and defeat them easily whilst your main force absorbs the brunt of the undead attack. When your main force has begun to attack the undead lines, bring the Grail knights round the rear and hit the war engine whilst its guarding units are engaged in the melee. When the Grail knights are finished, they can begin to attack the undead from the rear and assist in breaking them quickly. With the knights adding momentum to your assault, you will deal with the undead and free up more units to roll up the flank and beat a bloody path through the remaining corpses.

Above: Your Elven archers are the best weapon you can have on open ground.

The Sacred Woods

Having come to the aid of a Treeman in need (how caring), you find yourself defending a sacred grove from violation by undead forces.

This mission is basically a rerun of the valley of the dead. The huge lake in the middle of the map gives the undead two routes with which to attack your army. As in the previous mission, you should place your cavalry on the left flank and charge them forward towards the undead horde that attacks there. On the right you should place your stalwart infantry units and your wizard. If you have the mortar, place it on the hill in the centre of the deployment area as this will give it a huge field of fire.

Charge your cavalry forwards and engage the undead on the left side. Use all the magic weapons at your disposal to break through quickly. Hold off the undead on the right side with your mortar and wizard to give your cavalry a chance to break through. When the undead get close to the forces on the right side, charge them and wait for your victorious cavalry to ride round the lake. On the way round the cavalry will undoubtedly encounter the Necromancer and his bodyguard of Wraiths. Plough through these and butcher the Necromancer where he stands. This will weaken the remaining undead enough for you to swing the cavalry round the right side of the lake and finish them off.

Above: Once you have three cavalry units, not much can stand in the way of your army.

Undead On The River

As you approach Moussillon you will happen upon a group of undead blocking the river. As usual they must not be allowed to stop your progress. You give the order to rend them asunder.

Deploy all your artillery in front of the trees on the bank of the river. Ensure that they can target at least one of the undead units in sight. Place your cavalry on the left side of the deployment zone near the ford in the river and put the infantry behind them.

Open fire with your artillery and destroy the undead units on the bank of the river. You will be out of range of their arrows so you can eliminate them at your leisure.

When the undead have taken a beating, they will send some units across the river to silence your cannons – these will make a fitting target for your massed cavalry. When the first wave is destroyed, you'll have to send a unit of cavalry across the river to lure the remaining undead out of hiding. Pull them back when the undead are spotted, so that you can weaken them with your cannon before you take them on at close quarters.

Once the second wave of undead has been put in the ground, all that remains is for you to hunt down and kill the few remaining archers that are hidden on the far banks of the river. This is easily accomplished with a few cavalry detachments.

Horror On The Wooded Trail

After recruiting some Elves to your army, you continue west to Moussillon only to find the woods that you must pass through infested with an undead force commanded by a dread vampire lord.

Place your artillery on the left side at the clearing between the trees so that it can target the undead archers there, and place two infantry units near it for protection. Place your cavalry on the right side and any remaining units in the middle to add support when it is needed.

When the battle begins, send the cavalry on the right to destroy the approaching undead horsemen and the archers that are supporting them. If you have any spare cavalry, send them to try and kill the vampire lord. When the undead warriors on the left side begin to get close, order the artillery to target the units behind them, then send the infantry to attack the warriors that are closest.

When the undead on the left are wiped out, more will appear to attack the right, so send all the infantry there to support your cavalry which will come under heavy attack. With your forces massed on the right side, it is just a matter of time before you break through and turn the undead tide straight back to hell.

Rampaging Orcs

If you choose to help the Bretonnian knights, you will have to stop the Orcs from pillaging the outlying towns. Even with the Bretonnian knights in support, this is no easy task.

Deploy artillery on both flanks and place an infantry unit with each. Place the Grudgebringers on the right and the Bretonnian knights on the left, then put any remaining units in the centre.

Leave your men in place as the Orcs advance menacingly towards you – if you advance, their bolt-throwers will cut you to pieces. Use your artillery to attack the

lead units, then switch targets when the night Goblins appear. The night Goblins have ball-and-chain berserkers hidden within their ranks, so it is imperative that you destroy them before they reach your troops. Attack the Orcs when they get close but be aware of the bolt-throwers when you attack. Your cavalry should hold up the Orcs long enough for your infantry units to join the assault, and their combined might should be enough to wipe them out.

Pull your units back and allow your artillery to deal with the next batch of black Orcs that appear on the map. Charge the remnants of the Orcs with your infantry and let the cavalry have the more dangerous task of finishing off the bolt-throwers.

The Gates Of Moussillon

As you reach Moussillon, you'll find the gates heavily defended by undead. There is only one way through – the hard way!

Deploy all your units at the very rear of the deployment zone as this will ensure that they are out of range of the skull chucks. Place your artillery in the centre and set it to fire at the units of archers there. Put the Grudgebringers on the right side of the deployment zone and any other cavalry you have on the left. Spread the infantry out in the deployment zone – they don't play a major part in the first stage of the battle.

Start hammering the archers with your artillery and hold all your units in the deployment zone. If any archers get close enough to shoot at your men, charge them immediately with your horsemen. Pull them back to your lines as soon as they have defeated their opponents, though, as the skull throwers have little regard for their own units and will fire indiscriminately at anything that moves.

When the archers have been destroyed, send your cavalry over to the

Warhammer Dark Omen

right side and attack the undead there. Bring in a couple of infantry units to help you overwhelm them if you need to, but leave a couple in reserve to hold the left flank. Once the undead on the right have been crushed, move your forces there up to the windmill and conceal them on the right side of it. Start moving the troops you left at the deployment zone up to attack the undead in front of them. As these men move in, send the troops behind the windmill to attack the flank and destroy those bastich skull-throwers. Caught in your pincer attack, the undead at the top of the screen will be routed quickly, allowing your surviving forces to move down the left flank and rip through any undead that have not fled.

The Black Grail

As you reach Moussillon itself, you realise that despite your best efforts the Grail knights have risen from their tombs to wreak havoc on the living world. You must return these poor unfortunates to their eternal rest by means of your sword.

Place the Grudgebringers and two units of sturdy infantry on the left flank and place the artillery on the right. Put a couple of infantry units next to the artillery and deploy some archers nearby. Any remaining units should be placed on the left side in support of the Grudgebringers.

Start the Grudgebringers and their accompanying units up the left flank and destroy the archers there. Whilst you are doing this, more undead will emerge from the tombs to attack your advancing forces. Get the artillery and archers to strafe any units that cross the middle of the screen and any units that attack them directly. The undead on the left will soon be overcome by your superior force and you should entrench your men there to await the forces of darkness.

If the Grail knights attack, you will need to commit as many units as you can to destroying them as they are tough hombres. Once they are surrounded, expend all your magical weapons and power to reduce them to dust – if you don't kill them quickly they will inflict heavy casualties upon your troops. Whilst this is happening, your artillery should have taken care of the undead on the right. If they run out of things to shoot at, send the infantry stationed with them to support the attack on the left and ensure victory.

The Final Battle

After the defeat of the grail, you return to Altdorf. This time you are given the location of the dread king. Now you must travel to the black pyramid in the desert, raze it to the ground, and bring back the king's head on a plate. Take note of the Emperor's warning: this is going to be a fight to the death, more than likely yours!

Deploy your force in the bottom-left corner as this will put you out of range of the skull-throwers. Place your artillery in the centre of your force and put your cavalry on either side of it. Deploy any archers you have in the centre with the artillery and a wizard if you have one. Drop all your infantry in behind your main force – they aren't going to be needed until the end of the battle.

When the battle begins, three units of mummies will be advancing on your position; let them come. Lay down heavy fire with your archers and artillery to reduce their numbers and rain fire on them with your bright wizard and the Grudgebringer. When the mummies get close, surround them with your cavalry and ride them down, adding infantry to the ensuing melee if required. The second wave of mummies has to be lured out. Select some expendable cavalry or useless infantry and march them down the centre of the screen. This should bring four units of mummies out of hiding. Get your unit back quickly to avoid making it an easy target for those damned skull-throwers. Hit the mummies as they approach and surround and destroy them as before when they close.

Now comes the hard part: dealing with the two units of mummies in the centre without getting burned alive by the skull-thrower. This is best accomplished by using your wizard or the steam tank, as these are both very hard to hit as they are such small targets. Get within range and blast them back to the grave. If you do this successfully, the dread king himself will start towards your lines. Pull the mummy-destroying unit back and hit the king with everything you've got. If he manages to get in close, send in everything you have to surround him and cut him down.

With or without the undead king slain, your next move should be to take out the skull-thrower and the archers on the right flank. Charge the thrower with some

cavalry and hit the skeleton archers with some of your own arrows whilst your infantry engages them. With the right section of the map in your hands, get all your units hidden to the right of the pyramid entrance: this will give them surprise in the final assault on the undead. On reaching cover, charge everything you have left at the remaining undead. You should catch them by surprise, hack them down, and ride their bones into the dirt.

Above: Kill as many mummies as you can before they get close enough to scare your men.

The End

You plunge your sword into the dread king's black heart and condemn him to eternal damnation and torment at the hands of his vile masters – a fitting end for one such as he.

Tekken 2

Probably the most played game on the PlayStation, Tekken 2 is all set to win a new set of fans with its rerelease on Platinum – a bargain and no mistake. Having done some extra martial arts training since, we've revised our original guide and added more moves – this time with their English names.

PURPLE KAZUYA

- 1: All the secret characters must be accumulated first.
- 2: Start a new game and highlight Kazuya.
- 3: Now hold down Start while selecting him.
- 4: He'll now fight in his third, purple costume.

guide

continued

BIG-HEAD MODE

- 1: Acquire all the hidden characters in the game.
- 2: Start again but hold down the Select button when you select your fighter.
- 3: Keep it held down until the round begins.
- 4: You should now see that your fighter's head has been blown up!

**BIGGER-HEAD MODE**

- 1: First perform the Big Head Mode cheat.
- 2: If you're playing in arcade mode hold down Select when you reach the continue screen.
- 3: Your head and arms will now be bigger than ever before!
- 4: If playing in Vs Mode go back to the character select screen and hold Select again while choosing a fighter for the same effect.

**THOUGHT BUBBLES**

- 1: Play in practice mode.
- 2: Leave your character alone for a while.
- 3: You'll now see a thought bubble appear above his or her head!

**OBTAINING KAZUYA MISHIMA**

- 1: Acquire all the sub-bosses by completing the game using each of the ten original fighters.
- 2: Play through using a sub boss.
- 3: Once completed, Kazuya will be added.

DEVIL/ANGEL

- 1: Complete the game with Kazuya.
- 2: Now these two characters will be added.

ROGER/ALEX

- 1: Once you've got the Devil and Angel...
- 2: Start a new game with any character and when you reach the third fight, defeat your opponent on the last round with only a particle of energy left.
- 3: If you do it right you will hear the word 'Great' and the next fight will be against Roger or Alex.

Tomb Raider

No-one ever said Lara Croft was cheap – until the rerelease of her first great adventure on Platinum! So for those who missed it first time around, here are the cheats and locations of all the secrets.

SECRETS

LEVEL 1 – CAVES

1. Jump to ledge from sloped rock in large square room near start to get small medikit.
2. In cave to left of where bats first attack, go right into the corner with the snowdrift and climb up to ledge above for small medikit.
3. In room with stairs, wolves and timed door switch, jump from rocks to ivy-covered ledge to find large medikit.

LEVEL 2 – CITY OF VILCABAMA

1. Pull lever in the underwater chamber to open door in the pool with serpent fountains, leading to small medikit and Magnum clips.
2. Pull other lever in the underwater chamber to open hatch to the room above for small medikit.
3. Go upstairs to the left of locked gate and gold idol imprint. Opposite the switch (which turns off blades) is a secret tunnel leading to Uzi clips.

LEVEL 3 – LOST VALLEY

1. Climb ledge to right of right waterfall at end of valley for shells.
2. Climb up twice between the two waterfalls, jump over to ledge and shimmy

- to middle-top of right waterfall, pull yourself up to find shells and Uzi clips.
3. Heading for the temple to left of the valley, climb ledge in right cliff, then jump left to the second ledge. Grab the third ledge, then leap and grab fourth ledge. Do one more giant leap onto the temple roof for a large medikit, Magnum clips, Uzi clips and shells.
4. On the bridge by the cog mechanism, drop off and grab side, shimmy left and drop onto a rock. Go up and turn left for large medikit.
5. Swim down flooded channel and surface in room with shells and small medikit.

LEVEL 4 – TOMB OF QUALOPEC

1. In passage leading to Scion room, climb up just to the right of last dart pipe, squeeze next to idol and run across room of crumbling tiles to get shells in left corner.
2. After Secret 1, drop off ledge and shimmy to outside wall and drop onto spiked floor. Walk (don't run!) through spikes and collect Magnum clips under

ledge you were just on. Walk through all spikes to the door above and climb up and out.

3. Before finishing off Larson in the final shoot-out, swim to bottom of pool and find small tunnel leading to large medikit and Magnum clips.

LEVEL 5 – ST FRANCIS' FOLLY

1. In main hall, climb push-block and jump to ledge on right wall. Leap onto the left slope, jump again to somersault backwards onto the opposite slope, jump and grab the platform. You must repeat the process on the upper slopes to reach the secret area with a large medikit and shotgun shells.

reach bottom to land on small ledge, then look to left of water for hidden passage. Do running jump into it to collect shells.

2. Shimmy along crack above crocodile pit and climb up to find shells.

3. In the colosseum corner room with lots of pillars, walk right up to one of them

2. Through upper doorway, slide forwards down slope towards water and jump just before you reach the end to land on small ledge. Jump across and grab doorway to get shells and small medikit.

3. In water channel, swim up into first opening to get shells.

4. Tricky! After pulling lever to open Thor door, jump to right to land on grey square which opens secret door on bottom level. You have to be fast to reach it before it closes. Immediately turn right and run: as you reach edge, roll so Lara flips over and falls (grab edge to lessen damage of fall). Run forward and use the same roll technique at the edge. Run forwards, shoot the two bats, and fall over edge (a long, damaging fall) to reach secret door and collect large medikit and Magnum clips.

LEVEL 6 – COLOSSEUM

1. From ledge leading to the crocodile pit, slide down slope and jump when you

the small medikit and Magnum clips in the left corner.

2. Grab and drop off the edge of the T-shaped pool to find shells, Uzi clips and small medikit.

3. Returning from the Midas room, go to right corner of garden, next to entrance gate. Shuffle right behind the tree to find a concealed switch to open gate to right. Enter and jump through the snapping doors to find shells, Magnum clips and small medikit.

LEVEL 8 – CISTERN

1. In room with flood switch, jump onto ledge on right, then jump up and grab ledge above. Get medikit then jump to top of slope on right. Turn left, grab ledge, and climb up for secret shells.

2. In main pool, swim through small tunnel in the west side for Magnum clips.

3. After collecting the gold key, go up stairs to locked silver doors, turn left and push block into the wall. Enter and jump to ledge for large medikit and two Magnum clips.

Above: By jumping up the right ledges in the flood switch room, you can find a secret area.

Below: You can swim through a small tunnel in the west side of the main pool for a secret.

guide

continued

Above: Stepping in turn on the three grey-edged floor panels in the pit opens this secret door.

LEVEL 9 – TOMB OF TIHOCAN

1. Go down past snapping doors to the large crocodile pit. Step on the three grey-edged floor panels (look down from stairs to see them more clearly) to open a door in the corner. Enter and turn to face the door, jump left and hold the button to make multiple leaps to shells and a medikit.
2. When sliding down the slope into the large pool, keep jumping left just before the end to discover a secret room. You need to jump across a set of crumbling platforms: turn so Lara's right side is facing the first tile, then jump right, forward, right, right, back, right to reach Uzi and Magnum clips.

LEVEL 10 – CITY OF KHAMOON

1. In the large room with the crocodile, slope and pool, climb up ledges to left of the cat-statue temple. Turn left to find a secret room containing Magnum clips and large medikit.
2. After climbing via golden bridge into room above the upper pool, head for silver gong and jump to left ledge. Turn right and jump to rock ledge and go to end for Magnum clips. Slide down slope to left

Above: Climb up the ledges left of the cat-statue temple, then turn left to find the secret room.

and get medikit, then jump to paw on your right. Jump to green ledge on your left and get Magnum clips. Get on slope, then jump to the ledge above ramp for some secret Uzi clips.

3. In darkened room with panthers, go to far-right corner and run along back wall until you hit a ledge: climb up to reach a bridge. Cross over it to middle ledge, go to left and shoot panthers below. Jump to alcove in corner for secret shotgun shells.

LEVEL 11 – OBELISK OF KHAMOON

1. In upper chamber above room with slopes, take a running jump from left of ledge to the top of the obelisk in the bridge room for Uzi clips and medikit.
2. From the obelisk top, locate the silver gong below and run-jump to reach it for Uzi clips and medikit.
3. Go through north door in bridge room and climb stairs to left. Grab crevice and shimmy right until you can pull yourself up. Turn and jump to ledge on right and enter tunnel for Magnum clips and large medikit.

LEVEL 12 – SANCTUARY OF SCION

1. Just the one secret on this level, but it's a good one. After using the two Ankhs at the top of the Sphinx's head, walk along left side of head until you can't go any further. Look down to see a gun clip floating magically in midair.

Tomb Raider

Jump over to it and land on an invisible ledge to collect the long-awaited Uzis plus ammo!

LEVEL 13 – NATLA'S MINES

1. After lowering the hoisted cabin, climb onto its roof and jump up to the tunnel in the east wall. Climb up to the right of the tunnel and go through the opening gate to find a trapdoor between two slopes. Turn around, slide down backwards and grab hold of the ledge when the door opens (revealing lava below) – haul yourself back up to close the trapdoor. You can now climb up to into the adjacent secret room for large medikit and Uzi clips.
2. In the long lava chamber with the pillars, jump to the left one, then to the next middle pillar. Jump across to the tunnel entrance on the right. Immediately run forward and push the block to avoid the rolling boulder. Climb up in the corner of the room to find Uzi clips and a large medikit. (From here you can run down the tunnel in the corner and drop to some more tracks to find a large medikit, Uzi clips and the shotgun.)
3. After killing the Uzi-toting skateboarder, look for the hole with water instead of lava. Dive in and swim through the gate for Uzi clips and small and large medikits.

LEVEL 14 – ATLANTIS

1. After opening the central door in the far wall of the first hall, go to the ledge above the square lava room and drop backwards to grab onto the block below. Climb up into the secret tunnel for Uzi clips, Magnum clips and large medikit.
2. After jumping via the dark ledges across the pyramid slope (by pool), there are some more invisible ledges leading to a secret area at the top-right. From the furthest dark ledge, jump forward-left, then forward-right twice, and climb to the tunnel on the right for Uzi clips, Magnum clips and large medikit.
3. In the long red hallway, go into the corner opposite the entrance to activate a hidden pressure plate, then immediately run up the hallway – blasting the demons which attack – and get through the door on the right side before it closes to find a large medikit, Uzi clips and shotgun shells.

LEVEL 15 – THE GREAT PYRAMID

1. In the lava room with two slopes, jump via the dark ledges: turn right and do a standing jump, then another one forwards. Turn left and jump to the ledge on the opposite slope, then turn right and jump to the next ledge on the original slope. Now, if you look back to the start of the room, you'll see that a bridge has been raised. Jump back the way you came and cross the bridge before it drops to find a secret room with large medikit, Magnum clips and shotgun shells. (Use the switch twice to raise part of the bridge again.)
2. In the long room with the sloped pillars, you can jump from the starting ledge to grab the blood-stained wall to the left of the crevice on the left side of the room. Shimmy right to the upper ledge at the end for a large medikit and Uzi clips.
3. When you reach the long drop (to the tiny pool) and the swinging blade, there's a secret area hidden behind the latter. To reach it, walk to the edge of the sloping ledge and walk a couple of steps backwards, then hop back once. When the blade is at its lowest, do a running jump over to the crumbling platform, holding forward and jump to leap onto the ledge behind. Go through to find a large medikit and Uzi clips.

Left: This bridge to the first secret area only appears when you land on a certain part of the slope. Turn back and quickly jump to it before it lowers again.

joypads memory cards sound systems light guns hardware software gizmos

What's wrong with adding a little colour into our lives? According to SCEI, nothing! Which is why, months after PlayStation accessories competitors have tried and failed with sickening colour schemes, Sony have decided to finally show them all how it should be done. We also bring you an update on what Sony's PDA looks like, and reviews of the latest PlayStation accessories.

Sony Accessories In 'Technicolor'!

New Colours For Dual Shock Analogue Joypads & Memory Cards

With many multicoloured third-party joypads and memory cards already available, it was inevitable that Sony Computer Entertainment Inc would release their own official joypads in a wonderful array of colours.

Although there have only been two colours released in Japan to date – 'White' and 'Black Diamond', retailing for 3300 yen (£16.05) – this month sees the release of a further four tasty-looking colours: Crystal, Smoke Grey, Emerald, and Island Blue.

As for the memory cards, there are nine different colours available: Gray, Emerald, Island Blue, White, Cherry Red, Crystal, Lemon Yellow, Candy Orange and Black; retailing for 1800 yen (£8.76). And unlike most third-party colour accessories, Sony's

chosen colours work well, and don't make you want to vomit uncontrollably!

So far, there has been no word as to when these fantastic new accessories from Sony will be released over here – although one thing is for sure, they'll certainly be more expensive than their Japanese counterparts.

PDA Update

Latest Picture Of Sony's Personal Digital Assistant

After weeks of speculation, we can finally reveal what Sony Computer Entertainment Inc's much awaited Personal Digital Assistant looks like – and it's not that much bigger than a memory card. As revealed last issue, this new LCD gaming/organiser device can be connected to your PlayStation to transfer data. Although the PDA may seem tiny, it promises a lot for something so small. But as the saying goes, 'size isn't everything' – well that's what our ex-editor Ryan always says!

Special Tekken 3 Joystick

Hori To Release New 'Real Arcade' Tekken 3 Joysticks

Released in Japan on the same day as *Tekken 3* (March 26th), Japanese accessory suppliers Hori have made a special joystick for the game, called 'Real Arcade'. In order to retain the arcade feel and simplicity, the Select button and all L and R buttons have been removed; just leaving the four symbol buttons and Start button.

The appeal to such a design remains to be seen – particularly in Europe – but no doubt keen *Tekken* fans will be fighting one another in the streets to get a hold of this limited edition accessory, of which 30,000 will be made. In addition, three Character Cards will be included with the joystick – collector's items in themselves.

The Real Arcade joystick will retail for 3,980 yen (£19.36), but will no doubt cost an arm and a leg through import shops.

Gunz-T Tilt Control Shooter

Supplied by: Act Labs

Price: £TBA

It's been five issues since we reviewed the original Gunz light gun, and you'd think a few lessons would have been learnt after that fiasco. A few months down the line and along comes the Gunz-T light gun – the 'T' standing for 'Tilt' no less! Unfortunately it's the same cheap plastic design, only in a different colour – and it still looks like something out of Mars Attacks!

This time, there are a few extra functions. The first is a rather annoying Tilt Control system: you simply tilt the gun more than 45° to the side to make your game character duck. Although a good idea in theory – and perhaps *Time Crisis* – in practice it's anything but helpful. Most games don't have a ducking option; and when we laid the gun down for a rest, it started auto-selecting things on-screen!

Undoubtedly the best aspect to the Gunz-T is the Guncon mode – thus enabling you to play Namco games. The aim is pretty accurate, particularly when using the Guncon option. However, Guncon compatibility is rapidly becoming standard, and unfortunately here it's been attached to a rather substandard gun.

WIN Aiwa TS-CD20 Active Speaker System

In the last issue of PowerStation we reviewed this rather tasty Aiwa Speaker System set (RRP £120); and it's still getting 'tested' on Paul's desk every day!

Three of you lucky winners will have the chance to win one of these superb PlayStation accessories, kindly supplied to us by those nice people at Aiwa.

How To Win!

All you have to do for a chance of winning one of these fantastic sound systems is answer the following question:

Q. Name three other electrical products that Aiwa produce (eg Hi-Fis)

Write your answer on the back of a postcard (or sealed envelope) and send it to: Aiwa Comp. PowerStation, Paragon House, St Peter's Road, Bournemouth BH1 2JS.

Entries must arrive by 21st May at the latest and the editor's decision is final.

Battle Arena Toshinden 2

Last Boss

At the title screen press \triangle , \square , \circ , \times + \triangle to access the last boss.

Select Bosses - The Hard Way

Complete Battle mode on skill level 4. Then, when you go to pick your character, the random select will show the normal two bosses, Uranus and Master, which can now be selected. Complete Battle mode on skill level 6 (with no continues) and two more bosses will be selectable: Sho and Vermillion.

Now, to get the last secret guy, Grim, you have complete Battle mode on skill level 8 using Vermillion. Then on the title screen, press \triangle , \square , \circ , \times , R1, \triangle , L2 and \square . You'll know if you've done it right, because you'll hear a bell.

To select a boss highlight the ? on the character selection screen and hold down the Select button to slow the scrolling. Now press \square , \triangle , \circ or \times when the required boss appears.

Easy Select Uranus & Master

On the title screen, as the menu items fly in from

the left, quickly press (on controller 1): R1, L2, \times , L1, R2, \circ . You'll hear a jingle if it's worked. Now go to the character select screen and highlight the random box. By timing your button press, you'll be able to select Uranus or Master.

Easy Select Sho & Vermillion

Once you've activated the Uranus & Master code, wait until the menu items fly in from the left again, and quickly press (this time on controller 2): \circ , R2, L1, \times , L2, R1 (the reverse of the previous code). You'll hear a jingle if it's worked. Now go to the character select screen and highlight the random box. By timing your button press, you'll be able to select Sho or Vermillion.

Secret Moves

After beating the game when Sho and Vermillion are available, the menu box should turn green. This indicates that the instant secret moves feature is enabled and you can now perform them by simply pressing the R1 and R2 buttons together.

Armoured Gaia

It seems that this one only works on the Japanese

import version. Select Gaia and before it says "Fight", quickly press \triangle , \square , \circ , \times . If done right, about five huge chunks of armour will fly all around Gaia and mould to his body: you now have Armoured Gaia! Hits only cause half damage to him, but he is slow-moving. He also has a spectacular new desperation move.

Candid Camera!

On the options screen set all R1, R2, L1 and L2 to 'NOT USED' and then set the camera option to 'CONTROL'. Cycle through the R1, R2, L1, L2 options again until all of them are set to 'CAMERA'.

Now you can rotate the camera by pressing R1, R2, L1 and L2 when paused or fighting. You can turn off the gauges by pausing the game and pressing \square + \triangle + \circ + \times + Select on controller 1. The options menu will disappear. Press them again and the energy and overdrive gauges go. Press them again to get back to normal or Start to play without them! When you have no gauges selected you can control the zooming and vertical scrolling with R1, R2, L1 and L2.

Shrunken Ring

Finish the game with Greg on a skill setting of four or more to get the option to fight in a small ring.

Open Ring

Finish the game with Mitsuko on a skill setting of four or more to get the option to fight without walls

Blind-Man Walls

Finish the game with Fox on a skill setting of four or more to get the option to fight in an arena with invisible walls.

Healing Mode

Finish the game with Bakuryu on a skill setting of four or more to get the option to fight with slowly returning energy.

No Health

Finish the game with Yugo on a skill setting of four or more to get the option to fight without energy bars.

Cameraman

Finish the game with Alice on a skill setting of four or more to get the option to control the camera position.

Trippy Mode

Finish the game with all the fighters on a skill setting of four or more to get the option to fight in arenas with far-out scenery.

Lightning Conductor

Finish the game with Long on a skill setting of four or more to get the option to turn lightning off.

No Bandits

Finish the game with Gado on a skill setting of four or more to get the option to prevent all blocking.

Monkey Men

Finish the game without continuing on a skill setting of four or more to get the option to lengthen the fighters' arms!

Extra Costume

Complete Time Attack mode in under

ten minutes and you will be able to choose Alice in her school uniform.

Different Angles

Press Select as you strike the knockout blow during a fight to view the replay from different angles.

Change Scenery

When you complete the game on Arcade mode you can change each character's ending screen scenery by holding \triangle or \square on the D-pad.

Blood Omen: Legacy Of Kain

Get 99 Items From A Spirit Forge

Instead of going into a spirit forge in person, take over an enemy with the mind control or spirit rack spells and send them in your place. Their life will be forfeit but you will gain 99 items.

Bogey Dead 6

Access All Fighter Jets

Go to the plane selection screen and enter the following code: \triangle , \square , \circ , \times , \triangle , \square , \circ , \times . Select. You'll hear a shout to confirm that the code was entered correctly.

Access All Missions

Choose Mission Select from the Game Menu and press the following buttons: \triangle , \square , \circ , \times , \triangle , \square , \circ , \times . Once you've entered this code you should hear a shout to confirm that it was entered correctly.

Bubble Bobble

Cheat Mode

On the start screen press \triangle , \square , \circ , \times , \triangle , \square , \circ , \times . A message will appear to signify that the code has been entered correctly. When the message has come up, start a game as normal then, during play, press the following buttons:
R1: Skip to next level
L1: Return to previous level
R2: Bring up an options menu.
L2: Confirm selections on the options menu.

Brahma Force: Assault On Beltlogger-9

Easy Mode

Hold \triangle + \times + \square , then press Start at the 'Press Start Button' screen.

Hard Mode

Press L1, R1, L2, R2, \square , \triangle , \circ at the title screen.

Flight Mode

Complete the game in less than 1:30:00. Hold L2 + R2 and press \times on

controller 2. Then, during play, press R2 on controller 1 to climb, and L2 to dive.

Bonus Options

Use a memory card and complete the game in less than 1:30:00. Press Start after the title screen appears again. Choose the 'Special' selection on the screen to access level selection,

view FMV sequences, enter sound test mode, and other options.

End Game Bonus

After completing the game, regardless of time required, hidden areas will be visible on the map. Additionally, you will retain weapons and ammunition. However, SAPs will be reduced by half.

Bubsy 3D

Secret Passwords

Choose Load Game from the main menu and enter these codes as the password.
XMUCHOLIFE - 99 Lives
XTOOROCKER - All rocket parts
XBNSCHTMM - Go bonus rounds.
XLVLCHTMSB - Level select
XZOOMMERKB - Level warp (during the game, press \triangle and Start to warp to different bits of level)
XDBGLOCNC - Pause screen coordinates

Burning Road

Mirror Mode

Select Practice, pick your track, car and transmission. Now as soon as the race starts, turn your car around and go the other way. As soon as you pass through a checkpoint you'll be placed in first, and the other cars will turn and follow, although it'll take them a little while to catch up. Now race as usual, but you'll have three more tracks to play with.

Bushido Blade

Second Endings

To see the alternate endings, you must follow these rules strictly:

1. The *Bushido Blade* 'Code Of Honour' must be obeyed at all times.
 2. You must not take any hits until you face the final boss.
- Defeat the first opponent without taking a hit, no matter how slight. When you face the second opponent, hold down L1 and run to the well at the construction site. Before jumping into the well, take out your opponent's legs - this way you won't have to face them before jumping to the fifth fight. Defeat the fifth opponent and the following four bosses without receiving a hit. You'll face one of three hidden bosses: Kindai, Hongou or Black Lotus (in bandages). Defeat them (the no-hit rule doesn't matter any more, then use as many continues as necessary to defeat the final boss and reveal the hidden ending for that character.

Obtaining Katze

The ultimate test of your skill can be found in Slash Mode; because at the end of it lies the opportunity to control and select Katze as your character. However, you must kill all 100 opponents WITHOUT getting killed - that means no continues at all. If you die, you must exit Slash Mode, then begin again from opponent number one. Once you've completed this near-impossible task, you can choose Katze in Vs Mode and Practice Mode. Just move the selection box off the side of the screen next to Red Shadow or Kannuki. If done correctly, there will be no cursor or character shown. To select Katze, simply press \circ .

Play A Link-Up Game With One Disc

Load up the game on one machine, then select link-up mode. Take the disc out of the machine, then load it up on the other PlayStation. Select link-up mode on the second PlayStation, then select weapons and characters to begin the link-up. The game should freeze at this point: now put the disc back in the first PlayStation and the link-up game will load up! If the game freezes again, keep swapping the disc to unfreeze it.

Bust-A-Move

(Puzzle Bobble 2)

Modified Levels

On the selection screen (where you get Game Start, Time Attack, etc) enter R1, \triangle , L2 and \square . The single-player 'story mode' should now have the words 'Another World' below it and contain modified versions of the original levels.

Credit Cheat

Go to Option mode and highlight Credit. Press \triangle , \square , R1, R2, L2, L1, \triangle , \square . Then press \times repeatedly to increase credits before the timer runs out - with rapid button pushing, you can get them up to 29.

Character Select

Start a Puzzle game. When the stage map appears, press \triangle , \square , \circ , \times . Then press L1 + L2 + R1 + R2 and a Character Select screen will appear. Use \triangle and \square to select a character and press \times to continue. You'll still see Bubby on the Map screen, but your new character will appear!

Casper

Drift Over Walls

This cheat enables Casper to glide over any walls so that you can get to unobtainable areas without having to painstakingly get the necessary keys and suchlike. To activate it, simply go to the top-left corner of any room and press the following code: \triangle + L1 + R1 + Start. You should now notice that instead of pausing, the game will merely freeze. Keep those buttons held down and press \triangle . The game will unfreeze and by pressing R1, you'll be able to float up over the walls.

Mega Secret Room

Now this is incredible! This cheat will allow Casper to stumble upon a hidden room that contains every morph icon, every item needed to defeat his uncle bosses, plus loads of keys and other useful objects. In the main entrance, activate the drift-over-walls cheat and then go up the left-hand flight of stairs leading up to the first floor. Once on the first floor (the one with the blue doors), turn and face the staircase you just climbed and then press R1 to float upwards. The aim is to float high above and over the beam above the staircase and then keep drifting downwards until a new room comes into view.

Turbo

To make Casper travel faster than a speeding bullet, simply press \triangle + \times , R1, R1, R1 at any point during play to make the mischievous ghost get his little white arse into gear! Please note that whilst accessing this cheat you will go into the inventory screen, so after you've finished pressing R1 for the third time, press \triangle again to return to the action.

Rub-A-Dub Sub

There are four hidden subs for you to uncover in this watery game:

Sub 1: Mr Phatt

Complete the game on the Medium difficulty setting and you will be the proud owner of Mr Phatt's nifty little submersible.

Sub 2: Agent 326

Agent 326 becomes available when you have completed the game on the Hard level using Mr Phatt's submarine.

Sub 3: Abadon

If you want Abadon in your inventory, completing the game on Hard using Agent 326 is the only way to do it.

Sub 4: Overseer

To get this rather lethal chappie to float round in, you have to complete the game with all the initial characters.

Copy Prize Cars

Go to Keepsies mode (via Party Play) and load up another character, then your main one (with lots of cars) – the order is important! For example, load Spider and Dwayne. Select a good car for Dwayne (eg the Beamer) and any for Spider, then choose any track and make Spider win. Choose 'No More Races' and when the 'Update Characters?' option appears, say yes and let it update Spider, but when it comes to Dwayne take out the card and press Cancel. Now go to Test Drive and load up Spider:

Big Bounce

During race, press:

□, ⇨, ⇩, ⇧, ⇨, ⇩, ⇧, ⇨, ⇩, ⇧

A beep will indicate bouncy mode is enabled. To return to normal, re-enter the same code.

Double Speed

During race, press:

□, X, O, □, △, X, X, X, X

A beep will indicate it's worked. To return to normal speed, re-enter the code.

Debug Mode

During the race, press:

□, ⇨, ⇩, ⇧, ⇨, ⇩, ⇧, ⇨, ⇩, ⇧

A beep will indicate it's worked. You can now do several things...

Select + X – Quit the race and automatically win it.

Select + ⇨ ⇩ ⇧ – Change camera angle

Select + L2/R2 – Zoom camera in/out

CPU drone

X + △ + O + □ – Blow up all cars

Nine Lives In Single Player Mode

Enter 'CATLIVES' as a player name. A sound will confirm correct code entry.

All Tracks In Multiplayer Mode

Enter 'GIMMEALL' as a player name. A sound will confirm correct code entry.

Floating Objects

Pause during race and press:

□, △, □, □, △, □, □, △, X

Turbo Start

Begin to accelerate just before the second beep. If timed correctly, you will begin the race with a turbo start. The phrase 'turbo start' will appear to confirm it's worked.

Racing Shadow

Go to the game options, select 1 Player Mode, pick any character, and enter his/her name as 'TANKS4ME'. Then press 'OK' twice and choose Time Trial Challenge. When it's loaded, press Start and enter the Big Bounce cheat (⇨, ⇩, ⇧, ⇨, ⇩, ⇧, ⇨, ⇩, ⇧). Quit the game and it will ask if you want to play another challenge. Say yes. Below your picture it will say 'cheat mode active'. When the race begins and the countdown is over, your shadow will drive away on its own! What a thrill!

Kileak The Blood

Cheat

To start off the game with everything, follow these instructions. At the title screen, where the little 'perms' are congregating, press O six times then rotate the D-pad three times, clockwise from Right. Then hit △, □, △, X, Start.

Invincibility

When the intro screen comes up, push

this combo three times in less than five seconds: △, △, ⇨, ⇩, ⇧, Select, L1, L2, R1, R2. The background will turn blue.

Lifeforce Tenka

All Weapons

Press L1 + R1 + Select + Start during play.

At the Create Player screen (via Front Office menu), enter the following names (and save created players) to gain access to hidden teams.

At the Create Player screen, enter the following names for hidden stadiums. After entering the code and saving the player, go to the Stadium Select screen and scroll down until you find the new stadium.

Secret Characters

Type the name of the producers and programmers names in the 'Create A Player' option. Make sure you push Start at the last letter of each name otherwise it won't work. It will put them on the free agency list. It won't count as a created player, so you can have all the producers and still make 40 new players.

Secret Codes

This cheat is dead tricky to activate but worth it. After the game has started and you are at the Game Setup menu, press: L1, X, X, L1, X, R1, X, R1, (which should take you to the Credits screen). Then hold (for a second or two) X + A + B to activate the secret codes.

Now start the game as normal and, as soon as it starts loading, hold L1 + R1 + X + A + B + X + B + X as long as it takes for the

secret code menu to appear. (Top tip: use a CD case to hold down the four fire buttons.)

1. On the secret code screen, L1 and L2 alter player height up/down. The number is in inches (min = 1.5 feet; max = 12 feet). Note: Any height greater than 7'10" cannot slam the ball.

To change all the players on the cheat list, you must use a PlayStation Multitap with all controllers plugged in.

2. D-pad up and down control Chameleon mode (flashing colours).
3. Start and Select on controller 1 set the outdoor court on/off.
To exit the cheat area and go to the game, press X + X on controller 1.

Motor Toon Grand Prix

Turbo Start

If you want to give yourself a bit of extra speed in this wild and crazy driving game, then first of all try holding down the accelerator button (X) when the yellow light comes on.

Screaming Speed

To accelerate to top speed with any of the racers in just one second, and stay at top speed, simply hold down the reverse button while accelerating. Hmm, I wonder if you can do this is a real car?

Namco Museum

Vol 1 & 2

Galaga - Non-Shooting Enemies

On the first stage, don't shoot at the ships as they go into their formation. Once they're all in formation, isolate the two leftmost blue bees. Kill all the other ships except these two. Once you have, let the two bees fly and shoot at you for the next 10 to 20 minutes (don't fire a shot during this time). You can hide in the right corner for most of the time, only moving out to avoid the odd shot. After a while you'll notice that the bees stop shooting at you. Once you notice this, let them do a few more passes to make sure, then kill them. Now no ships will shoot at you!

Grobda Level Select

1. At the Grobda title screen, hold L1 + L2 + R1 + R2, then press Start.
3. Choose a level from the Battle Selection screen that appears.

Dragon Buster - Life Refill

On the Dragon Buster title screen, press Select ten times or more followed by Start to begin your game. Now, whenever your vitality drops below 32, press L1 and R1 together and it will shoot back up to 128.

NBA In The Zone 2

Michael Jordan

At the demonstration enter:
○, $\hat{\Delta}$, □, $\hat{\Delta}$, L1, L2, R2
Do this ten times fast, then all the hidden players become available, including Mr Jordan himself.

All-Star Team

With the cursor on 'Start', press and hold L1 + R2 + Select + Start until the screen fades out. You will then be able to select the All-Star Team in exhibition mode only.

Play With Jordan, O'Neal, Barkley etc

To play with Michael Jordan you must change the number and the name of the player called 'M Guard' in the Chicago team (using 'edit player' in the custom menu). Then trade this player to Chicago and put him in the starting line up. When you play, you'll see that this guy really is Michael Jordan (same face, statistics, and pieces of black cloth on his arm and leg). Do the same to have Charles Barkley with Houston and Shaquille O'Neal with Los Angeles. Apparently this also works with some other missing players.

NBA Live '98

Secrets Mode

Start a new game and select any teams. When you reach the User Setup screen (with the controllers on it), press $\hat{\Delta}$ to change 'Player 1' to 'Start New', then X to enter your name. Enter 'Secrets' and press Start to accept it. Press ○ to access the new Secrets option at the bottom of the screen. Highlight the 'Enter Secret Code' option and press X. Enter any of the following codes and press Start to make the relevant option appear on the Secrets menu. You can then toggle its setting by highlighting it and moving $\hat{\Delta}$ / $\hat{\Delta}$.
Note: All codes are saved to memory if the game is saved immediately after entering them.

Aqua Court

Enter 'Seaweed' as a Secret Code. Toggle the Aqua Court option on. The game will take place under water, with warped view and air bubbles, although the players still run around as quickly as normal.

Hallowe'en Costumes

Enter 'Scary' as a Secret Code. You can now toggle the Hallowe'en Home option to Clown, Alien, or Mummy, to make the home team play in that costume. Enter 'Freaky' as a code for the Hallowe'en Away option, then toggle to the desired costume for the visiting team.

Teddy Bear Players

Enter 'Pin rocks' as a Secret Code. You're then asked a question about Pin: choose the 'He's both' answer. The Lovable Pin' will now appear in the menu. Toggle it on and press Start and you'll now be able to select an extra Hallowe'en costume (for both home and away teams), called Lovable Pin. Select it to play the game with teddy bears!

Chameleon Mode

Enter 'Lizard' as a Secret Code, then toggle the new 'Chameleon Home' option to any player or all of them, so that they blend in with the court during the game. Similarly, for the away team, enter 'Reptile' as a code and toggle the option to the desired player(s).

Victory Screens

At the beginning when the PlayStation logo disappears, hold Down R1, R2, L1, L2 till you want to stop the graphics. This code takes you through all the win/lose screens in the game. Experience winning the Super Bowl.

Programmer Free Agents

Enter 'Prisoners' as a Secret Code to add the secret programmer players (as featured in the hidden teams) to the Free Agent list, so you can transfer them to NBA teams.

Create Player Features:

Eye Patch

Enter 'Eyepatch' as a Secret Code. Return to the main menu and press ○ to choose Rosters, then New Player. When you go down to the Features option for your player, there's an extra one to give him an eye patch.

Monocle

Enter 'Monocle' as a Secret Code. You can now create a New Player with a monocle (via Features option).

EA Toque

Enter 'Toque' as a Secret Code. You can now create a New Player with a toque (that's the Canadian name for a woolly hat, by the way).

1. Access Tournament mode and enter the password: SPKSHC.
2. Go back and choose another mode and highlight Rusty Springs on the track select screen.
3. Press and hold $\hat{\Delta}$, then add L1 + R1 and select Rusty Springs with X.

Machine Gun Code

Choose Head To Head mode. Immediately after selecting your opponent's car, push and hold L1, ○, □, and $\hat{\Delta}$, until loading is complete. Now instead having a horn, every time you push up you'll fire an invisible machine gun that clears the way of any cars. This code can be used with one or two players.

Extra Weight

First go to Tournament mode and enter the password TSYBNS. After this you can continue Tournament mode or quit it. At the car selection screen, select Car Showcase, then Mechanical. From here, select Next Slide. You can now add extra weight to the car you are viewing, shown by a number of red triangles at either end. Press L1 to add weight to the front of the car, and R1 for the rear. This makes your car turn sharper.

Enter POWRUP as the password to get a Pioneer engine. This gives your car improved acceleration in Arcade mode, and better acceleration and top speed in Simulation.

More Camera Views

At the main menu, start the race and hold:

L1 + L2 + R1 + R2 + X + $\hat{\Delta}$ + □ + ○.

Release the buttons when the race starts and you should have nine camera angles to choose from instead of the usual four.

Note: If you restart the race, the extra views disappear.

Raja Altenhoff
Tom Braski
Craig Broadbooks
Josh Hassin
Tawn Kramer
Alan Scales
Kelly Ryan
Jody Kelsey
Chris Whaley
Peter Dille
Craig Ostrander
Don't fiddle with his number, position, hand or weight as it could muck up the cheat. Now press $\hat{\Delta}$ to exit - if you select 'Create Player' again, your man will appear with 99 ratings across the board. Go to 'Sign Free Agent' from the Roster menu. Sign the super player to your team. Then select 'Edit Lines' and insert him into one of the Scoring lines for your team. By releasing players from your team (not goalies), you can sign a teamful of super players.

No Mercy Mode

1. Yes, the TSYBNS code triggers this one too.
2. Go to the Head-To-Head screen.
3. Hold down L1 and R1.
4. The option should change to NO MERCY.
5. This turns off the slower car catch-up, giving a fairer race.

3. L1, L1, L1, L2, L1, L1
Just try and hold onto the ball! Every play of the game, the ball will be fumbled twice.

4. L1, L1, L1, R2, L1, R1
Just try and drop the ball! No fumbles are allowed no matter how bad the player in possession is.

5. L1, L1, L2, ▲, L1, ▲
Just tap the speed-burst button and your player will run at top speed for the rest of the play.

6. L1, L1, ▲, R2, L1, ▲
Whatever team you choose to play with will have the skills of a high-school side.

7. L1, L1, R1, ▲, L1, R1
All the players get a boost in size: they're huge!

8. L1, L1, R1, R1, L1, R1
Every player is shrunk down to size.

9. L1, L1, R1, R2, L1, R1
Now's the time to go deep: any QB can throw the ball 100 yards on any Bomb Zone play!

10. L1, L1, L2, R1, L1, L2
Puts the game into super slow mode.

Note that the chosen vehicle won't appear in the selection menu - just start the race and you'll be driving it.

NHL Face-Off

Seven-Game Series

To get a seven-game series, start a seven-game playoff before the end of the season. You should now have an option to continue playoff. When your season ends, it will automatically overwrite the old playoff, but keep the seven-game format in.

Alternate Team Appearance

Hold X + O + L2 when the 'Just a Minute' sign appears. Keep the buttons held until several seconds after the sound of a puck is played.

Super Players

Choose Roster, then Create Player. Now input any name from the following list:

RAJA ALTENHOFF
TOM BRASKI
STEVE BRASKI
DAVE BRICKHILL
CRAIG BROADBOOKS
PETER DILLE
JOSH HASSIN
JODY KELSEY
TAWN KRAMER
CRAIG OSTRANDER
JOHN REHLING
KELLY RYAN
ALAN SCALES
CHRIS WHALEY

Now press Δ to exit. Select Create Player again and press L1 to see your new super player with a 99 rating for every attribute. Note that you can change his number, weight, and height, and switch his position to a defender (D). Just don't change him into a goalie (G) or all those super stats will be wiped. Note that you create more super players with the same name. You can also create great goalies by entering any name and upping all their attributes to 90 - giving them an overall rating of 99. To add the created super players to the team, select Sign Free Agent from the Roster menu. If you have too many players, select Release Player from the Roster menu. By gradually releasing existing players from your team, you can sign a whole team of super players. You should now be able to wipe the floor with any opposing side.

Sneaky Short Cuts

USA - Drain

After the first left corner, look out for a car park on the right. Occasionally there is a white truck there which means the Drain short cut is open. When about level with the truck, take a sharp left through the gate in the wire fence - try to avoid the water as it will slow you down. The exit is by the railway station.

Japan - Temple

Hit the first basket on the left side of the course (look closely, there should be an IO logo on it). Just past the starting grid, the Temple Gate short cut will now be open.

Alpine - Village

On the first lap, the gates are closed. When you reach the base of the track on the second lap, you will see a snowplough. The snowdrift to the left is blocked by some cones: knock these down and the plough will clear the drift, opening the doors for the next lap.

Cheats

All of these cheats must be entered on the main menu screen (1-Player, Options).

Rage Racer

Toggle Mirror on/off

Whilst racing in internal view mode, pause the game at any time and then press and hold \triangle and then tap L1 to make the rear-view mirror disappear. Press R1 to bring it back.

Mirror Mode

Providing extra course variety, the Mirror Mode reverses all the tracks so that all the corners and writing are backwards. To access it, select 'Race Start' from the main options and then hold L1, R1. Select and Start until the race begins. If the cheat has worked you will instantly notice the difference.

Advanced Colour Palette

To access a greater range of colours to use on your team logo, perform the following:

Select 'Customise' from the main options, then select 'Design' and choose any logo or create your own. Then select 'Paint' and then press any direction until the cursor is off of the painting area. Now press a button to move onto the colour palette and then press L1, L2, R1, R2 and Select. If done correctly, additional boxes will appear on the right labelled R, G, and B. These letters represent the amount of red, green and blue hue for the specific palette that the cursor is highlighting. Pressing \triangle and \triangle will change which hue you alter and then

pressing R1 + \triangle or \triangle will alter the numeric figure in the hue box. Now move the cursor onto the painting area and press L1, L2, R1, R2, and Select. You should now see a targeting cross-hair appear in the smaller picture area (for greater accuracy we presume). Finally, keeping the cursor inside the painting area, press L1 + R1 in conjunction with any direction to rotate your design around.

Infinite Money

Follow the steps below for infinite money:

1. You must complete the Normal GP (all the classes). Wait for the credits roll until the end.
 2. Save the whole game into a brand new block in Save/Load screen.
 3. Go back to play the Normal GP at class 5 and you should be able to choose only one car (GNADE).
 4. Choose that car and press Race Start.
 5. During the countdown (3, 2, 1, Go), press Start and choose Retire. This should let you quit the race without losing a chance.
 6. Finally, enter the Normal GP again, then choose Class 1. You should now have infinite money. You can buy and upgrade any car you wish.
- Note: If you repeat all the steps at Extra GP, you'll get the same cheat.

Raging Skies

Extra Time

Hold L1 + L2 + R1 + R2 + X + \triangle + \square + \triangle as the game loads.

Raiden Project

Full Credits

Go to the option screen where you can set your credit number, then press \triangle + \square + X at the same time and you'll get FREEPLAY.

Mission Select

Go to the Settings menu and choose Difficulty. Hold down R1, R2, L1, L2 and press Start.

Extra Options

During the game, hold the top four buttons (L1 + L2 + R1 + R2) together to bring up a screen which allows you to adjust the resolution and move the screen around to your liking.

Power-Up Pixie

Watch out for trees that are slightly off-

colour, generally on the right side of the screen, and which also stop your fire. Once found, get close to them and unload into them. An explosion should release a flying pixie. Capture it, and when you die, the pixie will release some power-ups.

Rapid Reload

Passwords

To use these passwords, wait until the title screen comes up, then press and hold L1, L2, R1 and R2 on controller 1. Then press Select and 'Push Start' should change to 'Secret Code' with two letters alongside. The left-hand letter is changed by pressing \triangle or \triangle , and the right by using the \triangle and X buttons, to enter the level codes:

Stage 2 MA Stage 3 UT
Stage 4 RH Stage 5 MK
Stage 6 HT

Play As Fwank – Sort of!

This cheat is bugged and doesn't really work properly, but if you want to try it anyway then read on. Whilst on the Character Select screen, press the following sequence on controller one: L1, O, R1, Δ , Δ , R1, O, Δ , Δ . If the cheat has worked, you should hear a sinister laugh and a red balloon will appear on the right-hand side of the screen. This will then float over to the left and position itself over Sister Maggie. Now when you move the cursor over her, Fwank will be selected. However, when you start the actual

game, you'll still play as Sister Maggie.

Cheat Codes

To enter the following cheats, pause the game and then hold the L1 and L2 buttons for about ten seconds (or until the selection bar stops moving). Then input the relevant code. **Note:** You may have to enter each of the codes below in order (start with Health, then Ammo, Power, Level Skip).

Infinite Health

Δ , Δ , Δ , Δ , Δ , Δ

A new option called 'Health' will appear at the bottom of the menu. Now every

time you get close to death, pause the game and click on 'Health' option to replenish your bar.

Infinite Ammo

Ridge Racer

Extra Cars

Obtain all 12 standard racing cars by scoring a 'Perfect' by blasting every single alien in the Galaga game.

Mirror Mode

Start a race and drive up to the end of the slip-road, then turn around and race back to the starting line. As you approach the barrier at the back, it will disappear and you'll now finding yourself racing in reverse on a mirrored track.

Move Flag

To move the Ridge Racer flag around on the title screen, hold L1 and R1 and press the other buttons to move the flag. You can also speed up the rotation of the cars and tracks on their respective select screen by using this same technique.

Devil Car

When you place first on all three standard tracks, go to the Time Trial mode and you'll be racing against two other cars as opposed to just one. The third is the 13th Racing Devil Car. To beat it, you must overtake it whilst it is stationary on the second lap and then maintain a perfect racing line throughout the remaining duration of the race. Achieve this and the Devil Car will appear to the left of the first car on the select screen.

Ridge Racer Revolution

Extra Cars

You can boost the car quota up to a staggering 12 motors by getting a perfect result in the Galaga loading game, shooting all 40 enemy craft.

Secret Options

Don't shoot any of the ships in Galaga '88. After all the ships have gone by, there will be a small firework burst. Go to the 'Other' screen and you can now set the racing time from Normal, Morning, Evening and Night.

Spotlight Control

Hold down L1 and R1 at the main screen (with Game Start and Options commands).

Buggy Mode

To turn all the cars into small buggy-type vehicles, complete the Galaga loading game scoring a 100% hit ratio. To make this much easier, when you switch on your PlayStation on, press and hold L1 + R1 + Select + Δ + Δ . Now when you play Galaga, your ship will fire a laser beam that can wipe out enemies with ease. Start the game as normal and you'll have all the cars at your disposal, all squashed!

Toggle Mirror On/Off

Getting fed up of having a rear-view mirror on the screen? Well just pause the game by pressing Start, hold down Δ and press L1 to make the mirror vanish. You can press R1 to make it reappear again too!

Zoom Car In/Out

Drive using the external view mode and pause the game. Now hold down Δ and press L1 and R1 to zoom in and out on your motor.

Spinning Mode

Select a Time Trial race and when the Start command is highlighted, press and hold the accelerator and brake until the action switches to the track.

You begin the race as normal, but will see the message 'Spinning Point' appear as you reach the first bend.

Take your finger off the accelerator and quickly press it again to send your car into a spin.

You can perform 360's, 540's and even 720's with a bit of practice. You'll get marked on technique and there are three spinning points in each track!

Mirror Mode

You can play the tracks backwards with corners bending the opposite way and the writing reversed by following these simple instructions...

Start the game as normal, drive a little way down the track and turn the car around. You will see a barrier ahead meant to stop you racing the wrong way. Line your car up and attack it! If you hit the barrier at exactly 100kph you will go straight through and be able to race the track backwards!

Play Link-Up With One Disc

You normally need two copies of the game to play a two-player link-up, but this special technique lets you do it with one.

Hold down the door sensor on PlayStation #1 (under lid at the back right – use Blu-Tac and a matchstick) and load the RRR CD. When you see the RRR title screen, remove the disc and replace it with a music CD. Don't release the door sensor – you must grab the disc while it is spinning! (Note: This is entirely at your own risk. PowerStation takes no responsibility for any damage caused to your machine or game.)

Then hold down the door sensor on PlayStation #2 and load up the game. It should now display the 2P-Link Option on the RRR title screen. Leave the RRR

and drive in RRR. To get them you have to win Novice, Advanced and Expert in Time Trial after you have completed them in normal race mode. You get the Devil #13 in Novice mode, Kid Car #13 in Advanced, and the superb White Angel #0 in Expert.

If you don't see the '2P-Link Option', press Start once on one or both of the machines, then exit back out to the title screen and you'll see it.

Due to the fact the game loads the first track into memory anyway, you can now have a linked game on the first track, Novice. If you want a different track, do the following. Select another track and press Start on both machines, then when the 'loading' screen appears, wait for the RRR CD to spin to half speed (track has loaded at this point) then quickly swap with the music CD on the other PlayStation. If your timing is right, the track will now load on the other machine and the game will start.

Special Cars

There are three special cars to discover

Resident Evil

Rocket Launcher

To start the game with the rocket launcher plus infinite ammo, you must first complete the game in under three hours. Simple. When, or rather, if you achieve this, you'll be able to save the rocket launcher to your inventory and start the game more or less invincible.

Changing Clothes

It's true, by completing *Resident Evil* with a good ending (whereby you rescue BOTH team members), you'll be awarded the Special Key which will be added to your inventory and saved in preparation for the next game. This key will allow you to enter the previously locked door in the wardrobe and enter the hidden wardrobe closet. In here you'll be able to access an alternative set of togs for your chosen character. Pointless but fun.

Sun Crest

Go to the Armour room on the second floor and then push the two statues over the air vents in the floor. Now press the button on the ground and the display cabinet at the far end will open, revealing the crest.

Wind Crest

Push the statue off of the balcony on the 2F Dining Room and collect the Blue Gem from the shattered remains below. Take this gem to the Tiger Statue Room on the first floor and insert it into the statue's eye socket. This will cause the statue to pivot, revealing the crest.

Star Crest

Go to the Large Gallery on the first floor and you'll be confronted by a series of paintings. Visit each painting in sequence starting from the youngest to oldest and press the buttons. The correct sequence is as follows: New-born, Infant, Lively Boy, Young Man, Middle-aged Man and Old Man. Finally, once you've pressed each button, go to the painting at the end and press the final button to obtain the crest.

Moon Crest

This is by far the hardest crest to obtain and it is found in the Attic. When you get there, you'll be confronted by an extremely large snake. You can either take evasive action and run around it to grab the crest from its nesting ground, or alternatively you can blast it to kingdom come and then grab the crest.

Doom Books & Medals

Take the Doom Books to the fountain which you'll come to after the underground passage, then go to your inventory, go to 'Check Item' and rotate each book around so that the pages are facing outwards. Now press X and the book will open, revealing the medals needed to drain the fountain and access the lab.

Logging Onto The Computer

The log-in name is JOHN. The first password is ADA. The final password is MCLE.

Disks & Terminals

Disk 1 – Inside the hidden room in Library B.

Disk 2 – Behind the huge rock in Crank Passage.

Disk 3 – On the desk at the Stairs in the laboratory.

Terminal 1 – Inside Private Room A.

Terminal 2 – Inside the Mortuary.

Terminal 3 – Inside Power Maze B

Powering The Elevator

To activate the power to the elevator that will take you down to the final battle with Tyrant, you'll need to visit the power panel in the first room of the Power Maze. Simply go to the southwest corner of the room and restore the power to the darkened areas. Go into the last room of the Power Maze and then use the terminal at the east end of the room – the elevator will now be active.

eats and codes in any magazine

To activate the codes, pause the game, type the password and then quit (Select button). Do this separately for each one. O, □, X Allows you to enter the following codes:

- O, O, X, O, Δ, □ Special laser
- O, X, □ Refuels you
- , X, Δ Invincibility
- , X, O Smart Bomb
- , X, □, □, O Mission Success

Star Gladiator

Invisible Walls

If you beat the game on any skill level, go to the options screen and a new option will have appeared that allows you to turn the invisible walls on or off. This means that there'll be no more Ring Outs.

Fighting In The Dark

Select your character as per normal and then press ⇐ + L2 + R2 and hold them until the fight starts. You'll now notice a distinct lack of light as you commence the fight.

Fight As Bilstein

This cheat can only be accessed in one-player mode, but once it has worked you'll be able to access the character in two-player mode. On the character select screen, go to Hayato and press and hold Select. Now move to Gore and press

- X, ⇐, X, ⇐, ⇐, ⇐, Δ, Δ, Δ, Δ, X +
- . Bilstein will now appear to the right of Gore.

Fight As Kappah

Once again this cheat can only be accessed in one-player mode, but once the cheat has worked, you'll be able to access the character in two-player mode. You must perform the Bilstein cheat before you can get this to work. On the character select screen, go to Bilstein and press and hold Select. Now move to Hayato and press

Play As Blood

Once you've got the Bilstein and Kappah codes to work, go to the character select screen once again and then move your cursor to Bilstein. Now press and hold Select whilst entering the following code: X, ⇐, X, ⇐, X, ⇐. Now move to Kappah without highlighting any other characters in the process and press: ●, Δ, ●, Δ, ●, Δ. Finish off by pressing L1 + R1, and if the cheat has worked you should hear the suction noise that rang out after the previous two cheats. Now cycle

through the characters and Blood will be available.

Big Head Mode

After choosing your character, press and hold ⇐, Start, ● and ■. Continue to hold them down until the round starts. To get the shrunken head mode, use the above cheat but press ⇐ instead of ⇐.

Super Bilstein

Set all the options to the default settings and then complete the game in six minutes or under to compete against the Super Bilstein character. You'll find he is slightly bigger than the normal Bilstein and his stage is dramatically different as well.

Half-Gravity Mode

You must first complete the game on any skill level for this to work. During the stage load, simply hold ⇐. The Invisible Walls option is on automatically, so you don't have to worry about ringouts. Every time you smack the opponent hard, they'll go flying miles and bounce off the walls!

SF EX Plus Alpha

(Jap Version Only)

Revealing Hidden Characters

Expert mode is the place to be, and completing the missions is the task at hand. For every time you complete a mission, you'll be given a certain number of points. As your points build, so does the characters available to you. The following is the points required, with the instructions telling you how to retrieve them:

Character	Points Needed
Evil Ryu	100
Evil Hokuto	200
Cyroid Gamma	300
Cyroid Beta	400
New Vega (M Bison)	600
New Garuda	800
New Gouki (Akuma)	1000

To select the 'New' Vega, Gouki or Garuda, move onto the appropriate character and hold Start (in Arcade Mode, the green gauge will vanish, and in the other modes the selection box will turn from white to yellow), then press any button. Now, these are the CPU counterparts that you have fought against before. Although similar to their 'Normal' counterpart versions, these guys inflict more, and take less damage.

When you have managed to get all seven characters, a barrel will appear, this keeps track of the missions completed. When you've performed 220 missions, the Options Plus menu will appear; in the options menu funnily enough! At first,

there is only one option available, but as you complete the game in various ways, more options are revealed.

Vs CPU Gouki (Akuma)

The Options Plus menu must be enabled for this to work. Set the 'Enemy' option to 'Plus'. You'll now be able to fight against CPU Gouki and Garuda; although you'll be unable to fight Dhalsim or Sakura.

Select a game on Arcade with any difficulty and settings. Now comes the tricky part: for eight missions straight you must NOT lose a round. During the tenth round, Gouki will appear and take out Vega with his Blink Hell Murder Super Combo. You now fight Gouki, and even if you were to lose, you'll be able to continue, or even pick another character.

Unlike in previous Street Fighter epics, you can still reach Gouki with Gouki or CPU Gouki. Plus you can finish any which way you like. Whether it be a normal, super or time out. When the ever tough CPU Gouki is no more, the following options become selectable in the 'Option Plus' menu. They only apply to the Training mode:

Training Partner

Fix (normal) or move (2-player against you). Only works when 2-player joystick plugged in port 2.

Super Combo Gauge

Three (normal) or infinite (gauge never changes).

Super Cancel Limit

On (normal) or off (cancel similar super combos)

Otedana

Off (normal) or on (opponent moves slower through air).

Fight CPU Gouki Bug!

Following the steps above, when you come to the match against Gouki, join the match on the second player side. Now, with the second player's fighter beat the crap out of player one. Then, before the 2-players vs CPU match commences, continue, pick a character and beat the second player. When the CPU battle finally begins, it will have reset to Battle 1. The match will still be against Gouki, but in Thailand! The next ten battles are against Gouki in other locations.

Fight CPU Garuda

With any character, you must get two perfects and four super finishes before battle 10. On top of that, you must perform a level 3 super combo finish. If your character has a level 3 super (Gouki, Evil Ryu & Zangief), then that can be utilised.

Now, each character below must perform a combo at least once during the game that does the following number of hits:

- Allen Snider & Darun Mister - 6 Hit Combo
- Blair Dame, Cracker Jack, Ken, Pullum Purna, Ryu & Zangief - 7 Hit Combo
- Guile, Hokuto, Kari & Skullomania - 8 Hit Combo

- Gouki & CPU Gouki - 9 Hit Combo
- Doctrine Dark - 11 Hit Combo
- Chun-Li - 12 Hit Combo
- Garuda, CPU Garuda, Vega, CPU Vega, Evil Ryu & Evil Hokuto - 13+ Hit Combo

Hidden Barrel Game (UK)

Highlight the Practice option on the mode selection screen and press Start. Then press ⇐, ⇐, ⇐, ⇐, ⇐, ⇐, Start. A message will appear to confirm correct code entry. Select the Bonus option under Practice mode to play the bonus barrel game from Street Fighter 2.

CPU-Controlled Team Battle Round

Select Team Battle mode. Hold L2 + Select at the 'Vs Loading' screen until the match begins. The CPU will control your fighter for this round. Note: This code may only be enabled once per team battle.

View Hits In Survival Mode

Press Select at the Survival result screen to display the number of hits completed.

Hiding Your Fighters

This little extra can often prove useful; because if you don't want your opponent to see what you're selecting, simply hold L2 down, then select your characters. When you release L2 they'll be replaced by question marks.

Gouki's (Akuma's) Beads

Simply finish Gouki off with a Super Combo, and his necklace will break off. Probably a Christmas cracker job!

Street Fighter Alpha

Computer-Controlled Dan

Getting to fight a computer-controlled Dan is easy... and beating him is even easier. All you've got to do is win the fifth, sixth, or seventh match and hold Up + L2 + R2. Keep these buttons held down until the winning quote is displayed and then release. If this has worked, you'll go to the next fight in the sequence and just before the blows start flowing, the immortal line 'Here Comes A New Challenger' will flash up on screen before you're whisked away to Dan's hidden location.

Computer-Controlled Akuma

The twisted master can be accessed via two different methods. Firstly, you can try beating the game without losing a single round and also achieving a

minimum of ten super combo finishes (that's ten victories with the 'S+' symbol displayed). Do this on any level higher than four and Akuma will stroll on and humiliate you after the final boss. Alternatively, try positioning your cursor over the character you wish to fight as on the character select screen and hold L2 + R2, then press and hold X. Hold the three buttons down until Akuma has pulverised your opponent, then fight.

Selecting Dan

Go to the random select box on the character screen and hold L2. Now press the following code in sequence: Δ, □, X, O, Δ. If the code has worked, Dan will appear as your selection. To get Dan in his other strip, simply input the code backwards so it

reads: Δ, O, X, □, Δ.

Selecting Akuma

During the character select screen, go to the random box and hold L2. Now press the following code in sequence: ⇐, ⇐, ⇐, ⇐, ⇐, ⇐, Δ (⇐ = towards outside of character box). Akuma will appear as your character selection if the cheat has worked. To play as Akuma in his other strip, finish the code with O, X, instead of □, Δ.

Selecting M Bison

Go to the random box on the character select screen and hold L2. Now press the following code in sequence: ⇐, ⇐, ⇐, ⇐, ⇐, ⇐, Δ (⇐ = towards outside of character box). Alternatively, finish the sequence with O, X (instead of □,

Δ) to get the Bison in alternate colours.

Dramatic Battle

If you reckon you're the business at Street Fighter Alpha, this hidden game will test your might to breaking point. If you complete the game on any skill level higher than four, a new option called 'Dramatic Battle' will appear in the options menu. Plug in two controllers and have an able-bodied friend at the ready and you'll both take on Bison with Ken and Ryu. Fast, frantic and over nearly as soon as it begins, this battle sure is tough - especially seeing as both players share the same energy bar. Once you've obtained the Dramatic Battle option, save it to your memory card for evermore.

All you have to do is win the World Cup to enter a bonus Special Cup tournament featuring all of the above teams. Reckon you can take on the intergalactic celebs?

Super Buster Bros Collec.

Level Select

Hold \diamond and select tour mode.

Expert Mode

Press X on controllers 1 and 2 while selecting tour mode.

Tekken

Extra characters

By completing the game with each of the eight standard characters, you'll earn yourself the opportunity to play the game as the respective character's sub-boss. Although some aren't great variations on the original character, it's still good for a laugh!

Heihachi Mishima

The final boss bloke is slightly harder to obtain. You must complete the game in under five minutes, 30 seconds without continuing.

Devil Kazuya

To access Devil Kazuya in Arcade mode, you must complete the Galaga loading game with a 'Perfect'. To do this, you have to blast all eighth levels of the game without missing a single craft. To assist you, try blasting the first wave in less than 18.5 seconds to receive a duel-craft for double the firepower. You can also practice each wave by pressing Select after it has finished to repeat the stage again – however, by doing this, you won't be able to obtain the Devil.

Dual Galaga Craft

To obtain two Galaga crafts, press and hold \uparrow L1 Δ X on the second control pad as you switch on your PlayStation. You won't be able to use this cheat for the Devil.

Tekken 2

Choose A Pose

You can determine which of the two victory poses your character performs. After you've won a bout, press and hold \square or X (right through the replay) to get the first ; \bullet or \blacktriangle to get the second.

More Poses

Six of the fighters have a third finishing pose after winning a fight: Law, Paul, Michell, Jack 2, P Jack, Kunimitsu, and Kuma. Simply hold both kick buttons down, from the moment you win the fight, right through the replay to the end.

First-Person Perspective

- First of all you must obtain all the hidden characters in the game.
- Go to the character-select screen.
- Hold down the L1 and L2 buttons and select your character in the normal manner.

- Now your fighter will appear as a wire-frame model.
- When the fight starts, the view will change to a first-person perspective.

Big-Head Mode

- Acquire all the hidden characters in the game.
- Start again but hold down the Select button when you select your fighter.
- Keep it held down until the round begins.
- You should now see that your fighter's head has been blown up!

Sky Mode

If, having obtained all of the secret characters, you press \diamond + Select when choosing a character, lo and behold you will enable SKY MODE! You must hold down this button combination until the fight actually starts, at which point you will hear a 'punch' sample to confirm that the cheat has been activated. Basically it allows you to fight *à la Mortal Kombat*, with certain uppercut-type moves resulting in your opponent flying high up into the sky. For some reason it works with sweeps as well.

Note: This particular cheat also enables Big Head Mode 1.

Easier Roger/Alex

There's an easier way to get Roger/Alex. First get all the players selectable. That is including Kazuya and Devil/Angel. Now all you have to do is go to practice mode and do one 10-hit combo with any character. Make sure that you turn off the tool bar at the bottom of the screen where you can see the buttons to press, otherwise it won't work. When it's activated, you should hear the word 'great'.

Bigger-Head Mode

- First perform the Big-Head Mode cheat.
- If you're playing in arcade mode, hold down Select when you reach the continue screen.
- Your head and arms will now be bigger than ever before!
- If playing in Vs Mode, go back to the character select screen and hold Select again whilst choosing a fighter for the same effect.

Purple Kazuya

- All the secret characters must be accumulated first.
- Start a new game and highlight Kazuya.
- Now hold down Start while selecting him.
- He'll now fight in his third, purple costume.

Thought Bubbles

- Play in practice mode.
- Leave your character alone for a while.
- You'll now see thought bubble appear above his or her head!

Obtaining Kazuya Mishima

- Acquire all the sub-bosses by completing the game using the ten original fighters.
- Play through using a sub-boss.
- Once completed, Kazuya will be added.

Devil & Angel

To obtain this duel character, Complete the game with Kazuya.

Fight Roger/Alex

- Get to the Devil or Angel...
- Start a new game with any character and when you reach the third fight, defeat your opponent on the last round with only a particle of energy left.
- If you do it right you will hear the word "Great" and the next fight will be against Roger or Alex.

Theatre Mode (Japanese version only)

View the *Tekken 2* endings at your leisure!

- Unplug the second controller.
- You must have all the available characters stored in your memory card.
- Load up the game. When the words 'Namco Presents' appear, press \diamond , \rightarrow , \bullet , X, and Select – holding the last four down when you press them. It's tricky as you need to enter this sequence quickly before the words disappear.
- If unsuccessful, the game will load the normal opening intro. Try again.
- If successful, you'll be taken to the Tekken 2 Theatre. Here, you can scroll down the list of FMV endings (and openings!) and play any one of them. Note: After about 10 seconds or so of inaction, this mode will exit automatically, so keep moving around if you plan to stay.

Taunt Opponent (Jap version only)

When you have won a battle against your opponent, press \rightarrow , \diamond , \bullet and your character will jeer in Japanese.

⇨, ⇨, ⇨, ⇨ - Cloaking Device (Renders your vehicle invisible for 3 seconds)

Extra Character Codes

To get two extra characters just execute these codes at the car selection screen for a one-player tournament game. Once done, you can select the extra cars in any other mode. Also, these codes need to be re-entered each time you load the game.

⇨, L1, Δ, ⇨ - Adds Sweet Tooth to the character selection screen

L1, ⇨, ⇨, ⇨ - Adds Minion to your character selection screen

Extra Level Codes

You'll need to execute these codes at the track selection screen for a two-player challenge match. If done properly you should hear a loud noise and the game will advance to the character selection screen.

⇨, L1, Δ, ⇨ - Adds Sweet Tooth to the character selection screen

L1, ⇨, ⇨, ⇨ - Adds Minion to your character selection screen

⇨, ⇨, ⇨, R1 - Jet Rider Level (Based on the game, *Jet Rider*)

⇨, ⇨, L1, R1 - Cyurbia Level (From the first game)

Homing Napalm

1. You must be holding

three napalms (no more, no less).
2. Now fire one of them and keep the button held down.
3. While holding the fire button, enter this code: ⇨ ⇨ ⇨ ⇨ ⇨ ⇨ ⇨ ⇨ (Keep the fire button held and try again if it doesn't work straight away).
4. You will receive about a dozen extra napalms which home in on enemies.

dollars. First go and investigate a crash site, then when you finish it, research Alien Aliens. Once it's researched, manufacture a lot and sell it all for a nice profit - it costs \$3,000 to make, but sells for \$6,400. Also, sell all but one alien corpse. After you research it, sell it and get \$20,000 for each one.

Never Die

You need a memory card for this one.

When you start the mission, save the game. Then, after you end your turn, if none of your guys die, save after the aliens' turn is over. Continue until someone dies, in which case Abort Mission and Load Game. Then do something different from last time. Continue until the mission is over and none of your guys will die.

Cheats

To activate the cheat mode, load the game and wait for the Infogrames logo to appear. Then quickly press: \triangle , \square , \triangle , \square , \triangle , \square (press the last two buttons together). The phrase 'Lock Off' will appear to confirm correct code entry (and unlock all the Arcade tracks). Before the screen changes, press one of the following controller actions to activate the corresponding cheat function...

Unlimited Time

Press and hold \triangle + L1 to get infinite time on Arcade mode.

Narrow Tracks

Press and hold \triangle + L2. The Arcade tracks are now narrower - as confirmed by the 'Narrow Tracks Loading' message before a race.

Jeep

Press and hold \triangle + R1. A small Jeep will replace the Peugeot 106 Maxi. This cheat also activates the secret Rollercoaster track.

Restart Race

Press and hold \triangle + R2 to allow an Arcade mode race to be restarted.

Debug Mode

Press \triangle then \square . Game debug information will be displayed. Press Start to access a 'Memory' option that displays more information.

All Cheats

If you want the first four cheats active at the same time, simultaneously press and hold \triangle + L1 + L2 + R1 + R2 when the 'Lock Off' message appears.

Secret Rollercoaster Track

Activate the cheat for the Jeep (see above), then select the 'Sweden 1' Championship track in Time Trial mode. The screen should say it's loading the '???' stages to indicate you've accessed the secret circuit.

Victory Boxing

Extra Heads

Whilst competing in the main event, once you have fought and beaten Takeshi Hangman, The Champ and Alan Kidd, return back to the 'create your own boxer' mode (whilst keeping with the same gym you used to beat them), and the highlight the 'head' option. Now scroll off of the list available by either going left or right, and then the heads of the three boxers we just mentioned will be available for you to select.

Secret Fighters

If you beat The Champ and then successfully defend your title five consecutive times in each different fighting style, you'll reveal six new characters. They are as follows:

Peek-a-boo

Kiki & Mimi, Edward King

Detroit

Roboer Beta 1, Carrie the Bunny

Skip To The Movies

To go straight to the end-of-level movies, and enter: \square , \square , \triangle , \triangle , \triangle , \triangle , R1, L2, R2, R1

Invincibility

Becoming invincible is always useful when playing a shoot-'em-up, but this game might be a bit unstable if you use this: \square , \square , \square , \square , \square , \square , \triangle , \triangle , \triangle , \triangle , L1, R1, Select

VR Baseball '97

Field Of Dreams Stadium

Highlight the credits option and press:

 \square , \square , \square , \square , \triangle .

Warhammer:

Shadow Of The Horned Rat

All the cheats have to be entered on the caravan screen.

Free Troops

Put the pointer on the troop roster and hold Start then press: \square , \triangle , \square , \square , \triangle , \triangle . Now your troops will fight for free.

All Units

Put the pointer on the spare book on the left and hold Select then press: R1, L1, L2, R2. Your troop roster will now contain every available unit in the game.

Infinite Magic Points

Put the pointer on the book of magic and hold Select then press: \triangle , \triangle , \triangle , \triangle , L1, R1. Now whenever you cast a spell during a battle, no magic points will be deducted.

WCW Vs The World

Hidden Fighters

By beating the eight bosses in the game, they're added to the list of playable fighters and can be used in any mode except the league challenge.

First, do a league challenge and fight with a JR class wrestler. Win all six divisions with the same guy and you will fight a boss. In WCW it's Jeff Jarret. There are others such as Major Tom, Steel Talon, and Grizz Lee.

If you win all six divisions there will be a new division called Super JR. Win in that and the penultimate hidden fighter is Jaguar.

Then go on and do the same thing with a heavyweight class. You will fight the same bosses through the six divisions. Winning them all reveals a new Super Heavy division whose boss is The Giant - the final hidden fighter.

Old 'Uns

To fight as the old Hogan or the old Sting (doo doo doo?), press Start (instead of X) to select them. Do the same for Masahiro Chino and he'll fight with an NWO shirt on.

Wild Arms

Secret Aliens

Go to the three islands located in the Southern region of the map. After fighting eight to ten battles, you'll then battle a secret alien race known as the Hayokonton. On top of all the experience and gella you'll receive from them, they sometimes give you duplicators.

Williams Arcade

Greatest Hits

Debug Mode

Hold L1 + L2 + R1 + R2 and push Select. Do this twice. This code takes you to the operator's option screen. It can be used on all the Greatest Hits games.

Mortal Kombat 3 Sounds

Turn on the PlayStation without a CD inside and access the audio CD player from the menu. Now insert the game CD and you'll see two tracks. Move to track two and press a button to play it. You'll now hear over five minutes of MKIII sounds.

Wing Commander IV

Scene Select

When you get to the game copyright screen, enter the following code: \triangle , \triangle , \triangle , \triangle , R2. You can now select any scene in the game by pressing R1 or R2.

Cheat Kill

With the Scene Select cheat activated, you can kill any ship with just one shot by pressing L1 + L2 + \square .

Worms

Sheep And Banana Bombs

When at the weapon select screen, simply press \square and X eight to 10 times and you should then gain access to both the big banana bombs and exploding sheep. Woohoo, what a fruity/lamby combination!

Exploding Sheep

Go to the Worms Option screen, then go onto the Weapons Option Screen. Move the cursor away from the Exit logo and press these buttons: X, \square , \square , X, \square , \square , X, \square , \square . Lamb chops

Wipeout

Access Rapier Class

If you are unable to succeed at the Venom class and experience the extra thrill of Rapier, then do the following to get straight to the speedier action. Hold tight!

1. Highlight One Player on the startup screen.
2. Hold down all of the following buttons: L2, R2, ←, Start and Select.
3. Keep holding them and press the X button. This should take you to the class screen. Now you can get down to some serious racing!

Hidden Track

This is a top cheat to allow you to get another track called Firestar. You would only normally get it by completing all the tracks in the Rapier class. Well now you don't need to. It's fast, bendy and pretty darn fun!

1. Highlight One Player on the startup screen.
2. Hold down all of the following buttons: L1, R1, →, Start, □ and ○.
3. While still holding the above, press X.

Turbo Start

Is achieved by having the red rev bar on the second line from the end when the announcer says "go". The best way is to press accelerate as the orange light comes on or in the middle of the announcer saying "one".

Repeat Lap

In a race if you hit one of the air brakes hard and steer that way to do a 180° turn whilst crossing the line, the game will ignore that lap and let you do another one, enabling you to catch up with the leaders.

Wipeout 2097

Cheats

The following three cheats are accessed on the opening options menu (the one from where you select the mode, team, and track) by keeping L1, R1 and Select held down. The rest are accessed whilst in a race.

Piranha Ship

Keeping the aforementioned buttons held down, press: X, X, X, X, X, ○, △, and □. Now go to the team select and you'll instantly be rewarded with the inclusion of the Piranha ship – a state-of-the-art craft that is perfect in every respect.

Phantom Class

Hold down L1, R1 and Select and press △, △, △, ○, ○, and ○. Now go to the track select and you'll notice that the extra-hard Phantom class is now available to race on.

Track Cheat

Keep L1, R1 and Select held down and press □, ○, △, ○, and □. This cheat allows you to race on each and every track in the easy Vector class – giving you every opportunity to practise and perfect the multitude of circuits at a speed that is altogether easier to handle.

Machine Gun

Pause the game at any time during a race and hold L1, R1, and Select. Then press □, ○, X, □, ○, X, and △. When you unpause the game again, you'll see a blinding green flash to indicate that the cheat has worked. Now by pressing the fire button, you'll activate a newly installed machine gun on your craft.

Infinite Energy

You'll never have to slip into the restoration lane again by activating this essential trick. Simply pause the game at any time during a race and then hold L1, R1 and Select. Now with those buttons held, press △, X, □, ○, △, X, □, and ○. Unpause and you'll be instantly invincible.

Infinite Time

Pause the game at any time during a race and hold L1, R1 and Select. With those buttons held, press △, □, ○, X, △, □, ○, and X. Then unpause to activate the cheat.

Infinite Weapons

During a normal race, pause the game and hold L1 + R1 + Select. Then whilst they are held, press X, X, □, □, ○, ○, △. Unpause the game and you should see a green flash. Now whenever you use a weapon, you should have it replaced straight away. You can toggle through the various weapons by pressing the 'drop weapon' button.

Farmyard Animal Mode

Switch on the PlayStation with the disc inside and hold L1, R2, Select + Start until the title screen is displayed that says 'Start'. Then take your finger off Start and press it again to go through to the main options screen with team and craft selection on it. The craft sprites will have changed into various farmyard animals!

Hidden Comics

1. After beating the game in Easy mode without continuing or losing a round, go to the title screen and highlight the option icon.
2. On controller 2 hold L1, L2, R1, R2, Start and Select to view the comic strip featuring Neco.

Hidden Game

1. Switch on the PlayStation and hold Start + Select until a new loading sign appears.
2. Keep the buttons held down and a new game will eventually appear, called Tiny Phalanx. It's an old-style side-scrolling shoot-'em-up.

Invulnerability

When the Phalanx game has loaded up (hold Start + Select when you turn on PlayStation), select the options screen and put the cursor over the speed icon, then press R2 + R2.

At the Game Select screen (highlighting 'Xevious 3D/G'), hold X + ○ + → + Start on controller 2. Keep holding them until the Xevious 3D/G title screen appears, then release Start (nothing else) and press it again to start the game. Keep the buttons held down

screen and hold L1 + L2 + R1 + R2 + Start. The 'Game Start' option should now be highlighted, so (still holding the shoulder buttons) press Start again. Continue to hold all the buttons until your ship changes.

Fat Ship

First, you have to get the Black Ship. Then go back to the Xevious title screen, select Configuration Mode and highlight 'Exit'. Now, as before, highlight 'Reset' and hold L1 + L2 + R1 + R2 + Start. The 'Game Start' option should now be highlighted, so (still holding the shoulder buttons) press Start again. Continue to hold all the buttons until your ship changes.

Twisting Ship

If you have a NeGoon controller, you can use it to twist your ship.
